> So I can feed my Ground plane or quad with a balun, then its a dipole?

no, it's not. be careful, you're making my case.

for a pair of quarter-wavelength wires to act as a dipole, several things must be true.
physical arraingement, and feed are both important. your broken dipole is somewhere between a real dipole, and the ground plane. basically, a monopole, with a counterpoise.

if you significantly bend the wires, or re-arrainge them physically, then it is no longer a dipole.

if we remove three radials from your ground plane, /i'm assuming it's fed with unbalanced line directly, as it should be/ and straighten out the remaining radial relative to the driven element, then we have your broken dipole again.

there's another class of antenna, called a bicone, that has significantly different charachteristics, but is conceptually very close to the dipole. it's got broader bandwidth, and is commonly used in part 15 testing for that reason. the discone is another very close relation, somewhere between the bicone, ground plane, and a feedhorn.

this stuff does matter. when you make changes, they have effects, even if your particular arrangement is too sloppy to notice them. when you make a change that should have an effect, and it dosent, this is telling you that you have other problems.

> >do you not see the difference between a driven, and a passive element
>
> You think the end thats fed with the shield of the coax is passive?
> Come on over and grab the end of my dipole, (fed with coax and no
> balun), when I have 1Kw running to it. You will change your mind
> about it being passive.

no, i won't. where did you get the idea that passive elements wouldn't have current flowing in them. and where pray tell, is that current coming from

grab the director on a beam, and see what you get. that's a simple wire sitting in space, with no connection to the coax at all.. is it a passive element, absolutely.. has it got rf current flowing in it, you'd better believe it.

your two wires fed in the middle with coax, are not a dipole.
the best name i can give it, is a monopole with counterpoise.
throw it into mininec, and see if you get the same results as a properly

constructed dipole.
that's freeware, a little limited, but it can do simple antennas like
dipoles with no problems.

you've also got a lot of rf current on your shield, which is making the
shield an active part of the antenna. you didn't think that this current on
your non-driven element magically stopped at the connector, did you.. why
would it stop there.. there is one possibility, that your feedline is an odd
number of quarter wavelengths long, so that this pont is high impedance. but
that only works at particular frequencies. in this case, it's still not a
dipole, /half the antenna isn't driven/ but it will work better than an
identical antenna with feedline an even number of quarter wavelengths long.

> You will notice very little, or more likey no difference between a
> dipole fed with or without a Balun.

like i said, errors in one area can obscure results in another area.

almost any damn thing will radiate and be tuneable.
a quick look at the antenna wall in the local truck stop will tell you that.

a proper dipole is resonant, given a balanced feed, and therefore does not
put significant signal onto the coax shield. /or it's fed with ladder line,
from a balun in your tuner/

Dave,
There is a big difference between the current flowing on
the inside of the shield of coax and any current flowing on
the outside of the shield. The current flowing on the inside
of the coax shield is the same current that flows in the
center conductor (not the same polarity/phase). Ideally, there
will be no current flowing on the outside of the coax shield,
but you very seldom ever run across the 'ideal' situation. The
current flowing on the outside of the shield is what makes the
feed line radiate.
'Doc

part 15 is radiated emissions testing for electronic equipment.
it's something you 'get', not something you 'take'
this one should be interesting, it's my first as an intentional emitter,
incorporating a bluetooth system with a compromise monopole antenna.

Not so. Some went out, some up, some down. That fireball that went out
the other side was miniscule compared to what that amount of fuel can do.

>
> you have to understand.....in order for 'them' to take your rights

Once in the air, almost anyone who has a basic knowledge of the controls and a couple gauges, can fly. I worked for a charter company as a ramp rat for a few years, and got to grab the yoke of a King Air 100 and 200 during post-maintenance check flights. Even in a smaller twin turboprop, keeping a level flight isnt that hard. And by the way the planes hit the buildings with course corrections right before impact, just shows theres a little terrorist in all of us. And those who did the flying, had recently learned the basics too.
The estimate was 1/3 of the fuel flashed on the outside, and the other 2/3 started the office materials burning. The impact plowed a lot of materials out the other side, just not hardly enough to keep the fires down. Estimates on the temps were around 1500 to 2000 degrees i believe.
As far as the "why", everyone has their own opinion on that, and i wont waste anyones time on it.

No, you said:

>in order to be a dipole, it has to be fed with two signals, 180
>degrees out of phase, and equal ampliude.

Be careful, your hurting your case, so by what you posted any antenna
can be a dipole if it meets the requirement of being fed two 180 out
of phase signals of equal amplitude?

>
>a proper dipole is resonant, given a balanced feed, and therefore does not
>put significant signal onto the coax shield. /or it's fed with ladder line,
>from a balun in your tuner/
>
>

So, we all use improper dipoles, big deal. They are still dipoles,
spend some time building and using them, in real on the air tests, not
in your lab. Balun manufacturers won't make claims of significant
signal gains.

I'll keep building my dipoles without a balun, fed with coax, and be
very happy with how well they work.

HI All,

My brother is interested in getting a 2 pack of Midland g-300's for us to use the GMRS band.

He said that an FCC license is required. Does anyone here know if the license covers all radios you own? For example if my brother and I were to use these, do we just need one license?

anyone know?

>monopole, with a counterpoise.

Wrong. The only requirements for a dipole are that it has max current in the center, and has two ends with max voltage but opposite polarity (hence the origination of the term 'DI-POLE'). The only way to do this is to locate the ends in polar opposition, and to use a frequency on which it is resonant (any multiple of 1/2 wavelength). As I said in another post, a dipole can be nothing more than a single wire fed at the center with coax and a gamma match. A dipole is therefore not necessarily a doublet, nor does it necessarily need to be fed from a balanced line or balun. In fact, a 1/4 wave vertical groundplane antenna is really a dipole -- the groundplane (or 'counterpoise') functions as one pole of a two pole (dipole) antenna. It meets all the criteria: the two ends are in polar opposition, it is resonant on a specific frequency (the length of the 1/4 wave vertical being calculated as half the length of a dipole), has max current at the center (the base of the vertical), and max voltage on the ends (the top of the vertical).

And BTW, a 'doublet' only means the antenna has two elements. That's all.

>if you significantly bend the wires, or re-arrainge them physically, then it

That's probably why it's also called a biconical dipole.

>it's got broader bandwidth, and is commonly used in part 15 testing for that
>reason. the discone is another very close relation, somewhere between the

>bicone, ground plane, and a feedhorn.

The discone is a non-resonant antenna that works nothing like a dipole.

>your two wires fed in the middle with coax, are not a dipole.
>the best name i can give it, is a monopole with counterpoise.

It's the same thing.

>throw it into mininec, and see if you get the same results as a properly
>constructed dipole.

By that definition, any dipole that doesn't behave like an ideal dipole can't be a dipole, including any dipole that doesn't exist in free space. Since there is no place on earth that is equivalent to free space, it is therefore -impossible- to build a "properly constructed" dipole!

>that's freeware, a little limited, but it can do simple antennas like
>dipoles with no problems.
>
>you've also got a lot of rf current on your shield, which is making the

>would it stop there.. there is one possibility, that your feedline is an odd
>number of quarter wavelengths long, so that this pont is high impedance. but
>that only works at particular frequencies.

That doesn't work at all. The point where the coax shield meets the antenna is a point of low impedance, and if the coax is an odd number of wavelengths long with the radio end RF grounded, the result is an detuned mess. And if the radio end -isn't- RF grounded, that's what puts RF in the shack and burns your lips. But that doesn't mean the antenna isn't a dipole -- it's just a dipole that has

been poorly implemented.

> in this case, it's still not a

Wrong again. A dipole is resonant with or without the feed line.

> and therefore does not
>put significant signal onto the coax shield. /or it's fed with ladder line,
>from a balun in your tuner/

Hit the books and look up "gamma match". Look up "dipole" while you are at it.

3940. Re: I need DIY plans for an antenna

Newsgroup: rec.radio.cb
Date: 2003-09-16 05:28:03 UTC
From: Alan Strawinski <rec.radio.cb@strawinski.net>
Message-ID: <Xns93F7E4946B6A3recradiocbstrawinski@216.168.3.44>
Source record: 165475

OK, I thought I'd weigh in on the discussion. I figure most folks here consider the ARRL handbook as a reliable source of information with regard to antennas. If not, then don't read any further :)

The following is from the 2002 edition:

On what makes a dipole a diplole:
"A fundamental form of antenna is a wire whose length is half the transmitting wavelength. It is the unit from which many more complex forms of antennas are constructed and is known as a dipole antenna". pg 20.4

Regarding Baluns:
"Therefore, it is better to eliminate feed-line radiation whenever possible, and a balun should be used at any transition between balanced and unbalnced systems. Even so, balanced or unbalanced systems without a balun often perform with no apparent problems." pg 20.5

More on Baluns:
"If a balanced antenna is fed at the center through a coaxal line without a balun, the inherent symmetry and balance is upset because one side of the radiator is connected to the shield while the other is connected to the inner conductor. On the side connected to the shield, current can be diverted from flowing into the antena, and instead can flow down the over the outside of the coaxial shield." pg 19.5

But there's a qualifying statement or two:
"This is a good point to say that striving for the perfect balance in line and antenna system is not always absolutely mandatory. For example, if a nonresonant center fed diole is fed with open-wire line and a tuner for multiband operation, the most desirable radiation battern for general purpose communication is actually an omnidirectional pattern. A certain ammount of feed-line radiation might actually help fill in otherwise undesirable nulls in the azimuthal pattern of the antenna itsef" pg 19.5

And one more:
"Purists may cry out in dismay, but there are many thousands of coaxial-fed dipoles in daily use worldwide that perform very effectively without a balun" pg 19.5

So, as far as I'm concerned a dipole as defined above is still a dipole regardless of whether is it fed with a balun or not. We also see that feedline radiation is not necessarily a bad thing. Having said that, it is clear to me that the use of a balun is certainly recommended in most cases, and should probably be used wherever possible. The lack of a balun should not deter one from using his dipole, even if's use is suggested.

If the ARRL handbook can be considered a trustworthy source, then this settles the argument. If it can't be, then the battle rages on :)

Source record: 165476

Dave,
And the idea of 'half' of a dipole as being a 'passive'
element. In which half of a signal's cycle is the shield
side of the dipole passive? The 'positive' or 'negative'
half cycle? And since current is still moving in the
'passive' half of the antenna, it's also still being
radiated. How does that fit in with your 'passive' element
description? If it radiates, it ain't 'passive'.
I can follow your thinking, but your thinking will lead
you into making very confusing statements as you've done.
Why not stick to the 'standard' or common way of describing
what you mean? It'll save a lot of confusion and bandwidth.
'Doc

One license is needed. This covers all radios you own and all persons in
your specific household. If your brother and you live at different
addresses, each of you would need to get your own license.

Mitch;
Sorry this thread has gotten out of hand. Dipoles are one of the
easiest antennas to build and get working. Plus its a lot of fun to
play with.

Here is a link that will help you calculate the length of the wires.

http://www.qsl.net/w4sat/calc.htm

How does that fit in with your 'passive' element
> description? If it radiates, it ain't 'passive'.

the passive elements on a yagi have current flow in them, and they are
indeed passive elements.
passive dosen't mean 'no current flow' in this context, it means not driven
from the feedline.

Stopped by the AKC.

tra1npuppet is such a bigmouth and a jerk, we just had to prove he was full of it. Post another amplifier for auction, tra1n...we will get it kicked off as well.

furthermore, a letter was sent to your ISP explaining that you are using your account to engage in illegal activity. See below.

--chuckle--

I predict keyclowns will yelp and sqwak now, giving their guesses as to who wrote this...as if anyone of the AKC hides who they are in the first place except exactly for making keyclowns think they are some kind of junior detectives.

PS
tra1n, please put up another amp auction. we did love busting that one so much.

TO: Abuse@Verizon.net
Hello

I draw your attention to the illegal activity that the verizon account holder tra1n@verizon.net is using his Verizon account to promote. The Federal laws against this activity are in the interest of public safety and public convenience. The item this individual is selling creates harmful interference to public safety and commercial radio communications. In these times of uncertainty about the possible sudden need for public service radio communications, surely Verizon does not condone an account holder purposely promoting their disruption.

The FCC regulations against this item have been in existence for more than 25 years, and I draw your attention to the relevant passages below. Prior to those passages is the link to the auction that is connected with the aforementioned Federal crime.

Please take appropriate action to cause this account holder not to use the internet and specifically Verizon to promote the sale of items that are clearly against federal law and are so insidiously disruptive of public service radio communications.

Sincerely,

Take a guess, tra1n

http://page.auctions.shopping.yahoo.com/auction/81722329?aucview=0x30

FCC rule 2.815(b): After APR 27, 1978, no person shall manufacture, sell or lease, offer for sale or lease (including advertising for sale or lease), or import, ship, or distribute for the purpose of selling or leasing or offering for sale or lease, any external radio frequency amplifier or amplifier kit capable of operation on any frequency or frequencies between 24 and 35 MHz.

RULE 11 - Linear Amplifiers
{A} You may not attach the following items (power amplifiers) to your type-accepted CB transmitter in any way:
[1] External radio frequency [RF] power amplifiers, also called linear amplifiers, or linears;
or
[2] Any other devices which, when used with a radio transmitter as a signal source, are capable of amplifying the signal.
{B} There are no exceptions to this rule and use of a power amplifier voids your authority to operate the station.
{C} The FCC will presume you have used a linear or other external [RF] power amplifier if-
[1] It is in your possession or on your premises; and
[2] There is OTHER EVIDENCE that you have operated your CB station with more power than allowed by CB Rule 10.

FCC rule 2.815(b): After APR 27, 1978, no person shall manufacture,
sell or lease, offer for sale or lease (including advertising for sale
or lease), or import, ship, or distribute for the purpose of selling
or leasing or offering for sale or lease, any external radio frequency
amplifier or amplifier kit capable of operation on any frequency or
frequencies between 24 and 35 MHz.

RULE 11 - Linear Amplifiers
{A} You may not attach the following items (power amplifiers) to your
type-accepted CB transmitter in any way:
[1] External radio frequency [RF] power amplifiers, also called linear
amplifiers, or linears;
or
[2] Any other devices which, when used with a radio transmitter as a
signal source, are capable of amplifying the signal.
{B} There are no exceptions to this rule and use of a power amplifier
voids your authority to operate the station.
{C} The FCC will presume you have used a linear or other external [RF]
power amplifier if-
[1] It is in your possession or on your premises; and
[2] There is OTHER EVIDENCE that you have operated your CB station
with more power than allowed by CB Rule 10.

Thank you sweet little femininists for being so trainable. It is so much fun to rat out auctions and then come here and let you know who did it.

It is always a pleasure to bust keyclowns, so keep posting auctions.

Also, keep ranting and insulting the AKC members. It is a great measure of success to see the big mouths on here running their soup coolers about us, we appreciate it.

Our fame is enhanced by your hatred. Thank you.

Signed,

AKC Command and Control Center.

Of course he's not joking, he's a troll.
This is what trolls do, change nics, change
accounts, harass, accuse, use foul, vulgar
language that's what a troll is.
George seems to think that everyone
is as simple minded as he. So he gets busted
using his AOL account again, with the exact
same foul language only he uses, then puts
up this little charade that it's someone else.
Now watch the attention turn towards me
now that Twist isn't posting as much.

Really? How much gain? If I have a dipole fed without a balun, how
much gain will I get when I add a balun to it?

Does it have to be a gain device to be able to call it an antenna
system?

You have already been given the definition of a dipole by several
people. If you prefer to call it something else, call it what ever
you want . It shouldn't take you more than a couple of weeks to
change all the text books and technical references to your definition
of a dipole.

If I have any questions on the correct way to build a dipole, I'll ask
Frank or Doc. They understand how to build them.

Any idea on what GMRS radio is better?

The Motorola 5920 (5mile range)
Midland G-300 (10mile range)

I've dealt with the motorolas before but never the midland, any idea on the midlands quality and clarity and stuff?

thanks.

If it has a small built in antenna, it will have the same range as
an FRS radio. Don't be fooled by the marketing claims, it's BS.

Screw that , Just use them NO PROBLEM
Nobody else get the license. Just like in the old days of CB, they finally
dropped the license idea after everyone had one. it ran out of controll.
Still does today. AMps, out of band,ect.

I hate to echo stewart, but .5 watts or 2 watts won't make any difference.
The only way to increase the range enough to phone home about, is to connect
to an external antenna that's up high.

If you climb up to the top of a tall building, you can talk 7 miles with
an FRS radio. I've done it. Can't on the ground, though.

Federal Communications Commission (FCC)

Part 95 - Subpart D - Rules for CB Service
Citizens Band (CB) Radio Service

General Provisions-

[RULE 1] Description
[RULE 2] Usage of Rules
[RULE 3] Who is Eligible
[RULE 4] Licenses
[RULE 5] Areas Of Legal Operation
[RULE 6] Special Restrictions
[RULE 7] Operating Channels/Frequencies
[RULE 8] Antenna Height
[RULE 9] Equipment
[RULE 10] Power Output
[RULE 11] Linear Amplifiers
[RULE 12] Permitted Communication
[RULE 13] Illegal Communication
[RULE 14] Paying for Actual Use
[RULE 15] Who Is Held Accountable
[RULE 16] Time Limit of Transmissions
[RULE 17] Identification Methods
[RULE 18] Emergency Usage and Assisting Travelers
[RULE 19] Remote Control Operations
[RULE 20] Telephone Patches and Telephony with CB
[RULE 21] Penalties
[RULE 22] Correspondence from FCC
[RULE 23] Notice of Interference
[RULE 24] Service to Transmitters and Antennas
[RULE 25] Modifications to Transmitters
[RULE 26] FCC Inspections
[RULE 27] Keeping Station Records
[RULE 28] Contacting the FCC

RULE 1 - Descriptions The Citizens Band Radio Service (CB) is a private, two-way, short-distance voice communications service for personal or business activities. The CB Radio Service may also be used for voice paging.
RULE 2 - Usage of Rules You must comply with these rules when you operate a station in the CB Service from:
{1} Within or over the territorial limits of places where radio services are regulated by the FCC.
{2} Aboard any vessel or aircraft registered in the United States or

{3} Aboard any unregistered vessel or aircraft owned or operated by a United States citizen or company.
Your CB must comply with Part 95/Subpart E [Technical Rules].
Where the rules use the word "you", "you" means a person operating a CB station. Where the rules use the word "person" the rules are concerned with an individual, a corporation, a partnership, an association, a joint stock company, a trust, a state, territorial or local government unit, or other legal entity. Where the rules use the term "CB station", that means a radio station transmitting in the CB Radio Service.
RULE 3 - Eligibility To Use CB You are authorized to operate a CB station unless:
{A} You are a foreign government, a representative of a foreign government, or a federal government agency.
or
{B} The FCC has issued a cease and desist order to you, and the order is still in effect.
RULE 4 - Licenses You do not need an individual license to operate a CB station. You are authorized by this rule to operate your CB station in accordance with the rules stated in this Subpart. (*also read Rule 17)
RULE 5 - Areas of Legal Operation You are authorized to operate your CB station from:
{A} Within or over any area of the world where radio services are regulated by the FCC. Those areas are:
[1] The 50 United States
[2] The District Of Columbia
[3] Commonwealth of Puerto Rico
[4] Navassa Island
[5] United States Virgin Islands, it's 50 islets and cays
[6] American Samoa
[7] Baker Island
[8] Commonwealth of Northern Mariana Islands
[9] Guam Island
[10] Howland Island
[11] Jarvis Islan
[12] Johnston Island
[13] Kingman Reef
[14] Midway Island
[15] Palmyra Island, and it's 50+ islets
[16] Wake Island
{B} Any area of the world, except, within the territorial limits of areas where radio services are regulated by -
[1] An agency of the United States other than the FCC, you are subject to it's rules.
[2] Any foreign government, you are subject to it's rules.
{C} An aircraft or ship, with the permission of the captain, within or over any area of the world where radio services are regulated by the FCC or upon or over international waters. You must operate your CB station according to any applicable treaty to which the United States

is a party.
RULE 6 - Special Restrictions
{A} If your CB station is located on premises controlled by the Department of Defense you may be required to comply with additional regulations imposed by the commanding officer of the installation.
{B} If your CB station will be constructed on land of environmental or historical importance (such as a location significant in American history, architecture or culture), you may be required to provide information to comply with Part 1.1305 through 1.1319 of the FCC Rules.
RULE 7 - Operating Channels/Frequencies Your CB station may transmit only on the following channels / frequencies:

Channel	Frequency	Channel	Frequency
1	26.965	21	27.215
2	26.975	22	27.225
3	26.985	23	27.255
4	27.005	24	27.235
5	27.015	25	27.245
6	27.025	26	27.265
7	27.035	27	27.275
8	27.055	28	27.285
9*	27.065	29	27.295
10	27.075	30	27.305
11	27.085	31	27.315
12	27.105	32	27.325
13	27.115	33	27.335
14	27.125	34	27.345
15	27.135	35	27.355
16	27.155	36	27.365
17	27.165	37	27.375
18	27.175	38	27.385
19	27.185	39	27.395
20	27.205	40	27.405

{B} * Channel 9 may be used ONLY for emergency communications OR for traveler assistance.
{C} You must, at all times and on ALL channels, give priority to emergency communication messages concerning the immediate safety of life or the immediate protection of property.
{D} You may use ANY channel for emergency communications or for traveler assistance.
{E} You must share each channel with other users.
{F} The FCC will not assign any channel for the private or exclusive use of any particular CB station or group of stations.
{G} The FCC will not assign any channel for the private or exclusive use of CB stations transmitting single sideband or AM.
RULE 8 - Antenna Height
{A} "Antenna" means the radiating system (for transmitting, receiving or both) and the structure holding it up (tower, pole or mast). It also means everything else attached to the radiating system and the

structure.
{B} If your antenna is mounted on a hand-held portable unit, none of the following limitations apply;
{C} If your antenna is installed at a fixed location (whether receiving, transmitting or both) it must comply with EITHER one of the following:
[1] The highest point must not be more than 20 feet (6.10 meters) higher than the highest point of the building or tree on which it is mounted;
or
[2] The highest point must not be more than 60 feet (18.3 meters) above the ground.
{D} If your CB station is located near an airport, and if your antenna structure is more than 20 feet (6.10 meters) high, you may have to obey additional restrictions. The highest point of your antenna must not exceed 39.37 inches (1 meter) above the airport elevation for every 109.36 yards (100 meters, 1 hectometer) of distance from the nearest point of the nearest airport runway. Differences in ground elevation between your antenna and the airport runway may complicate this formula. If your CB station is near an airport, you may contact the nearest FCC field office for a worksheet to help you figure the maximum allowable height for your antenna.
WARNING: Installation and removal of CB station antennas near powerlines is dangerous. For your safety follow the installation directions included with your antenna.
RULE 9 - Equipment
{A} You must use an FCC type accepted CB transmitter at your CB station. You can identify an FCC type accepted transmitter by the 'type acceptance'label placed on it by the manufacturer. You may examine a list of type-accepted equipment at any FCC Field Office or at FCC Headquarters. Use of a transmitter which is not FCC type-accepted voids your authority to operate the station.
{B} You must not make, or have made, any internal modifications to a type-accepted CB transmitter. (*read Rule 25) Any internal modification to a type-accepted CB transmitter cancels the type-acceptance, and use of such a transmitter voids your authority to operate the station.
RULE 10 - Power Output
{A} Your CB station transmitter power output must not exceed the following values under any conditions:
AM [Amplitude Modulation] - 4 watts carrier power [CP]
SSB [Single Side-Band] - 12 watts peak envelope power [PEP]
{B} If you need more information about the power rule, see Part 95/ Subpart E.
{C} Use of a transmitter which has carrier [CP] or peak envelope power [PEP]in excess of that authorized voids your authority to operate the station.
RULE 11 - Linear Amplifiers
{A} You may not attach the following items (power amplifiers) to your type-accepted CB transmitter in any way:

[1] External radio frequency [RF] power amplifiers, also called linear amplifiers, or linears;
or
[2] Any other devices which, when used with a radio transmitter as a signal source, are capable of amplifying the signal.
{B} There are no exceptions to this rule and use of a power amplifier voids your authority to operate the station.
{C} The FCC will presume you have used a linear or other external [RF] power amplifier if-
[1] It is in your possession or on your premises; and
[2] There is OTHER EVIDENCE that you have operated your CB station with more power than allowed by CB Rule 10.
{D} Paragraph C above in this section does not apply if you hold a license in another radio service (HAM, etc.) which allows you to operate an external RF power amplifier.
RULE 12 - Permitted Communications {A} You may use your CB station to transmit two-way plain language communications. Two-way plain language communications are communications without codes or coded messages. Operating signals such as "ten codes" (10-4, etc.) are not considered codes or coded messages. You may transmit two-way plain language communications only to other CB stations, to units of your own CB station, or to authorized government stations on CB frequencies about-
[1] Your personal or business activities, or those of members of your immediate family living in your household;
[2] Emergencies;
[3] Traveler assistance;
[4] Civil Defense activities in connection with official tests or drills conducted by, or actual emergencies announced by, the Civil Defense Agency with authority over the area in which your station is located.
{B} You may use your CB station to transmit a TONE SIGNAL only when the signal is used to make contact, or to continue communications (Examples: tone operated squelch, selective calling circuits). If the signal is an audible tone, it must last no longer than 15 seconds at one time. If the signal is a subaudible tone, it may be transmitted continuously only as long as you are talking.
{C} You may use your CB station to transmit one-way communications (messages not intended for two or more CB stations) only for emergency communications, traveler assistance, brief tests (radio checks) or voice paging.
RULE 13 - Illegal Communications {A} You must NOT use a CB station-
[1] in connection with activity which is against federal, state or local law;
[2] to transmit obscene, indecent or profane words, language or meaning;
[3] to interfere intentionally with the communications of another CB station;
[4] to transmit one-way communications, EXCEPT for emergency communications, traveler assistance, brief tests (radio checks) or voice paging;

[5] to advertise or solicit the sale of any goods or services;
[6] to transmit music, whistling, sound effects or any material to amuse or entertain;
[7] to transmit any sound effect solely to attract attention;
[8] to transmit the word "MAYDAY" or use any other international distress signal, EXCEPT when your station is located in a ship, aircraft or other vehicle which is threatened with GRAVE AND IMMINENT danger and you are requesting IMMEDIATE assistance.
[9] to communicate with, or ATTEMPT to communicate with, any CB station more than 155.3 miles (250 kilometers) away;
[10] to advertise a political candidate or political campaign (You may use your CB radio for the business or organizational aspects of a campaign, if you follow all other applicable rules);
[11] to communicate with stations in other countries, except stations in Canada (on General Radio Service).
[12] to transmit a false or deceptive communication.
{B} You must not use a CB station to transmit communications intended for live or delayed rebroadcast on radio or television. You may use your CB station to gather news items or to prepare programs.
RULE 14 - Paying for Actual Use {A} You may not accept direct or indirect payment for transmitting with a CB station.
{B} You may use a CB station to help you provide a service, and be paid for that service, as long as you are paid only for the service and not for the actual use of the CB station.
RULE 15 - Who Is Held Accountable You are responsible for all communications which are made BY YOU from a CB station.
RULE 16 - Time Limit of Transmissions {A} You must limit your CB communications to the minimum practical time.
{B} If you are communicating with another CB station or stations, you, and the stations communicating with you, must limit each of your conversations to no more than five (5) continuous minutes.
{C} At the end of your conversation, you, and the stations communicating with you, must not transmit again for at least one minute.
RULE 17 - Identification Methods {A} You need NOT identify your CB communications...
{B} You are ENCOURAGED to identify your CB communications by any of the following means:
[1] Previously assigned FCC CB call sign
[2] K prefix followed by operators initials and residence zip code
[3] Your name;
or
[4] Description of your organization including name and any applicable operator unit number
{C} You are encouraged to use a "handle" (nickname) ONLY IN CONJUNCTION WITH the methods of identification listed above in paragraph B of this section.
RULE 18 - Emergency Usage and Assisting Travelers {A} You must at all times and on all channels, give priority to emergency communications.
{B} When you are directly participating in emergency communications,

you do not have to comply with Rule 16 about length of transmissions. You must obey all other rules.
{C} You may use your CB station for communications necessary to assist a traveler to REACH A DESTINATION or to RECEIVE NECESSARY SERVICES. When you are using your CB station to assist a traveler, you do not have to obey Rule 16 about the length of transmissions. You must obey all other rules.
RULE 19 - Remote Control Operations {A} You MAY NOT operate a CB station transmitter by RADIO remote control.
{B} You MAY operate a CB transmitter by WIRELINE remote control IF you obtain specific approval in writing from the FCC. To obtain FCC approval you must show why you need to operate your station by wireline remote control. Send your request and justification to: FCC, Gettysburg, PA 17325.
If you receive FCC approval, you must keep the approval as part of your station records (read Rule 27 on station records).
RULE 20 - Telephone Patches and Telephony with CB {A} You MAY connect your CB station transmitter to a telephone if you comply with ALL of the following:
[1] You or someone else must be present at your CB station and MUST-
(i) manually make the connection (the connection cannot be made by remote control);
(ii) supervise the operation of the transmitter during the connection;
(iii) listen to each communication during the connection; and
(iv) stop all communications if there are operations in violation of these rules.
[2] Each communication during the telephone connection must comply with all of these rules.
[3] You must obey any restriction that the telephone company places on the connection of a CB transmitter to a telephone.
{B} The CB transmitter you connect to a telephone must not be shared with any other CB station.
{C} If you connect your CB transmitter to a telephone, you must use a phone patch device which has been registered with the FCC.
RULE 21 - Penalties may not be current penalty information. {A} If the FCC finds that you have WILLFULLY or REPEATEDLY violated the Communications Act or FCC Rules, you may have to pay as much as $2,000 for each violation, up to a total of $5,000.
{B} If the FCC finds that you have violated any section of the Communications Act or FCC Rules, you may be ordered to stop whatever action caused the violation.
{C} If a federal court finds that you have WILLFULLY and KNOWINGLY violated any FCC Rule, you may be fined up to $500 for each day you committed the violation.
{D} If a federal court finds that you have WILLFULLY and KNOWINGLY violated any provision of the Communications Act, you may be fined up to $10,000 or may be imprisoned for one year, or both.
RULE 22 - Correspondence from FCC {A} If it appears to the FCC that you have violated the Communications Act or these rules, the FCC may send you a discrepancy notice.

{B} Within the time period stated in the notice, you must answer with:
[1] A complete written statement about the apparent discrepancy;
[2] A complete written statement about any action you have taken to correct the apparent violation and to prevent it from happening again; and
[3] The name of the person operating at the time of the apparent violation.
{C} If the FCC sends you a letter asking you questions about your CB radio station or its operation, you must answer each of the questions with a complete written statement within the time period stated in the letter.
{D} You must not shorten your answer by references to other communications or notices.
{E} You must send your answer to the FCC office which sent you the notice.
{F} You must keep a copy of your answer in your station records.
RULE 23 - Notice of Interference {A} If the FCC tells you that your CB station is causing interference due to technical reasons, you must follow all instructions in the official FCC notice (This notice may require you to have technical adjustments made to your equipment).
{B} You must comply with any restricted hours of CB station operation which may be included in the official notice.

RULE 24 - Service to Transmitters and Antennas {A} You may adjust an antenna to your CB transmitter and you may make radio checks (One-way transmissions for a short time in order to test the transmitter).
{B} Each internal repair and each internal adjustment to your FCC type-accepted CB transmitter must be made BY or under the DIRECT SUPERVISION of a person licensed by the FCC as a GENERAL RADIOTELEPHONE OPERATOR.
{C} Except as provided in paragraph D below in this section, each internal repair and each internal adjustment of a CB transmitter in which signals are transmitted must be made using a NON-RADIATING antenna (Dummy Load).
{D} Brief test signals (signals not longer than one minute during any five minute period) using a radiating antenna may be transmitted in order to:
[1] adjust an antenna to a transmitter;
[2] detect or measure radiation of energy other than the intended signal;
or
[3] tune a receiver to your CB transmitter.
RULE 25 - Modifications to Transmitters {A} You must not make or have any one else make any internal modification to your CB transmitter.
{B} Internal modification does NOT include:
[1] Repair, or servicing of a CB station transmitter; or
[2] Changing plug-in modules which were type-accepted as part of your CB transmitter
{C} You must not operate a CB transmitter which has been modified by anyone in any way, including modification to operate on unauthorized

frequencies or with illegal power.
RULE 26 - FCC Inspections {A} If an authorized FCC representative requests to inspect your CB station, you must make your CB station and records available for inspection.
{B} A CB station includes all of the radio equipment you use.
RULE 27 - Keeping Station Records Your station records include the following documents, as applicable: [1] A copy of each response to an FCC violation notice or an FCC letter.
[2] Each written permission received from the FCC.
RULE 28 - Contacting the FCC {A} Write to your nearest FCC Field Office to: [1] Report an interference complaint; or [2] want to know if the FCC has type-accepted a particular transmitter for CB service.
{B} Write to the FCC if you have questions about the CB Rules: FCC Private Radio Bureau Personal Radio Branch Washington, DC 20554

Federal Communications Commission (FCC)

Part 95 - Subpart D - Rules for CB Service
Citizens Band (CB) Radio Service

General Provisions-

[RULE 1] Description
[RULE 2] Usage of Rules
[RULE 3] Who is Eligible
[RULE 4] Licenses
[RULE 5] Areas Of Legal Operation
[RULE 6] Special Restrictions
[RULE 7] Operating Channels/Frequencies
[RULE 8] Antenna Height
[RULE 9] Equipment
[RULE 10] Power Output
[RULE 11] Linear Amplifiers
[RULE 12] Permitted Communication
[RULE 13] Illegal Communication
[RULE 14] Paying for Actual Use
[RULE 15] Who Is Held Accountable
[RULE 16] Time Limit of Transmissions
[RULE 17] Identification Methods
[RULE 18] Emergency Usage and Assisting Travelers
[RULE 19] Remote Control Operations
[RULE 20] Telephone Patches and Telephony with CB
[RULE 21] Penalties
[RULE 22] Correspondence from FCC
[RULE 23] Notice of Interference
[RULE 24] Service to Transmitters and Antennas
[RULE 25] Modifications to Transmitters
[RULE 26] FCC Inspections
[RULE 27] Keeping Station Records
[RULE 28] Contacting the FCC

RULE 1 - Descriptions The Citizens Band Radio Service (CB) is a private, two-way, short-distance voice communications service for personal or business activities. The CB Radio Service may also be used for voice paging.
RULE 2 - Usage of Rules You must comply with these rules when you operate a station in the CB Service from:
{1} Within or over the territorial limits of places where radio services are regulated by the FCC.
{2} Aboard any vessel or aircraft registered in the United States or

{3} Aboard any unregistered vessel or aircraft owned or operated by a United States citizen or company.
Your CB must comply with Part 95/Subpart E [Technical Rules].
Where the rules use the word "you", "you" means a person operating a CB station. Where the rules use the word "person" the rules are concerned with an individual, a corporation, a partnership, an association, a joint stock company, a trust, a state, territorial or local government unit, or other legal entity. Where the rules use the term "CB station", that means a radio station transmitting in the CB Radio Service.
RULE 3 - Eligibility To Use CB You are authorized to operate a CB station unless:
{A} You are a foreign government, a representative of a foreign government, or a federal government agency.
or
{B} The FCC has issued a cease and desist order to you, and the order is still in effect.
RULE 4 - Licenses You do not need an individual license to operate a CB station. You are authorized by this rule to operate your CB station in accordance with the rules stated in this Subpart. (*also read Rule 17)
RULE 5 - Areas of Legal Operation You are authorized to operate your CB station from:
{A} Within or over any area of the world where radio services are regulated by the FCC. Those areas are:
[1] The 50 United States
[2] The District Of Columbia
[3] Commonwealth of Puerto Rico
[4] Navassa Island
[5] United States Virgin Islands, it's 50 islets and cays
[6] American Samoa
[7] Baker Island
[8] Commonwealth of Northern Mariana Islands
[9] Guam Island
[10] Howland Island
[11] Jarvis Islan
[12] Johnston Island
[13] Kingman Reef
[14] Midway Island
[15] Palmyra Island, and it's 50+ islets
[16] Wake Island
{B} Any area of the world, except, within the territorial limits of areas where radio services are regulated by -
[1] An agency of the United States other than the FCC, you are subject to it's rules.
[2] Any foreign government, you are subject to it's rules.
{C} An aircraft or ship, with the permission of the captain, within or over any area of the world where radio services are regulated by the FCC or upon or over international waters. You must operate your CB station according to any applicable treaty to which the United States

is a party.
RULE 6 - Special Restrictions
{A} If your CB station is located on premises controlled by the Department of Defense you may be required to comply with additional regulations imposed by the commanding officer of the installation.
{B} If your CB station will be constructed on land of environmental or historical importance (such as a location significant in American history, architecture or culture), you may be required to provide information to comply with Part 1.1305 through 1.1319 of the FCC Rules.
RULE 7 - Operating Channels/Frequencies Your CB station may transmit only on the following channels / frequencies:

Channel	Frequency	Channel	Frequency
1	26.965	21	27.215
2	26.975	22	27.225
3	26.985	23	27.255
4	27.005	24	27.235
5	27.015	25	27.245
6	27.025	26	27.265
7	27.035	27	27.275
8	27.055	28	27.285
9*	27.065	29	27.295
10	27.075	30	27.305
11	27.085	31	27.315
12	27.105	32	27.325
13	27.115	33	27.335
14	27.125	34	27.345
15	27.135	35	27.355
16	27.155	36	27.365
17	27.165	37	27.375
18	27.175	38	27.385
19	27.185	39	27.395
20	27.205	40	27.405

{B} * Channel 9 may be used ONLY for emergency communications OR for traveler assistance.
{C} You must, at all times and on ALL channels, give priority to emergency communication messages concerning the immediate safety of life or the immediate protection of property.
{D} You may use ANY channel for emergency communications or for traveler assistance.
{E} You must share each channel with other users.
{F} The FCC will not assign any channel for the private or exclusive use of any particular CB station or group of stations.
{G} The FCC will not assign any channel for the private or exclusive use of CB stations transmitting single sideband or AM.
RULE 8 - Antenna Height
{A} "Antenna" means the radiating system (for transmitting, receiving or both) and the structure holding it up (tower, pole or mast). It also means everything else attached to the radiating system and the

structure.
{B} If your antenna is mounted on a hand-held portable unit, none of the following limitations apply;
{C} If your antenna is installed at a fixed location (whether receiving, transmitting or both) it must comply with EITHER one of the following:
[1] The highest point must not be more than 20 feet (6.10 meters) higher than the highest point of the building or tree on which it is mounted;
or
[2] The highest point must not be more than 60 feet (18.3 meters) above the ground.
{D} If your CB station is located near an airport, and if your antenna structure is more than 20 feet (6.10 meters) high, you may have to obey additional restrictions. The highest point of your antenna must not exceed 39.37 inches (1 meter) above the airport elevation for every 109.36 yards (100 meters, 1 hectometer) of distance from the nearest point of the nearest airport runway. Differences in ground elevation between your antenna and the airport runway may complicate this formula. If your CB station is near an airport, you may contact the nearest FCC field office for a worksheet to help you figure the maximum allowable height for your antenna.
WARNING: Installation and removal of CB station antennas near powerlines is dangerous. For your safety follow the installation directions included with your antenna.
RULE 9 - Equipment
{A} You must use an FCC type accepted CB transmitter at your CB station. You can identify an FCC type accepted transmitter by the 'type acceptance'label placed on it by the manufacturer. You may examine a list of type-accepted equipment at any FCC Field Office or at FCC Headquarters. Use of a transmitter which is not FCC type-accepted voids your authority to operate the station.
{B} You must not make, or have made, any internal modifications to a type-accepted CB transmitter. (*read Rule 25) Any internal modification to a type-accepted CB transmitter cancels the type-acceptance, and use of such a transmitter voids your authority to operate the station.
RULE 10 - Power Output
{A} Your CB station transmitter power output must not exceed the following values under any conditions:
AM [Amplitude Modulation] - 4 watts carrier power [CP]
SSB [Single Side-Band] - 12 watts peak envelope power [PEP]
{B} If you need more information about the power rule, see Part 95/ Subpart E.
{C} Use of a transmitter which has carrier [CP] or peak envelope power [PEP]in excess of that authorized voids your authority to operate the station.
RULE 11 - Linear Amplifiers
{A} You may not attach the following items (power amplifiers) to your type-accepted CB transmitter in any way:

[1] External radio frequency [RF] power amplifiers, also called linear amplifiers, or linears;
or
[2] Any other devices which, when used with a radio transmitter as a signal source, are capable of amplifying the signal.
{B} There are no exceptions to this rule and use of a power amplifier voids your authority to operate the station.
{C} The FCC will presume you have used a linear or other external [RF] power amplifier if-
[1] It is in your possession or on your premises; and
[2] There is OTHER EVIDENCE that you have operated your CB station with more power than allowed by CB Rule 10.
{D} Paragraph C above in this section does not apply if you hold a license in another radio service (HAM, etc.) which allows you to operate an external RF power amplifier.
RULE 12 - Permitted Communications {A} You may use your CB station to transmit two-way plain language communications. Two-way plain language communications are communications without codes or coded messages. Operating signals such as "ten codes" (10-4, etc.) are not considered codes or coded messages. You may transmit two-way plain language communications only to other CB stations, to units of your own CB station, or to authorized government stations on CB frequencies about-
[1] Your personal or business activities, or those of members of your immediate family living in your household;
[2] Emergencies;
[3] Traveler assistance;
[4] Civil Defense activities in connection with official tests or drills conducted by, or actual emergencies announced by, the Civil Defense Agency with authority over the area in which your station is located.
{B} You may use your CB station to transmit a TONE SIGNAL only when the signal is used to make contact, or to continue communications (Examples: tone operated squelch, selective calling circuits). If the signal is an audible tone, it must last no longer than 15 seconds at one time. If the signal is a subaudible tone, it may be transmitted continuously only as long as you are talking.
{C} You may use your CB station to transmit one-way communications (messages not intended for two or more CB stations) only for emergency communications, traveler assistance, brief tests (radio checks) or voice paging.
RULE 13 - Illegal Communications {A} You must NOT use a CB station-
[1] in connection with activity which is against federal, state or local law;
[2] to transmit obscene, indecent or profane words, language or meaning;
[3] to interfere intentionally with the communications of another CB station;
[4] to transmit one-way communications, EXCEPT for emergency communications, traveler assistance, brief tests (radio checks) or voice paging;

[5] to advertise or solicit the sale of any goods or services;
[6] to transmit music, whistling, sound effects or any material to amuse or entertain;
[7] to transmit any sound effect solely to attract attention;
[8] to transmit the word "MAYDAY" or use any other international distress signal, EXCEPT when your station is located in a ship, aircraft or other vehicle which is threatened with GRAVE AND IMMINENT danger and you are requesting IMMEDIATE assistance.
[9] to communicate with, or ATTEMPT to communicate with, any CB station more than 155.3 miles (250 kilometers) away;
[10] to advertise a political candidate or political campaign (You may use your CB radio for the business or organizational aspects of a campaign, if you follow all other applicable rules);
[11] to communicate with stations in other countries, except stations in Canada (on General Radio Service).
[12] to transmit a false or deceptive communication.
{B} You must not use a CB station to transmit communications intended for live or delayed rebroadcast on radio or television. You may use your CB station to gather news items or to prepare programs.
RULE 14 - Paying for Actual Use {A} You may not accept direct or indirect payment for transmitting with a CB station.
{B} You may use a CB station to help you provide a service, and be paid for that service, as long as you are paid only for the service and not for the actual use of the CB station.
RULE 15 - Who Is Held Accountable You are responsible for all communications which are made BY YOU from a CB station.
RULE 16 - Time Limit of Transmissions {A} You must limit your CB communications to the minimum practical time.
{B} If you are communicating with another CB station or stations, you, and the stations communicating with you, must limit each of your conversations to no more than five (5) continuous minutes.
{C} At the end of your conversation, you, and the stations communicating with you, must not transmit again for at least one minute.
RULE 17 - Identification Methods {A} You need NOT identify your CB communications...
{B} You are ENCOURAGED to identify your CB communications by any of the following means:
[1] Previously assigned FCC CB call sign
[2] K prefix followed by operators initials and residence zip code
[3] Your name;
or
[4] Description of your organization including name and any applicable operator unit number
{C} You are encouraged to use a "handle" (nickname) ONLY IN CONJUNCTION WITH the methods of identification listed above in paragraph B of this section.
RULE 18 - Emergency Usage and Assisting Travelers {A} You must at all times and on all channels, give priority to emergency communications.
{B} When you are directly participating in emergency communications,

you do not have to comply with Rule 16 about length of transmissions. You must obey all other rules.
{C} You may use your CB station for communications necessary to assist a traveler to REACH A DESTINATION or to RECEIVE NECESSARY SERVICES. When you are using your CB station to assist a traveler, you do not have to obey Rule 16 about the length of transmissions. You must obey all other rules.
RULE 19 - Remote Control Operations {A} You MAY NOT operate a CB station transmitter by RADIO remote control.
{B} You MAY operate a CB transmitter by WIRELINE remote control IF you obtain specific approval in writing from the FCC. To obtain FCC approval you must show why you need to operate your station by wireline remote control. Send your request and justification to: FCC, Gettysburg, PA 17325.
If you receive FCC approval, you must keep the approval as part of your station records (read Rule 27 on station records).
RULE 20 - Telephone Patches and Telephony with CB {A} You MAY connect your CB station transmitter to a telephone if you comply with ALL of the following:
[1] You or someone else must be present at your CB station and MUST-
(i) manually make the connection (the connection cannot be made by remote control);
(ii) supervise the operation of the transmitter during the connection;
(iii) listen to each communication during the connection; and
(iv) stop all communications if there are operations in violation of these rules.
[2] Each communication during the telephone connection must comply with all of these rules.
[3] You must obey any restriction that the telephone company places on the connection of a CB transmitter to a telephone.
{B} The CB transmitter you connect to a telephone must not be shared with any other CB station.
{C} If you connect your CB transmitter to a telephone, you must use a phone patch device which has been registered with the FCC.
RULE 21 - Penalties may not be current penalty information. {A} If the FCC finds that you have WILLFULLY or REPEATEDLY violated the Communications Act or FCC Rules, you may have to pay as much as $2,000 for each violation, up to a total of $5,000.
{B} If the FCC finds that you have violated any section of the Communications Act or FCC Rules, you may be ordered to stop whatever action caused the violation.
{C} If a federal court finds that you have WILLFULLY and KNOWINGLY violated any FCC Rule, you may be fined up to $500 for each day you committed the violation.
{D} If a federal court finds that you have WILLFULLY and KNOWINGLY violated any provision of the Communications Act, you may be fined up to $10,000 or may be imprisoned for one year, or both.
RULE 22 - Correspondence from FCC {A} If it appears to the FCC that you have violated the Communications Act or these rules, the FCC may send you a discrepancy notice.

{B} Within the time period stated in the notice, you must answer with:
[1] A complete written statement about the apparent discrepancy;
[2] A complete written statement about any action you have taken to correct the apparent violation and to prevent it from happening again; and
[3] The name of the person operating at the time of the apparent violation.
{C} If the FCC sends you a letter asking you questions about your CB radio station or its operation, you must answer each of the questions with a complete written statement within the time period stated in the letter.
{D} You must not shorten your answer by references to other communications or notices.
{E} You must send your answer to the FCC office which sent you the notice.
{F} You must keep a copy of your answer in your station records.
RULE 23 - Notice of Interference {A} If the FCC tells you that your CB station is causing interference due to technical reasons, you must follow all instructions in the official FCC notice (This notice may require you to have technical adjustments made to your equipment).
{B} You must comply with any restricted hours of CB station operation which may be included in the official notice.

RULE 24 - Service to Transmitters and Antennas {A} You may adjust an antenna to your CB transmitter and you may make radio checks (One-way transmissions for a short time in order to test the transmitter).
{B} Each internal repair and each internal adjustment to your FCC type-accepted CB transmitter must be made BY or under the DIRECT SUPERVISION of a person licensed by the FCC as a GENERAL RADIOTELEPHONE OPERATOR.
{C} Except as provided in paragraph D below in this section, each internal repair and each internal adjustment of a CB transmitter in which signals are transmitted must be made using a NON-RADIATING antenna (Dummy Load).
{D} Brief test signals (signals not longer than one minute during any five minute period) using a radiating antenna may be transmitted in order to:
[1] adjust an antenna to a transmitter;
[2] detect or measure radiation of energy other than the intended signal;
or
[3] tune a receiver to your CB transmitter.
RULE 25 - Modifications to Transmitters {A} You must not make or have any one else make any internal modification to your CB transmitter.
{B} Internal modification does NOT include:
[1] Repair, or servicing of a CB station transmitter; or
[2] Changing plug-in modules which were type-accepted as part of your CB transmitter
{C} You must not operate a CB transmitter which has been modified by anyone in any way, including modification to operate on unauthorized

frequencies or with illegal power.
RULE 26 - FCC Inspections {A} If an authorized FCC representative requests to inspect your CB station, you must make your CB station and records available for inspection.
{B} A CB station includes all of the radio equipment you use.
RULE 27 - Keeping Station Records Your station records include the following documents, as applicable: [1] A copy of each response to an FCC violation notice or an FCC letter.
[2] Each written permission received from the FCC.
RULE 28 - Contacting the FCC {A} Write to your nearest FCC Field Office to: [1] Report an interference complaint; or [2] want to know if the FCC has type-accepted a particular transmitter for CB service.
{B} Write to the FCC if you have questions about the CB Rules: FCC Private Radio Bureau Personal Radio Branch Washington, DC 20554

3967. Re: I need DIY plans for an antenna

Newsgroup: rec.radio.cb
Date: 2003-09-16 19:03:34 UTC
From: 'Doc <w5lz@cwis.net>
Message-ID: <3F675E86.82F38A6D@cwis.net>
Source record: 165501

Dave,
----snipped--------
> passive dosen't mean 'no current flow' in this context, it means not driven
> from the feedline.
>

And the 'passive' element of a dipole antenna ~isn't~ fed
from the feed line? Confusing'er and confusing'er. I thought
both 'halves' of a dipole were fed by the feed line, certainly
every one that I've made, or seen have been.

----snipped---------
>
> i didn't coin the term 'passive element'

No, I'm aware of that. But are you the one who 'minted' the
"two signal" way of looking at a single signal? Like some other
types of esoteric thinking you have to be very careful where
they
are applied, and how. If you aren't careful, they deteriorate
into nonsense as has happened here. If how you think about a
dipole antenna helps you with what you're doing, then fine, have
at it. That doesn't make it 'correct' or the 'right' way of
doing
things, though, and it is very confusing to someone who isn't
familiar with that particular 'theory' of operation. If you
want to
call a dipole by another name, that's fine too. But it don't
make
it so. Aunt Martha wasn't born with wheels, so she really isn't
a Buick... no matter what she thinks.
'Doc

3968. Re: Any idea on what is better?

Newsgroup: rec.radio.cb

Paul,
Range claims are worthless without knowing the technical specifications of the radio and the type/location of the antenna. It isn't so much the power output of the radio that determines range, it's the antenna and where it's located. As with any 'line of sight' radio, antenna height is everything. If you stood on the same spot each time, there probably isn't any difference in range for either brand of radio.
As to quality/clarity of signal, I have no idea. I haven't dealt with Midland, or Motorola GMRS radios. Probably the only major difference is in the 'bells-n-whistles'. Both companys have been in the VHF/UHF 'bid-nez' long enough to get their acts together.
'Doc

3969. Re: NICE RADIO FOR SELL

Newsgroup: rec.radio.cb

I think it was the turnip truck I fell off of.
The word "SELL" was just part of the joke. Just a little humor.

3970. Re: I need DIY plans for an antenna

>>
>> The discone is a non-resonant antenna that works nothing like a dipole.
>
>true, but it's a simple physical evolution from the bi-cone to the discone.

Not even close. The bottom half of both may be a cone, but that's where the
similarities end. The cone of a discone has a length that is significantly
greater than 1/4 wavelength of the lowest frequency (remembering that it is a
broadband antenna), and is usually connected to the shield of the coax. The disc
is connected to the center conductor and, by all laws of physics, shouldn't even
work. Not only that, but the discone is a terrible radiator, being one of the
few exceptions to the rule that antennas are reciprocal. The current theory is
that the antenna works only with the E field, the cone being a reflector and the
disc being a capacitive detector. Support for this theory comes from the fact
that all attempts to make an upside-down discone (shield on the disc) have
failed.

Now that is a far cry from being a "simple physical evolution".

>the point was to illustrate that simple changes cause significant changes.

Sometimes yes, sometimes no. The change being discussed, using a dipole with an
unbalanced feed, will not alter the fundamental principle behind the dipole. It
still functions as a dipole -- just not like the 'ideal' dipole. But then, as I
pointed out before, what 'real' dipole behaves like the 'ideal' dipole?

>> >a proper dipole is resonant, given a balanced feed,
>>

>> Wrong again. A dipole is resonant with or without the feed line.

> from the feed line? Confusing'er and confusing'er.

i've been maintaining that a properly implemented dipole does not have a
passive element.
both halves should be driven. in the case where it's fed directly with
coax, it isn't clear to me wether the shield connected element is getting
current from the inside of the shield, or by illumination from the center
connected element. i suspect both are true, to some degree.
certainly the rf on the feedline now couples into the system, and makes
things even fuzzier.

> I thought both 'halves' of a dipole were fed by the feed line, certainly

> "two signal" way of looking at a single signal? Like some other
> types of esoteric thinking you have to be very careful where
> they
> are applied, and how.

i wasn't as clear as i intended to be.
you can view the output of a balun as two out of phase signals, at half the
input power, or a single balanced signal. i wasn't sure if the fellow i was
talking to at that point, knew what you get at the output of a balun.

If you aren't careful, they deteriorate

> make

> it so.

no, the point i was making is that a dipole, is designed to be fed from a balanced source, and it does make a difference. the magnitude of the difference, in gain, radiation, and rf on the feedline /when feeding it unbalanced/ is debatable.

maybe by purist definition, but putting the second element at a significant
distance makes it more an independent antenna, than part of a system with
the first one.
also, placing them very close together and in parallel would make them
essentially one element.

That may have been and still may be the case; however, one only has to look at the music industry. They sued some of the file-swapping networks and others appeared. Finally, they started whacking the users. The whacks given to the college students were likely not far out of line the whacks the FCC may (or may not) start leveling at folks running improperly operating/unlicensed/whatever. Perhaps and perhaps not. I wouldn't bet a nickel either way, let alone 17 grand :)

Yeah, that was that Dave Vanhorn fellow you were talking to. I don't
think he quite understands what a balun is or what it does.

3982. AKC keeps Twithed OFF of NG 4 days running

See how Twithed runs and hides from the anti boys. Too bad too. Cuz we kind of miss him and wish he'd go into one of his famous rants where he blames Leland [who has never lifted a finger against him or anyone] for all his troubles. It's so funny. But really the best thing for the newsgroup would be NO Twithed EVER again, and we are working on that, it's just a matter of time.

Not necessarily. Sometimes a doublet is used for direction-finding by using the
phase relationship between the two elements while they are a significant
distance apart. In that case, "wider is better". And just for the sake of
discussion, a pair of TV 'rabbit ears' is considered a doublet. Even though it
uses balanced transmission line, it is not a dipole because it doesn't function
as a dipole.

>also, placing them very close together and in parallel would make them
>essentially one element.

Not even that -- they would no longer be elements of an antenna, but two
conductors of a transmission line.

If you are saying that a balanced load should be fed from a balanced source,
I'll buy that. But don't forget that a dipole doesn't necessarily need to be
balanced. It's just as easy, if not easier, to shift the feedpoint (gamma match)
as it is to wind a balun.

> the magnitude of the
>difference, in gain, radiation, and rf on the feedline /when feeding it
>unbalanced/ is debatable.

I dunno... I've pegged my FSM more than a few times holding it next to a coax.
But that may not be such a bad thing if you want some vertical polarity while
using a horizontal dipole.

Try following back to this thread...

Cool Breeze wrote in message <4ZGdndbPb5-grdmiXTWJkg@comcast.com>...
> tell him he is killfiled

>No proof of anything you say as usual.

I have now posted proof of your forge, your desire to cause upset in the
newsgroup, and the "killfile" message.

Where is the proof of your claims...
1. Prove that I made "anti-legal" posts to this group.
2. Prove that I have called you "WA3MOJ ".
3. Prove that I posted 5 replies to the one message where you made that
claim.
4. Prove that I "follow George around"... show the groups I follow him to.
5. Prove that I am a "Brummy".

Failure to provide proof of your claims could only mean one thing... you are
a lying hypocrite.
So, which is it to be... proof, or acceptance of what you are?

>I never said that

Do you deny using the word "enamored "?

> No proof of anything you say as usual.

See my other posts.
Where's your proof of your claims about me, huh?

1. Prove that I made "anti-legal" posts to this group.
2. prove that I have called you "WA3MOJ ".
3. Prove that I posted 5 replies to the one message where you made that
claim.
4. Prove that I "follow George around".
5. Prove that I am a "Brummy".

>> The law you claim to have so much respect for says innocent until proven
>> guilty.
>
>Just asked you a question

It's no use changing the claim from "anti-legal" posts to just "defense of
keyclowns".
Well, where's your proof, huh?

>> YOU claim that I make anti-legal posts... PROVE IT.
>
>You claim that I'm WA3MOJ prove it

Where do I say that you are "WA3MOJ "?
Please post the proof, and proof of "anti-legal" posts.

Maybe you are just trying to cover your lies with more lies.

>> There would, he is not the only one you whine at.
>
>So you are psyuchic now?

Why... because I can see the whining you do?
Come on, it's there for us to see. It's all you ever do on here... whine.

>And why are you here?

It is a CB newsgroup... is that not easy enough to understand, even for a
dropout?

> Ohh wait a minute...your still sore because Voob kicked your ass

Hahahaha.
Which one of us has run from the group, huh?

Let's face it, he cocked up, I pointed it out, and he didn't like it. Maybe
he took a lesson from you, and went crying to his mummy.

>OK STFU hows that

Try going back to school.

>> >assmunch.
>
>That is what you are the truth hurts huh

Considering that it is not a real word, no. It just shows up your childish
attitude.

>Now you are not english?

Eh?
Is that a question, or a statment?
I am English, always have been, and I have never said otherwise.

>Where did anyone claim to killfile you

Are you denying seeing the post where I was "killfiled"?

> stop following George around

Where do I follow him to? What other group am I on that he uses?
Exactly... you have lost touch with reality.

> Then sod off

Sore loser.

>> by Brummies that you have to imagine me as one.
>
>So now you are denying you ever set foot in birmingham?

Does "setting foot" in Birmingham make someone a Brummy?
Nobody asked if I had ever been to Birmingham in my life, so I have neither
denied or confirmed such a thing.

I suppose that visiting London also makes someone a cockney, and visiting
Liverpool makes someone a Scouse, huh.

> are you denying
>youve never been in a marks and spencer?

No, I am not denying that I have "never been in a marks and spencer".

Where has anyone asked whether I have been in an M&S store?
Does setting foot in a shop make you their employee... or a "vannie"?

You need to get a grip on reality.

>Tell us o backpedaling brummie one.

Where am I backpedalling? I have never made any claims regarding whether I
have been in an M&S or Birmingham.
I have only said that I am not a Brummy. Maybe you would prefer it if I
lied to suit your mistakes.

However, Voob went from the suggestion that I was in Birmingham to just
being born there. And you have gone from the Brummy claim, to the
suggestion that I may have visited the place at some time in my life.

I would call that backpedalling.

Yes and no. If you can't make contact at all with .5 watts, chances are
that 2 watts won't make things much better. On the other hand, 2 watts
is a 6 db improvement in signal over .5 watts. So if you are marginal at
.5 watts, a 6 db gain will be enough to bring you back into the quieting
range of the receiver again.

>
> If you climb up to the top of a tall building, you can talk 7 miles with

If you climb a high enough mountain, you can get over 20 miles in some
cases with a .5 watt FRS radio. Such is the characteristics of line of
sight propagation.

I do note your fascination with "nads", balls to anyone past puberty. I wonder, do you have any? Or do you simply drool thinking about other peoples? As for doing something about you, why? You cannot affect my radio in any fashion. You can come here, where you can hide, and spout little boy sputtering. Did it upset you that both your parents had heavy facial hair? Or was it that they both had dicks?

Ozark, you should stick to trolling the parking lot of the T/A in St. Joe instead of NG posting, at least until your IQ rises to match the temperature of an October day in Alaska.

Auctions ratted in the extreme. Sissy keyqueens whining and tossing insults. FCC busts. A drop in gay activity because of illegal amps and radios being removed from the market. Twithed silent.

Your Masters, the AKC <that's "My Lord" to you> are just peachy.

What gives with that auction for the Elkin amp on Yahoo? I thought you said Yahoo would not dump illegal auctions.

Are you doing what your sister keyclownz do and deluding yourself?

One final question your owners demand an answer to: What was the exact calendar date that you made a resolution to cease finding carnal arousal in porno videos of dogs?

It is not just your Masters the anti-boys who want to know. Mopar and Landshark also want to try to understand why you won't let their favorite videos be played at your home when they attend your Mary Kay party.

There is nothing in 95.179 that states that all users have to live at
the same address. It only describes the family members covered. This
includes aunts, uncles, nieces, nephews, in-laws, etc. It is highly
unlikely that all the family tree would be living in the same house.

> addresses, each of you would need to get your own license.

Actually, the rules say nothing about households. Here's the excerpt:

"TITLE 47--TELECOMMUNICATION

COMMISSION (CONTINUED)

PART 95--PERSONAL RADIO SERVICES--Table of Contents

Subpart A--General Mobile Radio Service (GMRS)

Sec. 95.179 Individuals who may be station operators.

(a) An individual GMRS system licensee may permit immediate family
members to be station operators in his or her GMRS system. Immediate
family members are the:
(1) Licensee;
(2) Licensee's spouse;
(3) Licensee's children, grandchildren, stepchildren;
(4) Licensee's parents, grandparents, stepparents;
(5) Licensee's brothers, sisters;
(6) Licensee's aunts, uncles, nieces, nephews; and
(7) Licensee's in-laws."

All it states is "immediate family members" with no stipulation on residence.

>Yes you only need 1 license each to talk on any GMRS radio. but why
>don't you try the FRS radios. you don't need a license with them and
>can talk a long ways i believe 2 miles at least

But with GMRS, you can use mobile or base radios with up to 50 watts and even use repeaters.

I personally got into GMRS because my wife doesn't want to get a ham license and this will allow us to talk when one of us is out. I bought 3 Standard UHF mobile radios (30 watts each). I've got a GMRS base antenna outside, which will eventually be about 10 feet above the roof and the other two radios will be in our 2 cars with Antenex NMO mount antennas on the trunk.

New carb, cleaned the engine compartment, new wires, plugs, cap, rotor. Put all news seals
around the doors, liftgate & tailgate. Tomorrow
get five new tires, bleed the brakes, change
the oil, lube & grease job. Hopefully I'll get
the seats back from the upholstery shop on
Friday.
So hopefully sometime next week
put the molding emblems on. Then take
her to the stereo shop for an MP3 player,
speakers and an amp, after that I'll find a
placed for one of the radio's and an
antenna. Maybe I'll throw in one of my
small amps, just to make the nay sayers
happy.

Landshark

--
If you are implying that people, who
hold ham licenses, should be somehow
held to a higher moral standard than
the "common man", then that would

be faulty logic. A ham license is only
a "permit" to use radio, it is not a
"badge of morality".

>1991 or whenever and the only reason it didn't work was that the van
>they parked in the basement was parked next to the wrong support
>columns........

The buildings were not designed to withstand the impact of a jet liner full
of fuel. The fuel burned and set fire to paper, carpet, funiture, and tons
of other flamable items. If only the jet fuel had been burning, it would
have burned fast and likely the fire would have subsidee before it became
hot enough to weaken the supporting structure to the point of failure. It
was not just the jet fuel.

Do you have to work at being a moron or does it come naturally "doncha
know"?

Wrong, PBS aired a special on the building of the towers and there was no central rigid core as most skyscrapers are constructed. That is what made the towers unique, the support was the outside steel structures, the strength coming from the cross members holding it together.

What guy? Name, flight school please. Give something to back up your
statement.

..........you have to
>make intricate maneuvers that would be hard even for a experienced
>pilot

Would you like to qualify that statement?

..........it is like hitting a needle in a haystack.......and yet
>guys who had never actually flew a plane before somehow were able to
>make these planes fly into the side of a building.

They had flight training and had time in simulators. They knew to turn off
the transponders, they new how to read headings. After a few hours in a
simulator, it would be easy to get in the left seat and aim the plane for a
building.

.....makes no sense
>to me............
>
Why does that not suprise anyone?

>again on point 1.......i reiterate......the blast from the planes went
>out the other side of the building and that includes most of the fuel
>associated with these planes..........all that was left was a

4025. CB antenna HELP !!!!! ..... please.....

Newsgroup: rec.radio.cb
Date: 2003-09-18 05:48:04 UTC
From: uppercreek@designandservice.com
Message-ID: <1ca80cb5.0309172148.3438b5cf@posting.google.com>
Source record: 165559

Hey I need help idenifying and the measurments for an old partly
dissambled CB antenna I bought today.
It's a GP type. It has a solid aluminum hub with four spoke stubs for
mounting the horsional radials. This hub has a threaded hole for a 3/8
bolt that looks like it serves as a set screw that secures the antenna
to the mast.
The coax connector is mounted on an "L" bracket that secures one end
of a tuning ring. The other end of the ring is connected to the center
radiator.
There's an insulated wire running from the coax connector to a small
clamp
about midway around the ring. There's indications that the antenna is
at least 19 ft. when assembled
Nothing looking like a top hat came with it.
Any help would be appreicated.
A copy of assembly instructions and measurements would be great
!!!!!!!!!!!!
I'm planning to get back on the air this winter.

Much obliged

Uppercreek ;-)

Admit what... where do I say that I am a brummy?
Exactly, I don't... try again.

> How would you know about brummies being
>dishonest if you are not one yourself?

How do you and your pals know about some of the people on this group being
"Gay"... unless you are all Gays.

Crowded cities are known to be riddled with drugs and the related crime.
You hear about it every day on the news.
There's even been shootings in places like Birmingham, reported on the news.
In some cities, it can be dangerous just to go near some of the tower blocks, as someone may drop a fridge or freezer on you from above. In a poll, 65% of children from such areas believe that crime pays.

Do you not know where your crime hotspots are in America? Do you never see or hear the news?

So, how I know is simple... I can read and understand English.

> And if you are not a vannie
>then what are you, a brain surgoen LOL?

Do you think that they are the only two professions in the UK?
Your idea is that if someone is not a brain surgeon, they must be a van driver?

The only thing you prove is your own stupidity and ignorance, you cannot even tell when someone is taking the p*ss out of you and your buddies.

> Take that pastie out of your mouth

Take your foot out of your mouth.

> and tell the truth for once in your life.

I have already... shame the truth does not suit you. What you really want is for me to lie, so that you don't look so stupid.

Try finding some real proof. Try finding one where I am not taking the p*ss out of your "Brummy" claims
But, before you post it, get someone to read and explain it for you so you do not send another "reference" as useless as that attempt.

>> 1. Prove that I made "anti-legal" posts to this group.
>
>You support twithed same thing

No it is not. A defence lawyer stands up for people accused of crimes...
even child abusers. Are they "anti-legal?

How do I "support" him, send donations, send information to him... or is it
just by not acting the asshole like you do?
Add another to the list...
6. Prove that I "support" Twistedhed.

No backpedalling, and changing the subject... just show evidence of your
suggestions.

>> 2. prove that I have called you "WA3MOJ ".
>
>You refer to me as "george" who do you mean by that?

Where do I call you George?
7. Show a post where I call you by the name "George".

Still avoiding a direct answer and backpedalling, so you accept that you
were wrong... I never called you "WA3MOJ ". Is "WA3MOJ ".the only George
in the World?

>> 3. Prove that I posted 5 replies to the one message where you made that
>> claim.
>
>You awlways reply 5 to my 1

Just more suggestions, with NO PROOF.
Either show a reference to my "five posts" to each of your's, especially the
one you claimed that I posted 5 to... or you are just spouting off BS.

> you did this time too.

Too? You still have not shown the 5 you originally claimed... maybe you got
someone to count them for you now.

This time, I posted separate messages for the proof on each issue, as a
single post would have been long. That gave people the option of reading
the info they wanted without wading through one long post for it.

>> 4. Prove that I "follow George around".
>
>Look in the mirror and see what it is your doing right now

Staying in one place.
Just post the proof... the places or groups that I am supposed to follow him to.

>> 5. Prove that I am a "Brummy".
>
>Don't need to

You mean that you cannot... so you accept that it was BS.

> you already did that

Another to the list...
8. Prove that I have done that... show the evidence.

> and besidees I don't take orders from a brummy

What you mean is that you accept that you are a lying hypocrite who demands proof from everyone, but will never provide proof of your claims.

, maybe you can not read what I wrote. Next time i will
>translate my request into brummy talk for you so you can
>understand it.

Try plain English.
You made claims which you cannot back up with any proof, so you try to divert attention from your false claims.

Not one straight answer to any of the requests for proof of your claims.
You cannot back up one word of your false allegations and suggestions.
You are the weakest link... Goodbye.

9. Show evidence to back up that claim, which you got from the same, sad source as the "Brummy" claim. Post under one of your other names, if it makes you feel better about your "killfile".

That source would be the person who claimed that I posted messages from my home (Peak District), then London, followed by Birmingham, before returning home to post again... all within 3 or 4 hours.

Damn, that's one fast car I must own.

> It's that simple.

First of all, all radio enthusiasts use libraries because much of the information we need isn't on the internet. And I think I speak for all my fellow radio users in Sacramento when I say that the issues Don Saklad brings to our attention _are_ relevant even if we don't live in Boston. His tireless efforts to hold public library staff accountable are an inspiration to us all.

Sounda like an Alpha v-58 antenna. you can get the plans for the Maco V-58 and they would be the same as you describe. Go to www.maco.com and try it out or i can try and send you a copy of the manual

I've got one of the Sony X-Plode (sp?) series radios in my car. It plays MP3's. I've got something like 150 tunes on the cd I'm listening to in the car right now. Changer? Who needs a changer?

Organizing the MP3's into folders is way cool. I created folders for different "moods" I develop while driving. There's nothing better than hearing James Hetfield scream "Take a look to the sky just before you die! It's the last time you will!" or "Am I evil? Yes I am!" when I get pissed off in traffic :)

Some people will never learn. Don't post equipment for auction on here!
Assholes like this, who have nothing better to do, will ruin it for you.

I wonder if asshole would like it if we made recordings of him everytime he
went over the speed limit or rolled through a stop sign.

If he wouldn't like that, then he shouldn't like what he is doing. If he trys
to justify it, he is just being a hipocrate!

I guess you have to dial every area code in the US until you find you?

You're pretty stupid posting your phone number on the internet. Just search
Ebay or Yahoo Auctions and you'll find low priced CB's.

Hi Twistedhed.

I still remember my schooldays, and how the boys who went round
screaming
that other boys were "gay" turned out to be the ones who really were

"Gay".

They probably hate what they themselves are, and have to try to
justify their
desires, and divert attention by claiming that others do it.

****

>>> 2. prove that I have called you "WA3MOJ ".
>>
>>You refer to me as "george" who do you mean by that?
>

> stab, or care to wager a few sheckles?
===

They have given an answer, several times. You must have a problem
reading as
well as spelling.
Try the qrz site... WA3MOJ (George Busch). If I know that after less
than a
year on the group and not reading the group daily, then you should
certainly
have known it with the time you spend on here.

Strange, but when you referred to the area you live in, it was the
same town
as listed for George Busch. So you have a better chance of knowing
"who is
George" than I do... 1000s of miles away.

****

>
>Still avoiding a direct answer and backpedalling, so you accept that
you
>were wrong... I never called you "WA3MOJ ". Is "WA3MOJ ".the only

George
>in the World?

Then who is the "george" you are referring to in 100% of your posts?

Other people said that because your statement is flat out false. What is unique is the fact the outer structure doesn't provide gravitational support as is found in most other skyscrapers. The weight is born almost entirely on the central core. Whatever show you two watched was either in error (doubtfull) or you misunderstood their description.

http://www.skyscraper.org/tallest/t_wtc.htm

Faced with the difficulties of building to unprecedented heights, the engineers employed an innovative structural model: a rigid "hollow tube" of closely spaced steel columns with floor trusses extended across to a central core. The columns, finished with a silver-colored aluminum alloy, were 18 3/4" wide and set only 22" apart, making the towers appear from afar to have no windows at all.

>crap.
>Twisty can prove you to be liars without even posting a message.

Liars? Nope. Why? Because Twisty will be back. He always comes back. He can't help it, because this is his only relief from his multiple personality disorder. If he didn't troll this newsgroup, his hypocritical, paranoid, lying, abusive personality would manifest itself in his material life. All his contempt would keep building up until it spills out as a disrespectful, and probably offensive, comment to someone with a very large fist, who would then kick the shit out of his dysfunctional ass. Don't believe me? Look at his posts for the past few years -- it's mostly whining about Leland, Dave, Doug, myself, and anybody else that ever proved Twisty a liar. Now every one of us has ignored Twisty for a significant amount of time, and some of us have done so more than once. Did Twisty give up whining about each of us in our respective absence? Of course not! Hell, Voob has been gone for months, yet he -still- cries his name. The fact is that he will -never- stop whining about his delusions of being abused, and he will -never- stop lying about others to defend those delusions -- because it gives him an excuse to be abusive HIMSELF!

Those are the facts, Brain, and that's why this will never end until Twisty leaves. So put the blame where the blame belongs -- on the common denominator of almost all the the trolling in this newsgroup -- Twistedhed.

>We can run rings around you losers without breaking a sweat.

Twisty has you running, alright. You are running rings around a fire trying to extinguish it with a squirt-gun, but through the smoke you can't see Twisty stoking it with more and more firewood.

Gee, wonder why when the buildings collasped they fell inward toward the center followed by the outer walls? Did you notice when the second building collasped the tv antenna on top fell straight down in the center and that is were it wound up at the bottem? If this center column was the strength of the building, then just how did that happen? Did you notice that after the collaspe that the only things standing were some of the outer walls, no part of any center column? Whe? Because the center columns were NOT the main strength of the building, that was in the outer steel structure. That was pointed out in the documentery by both the Architect and Engineer who designed the buildings. So this website is either in error or you misunderstood their description.

>misunderstood their description.
>

The inner core supported the weight of the building, the exterior
columns were designed for wind loading.
The outer wall remained after the collapse because they weren't the

primary support for the building.

The report on the design of the building by the architects reads as follows:

In order to make each tower capable of withstanding this wind load, the architects selected a lightweight perimeter tube design consisting of 244 exterior columns of 36 cm square steel box section on 100 cm centers (see Figure 3). This permitted windows more than one-half meter wide. Inside this outer tube there was a 27 m ï¿½ 40 m core, which was designed to support the weight of the tower. It also housed the elevators, the stairwells, and the mechanical risers and utilities. Web joists 80 cm tall connected the core to the perimeter at each story. Concrete slabs were poured over these joists to form the floors. In essence, the building is an egg-crate construction that is about 95 percent air, explaining why the rubble after the collapse was only a few stories high.

Maybe you misunderstood what the documentary stated. I also watched it, and the mention of the outer columns was in reference to wind loading, not support of the weight of the building.

The floors of the buildings were built from trusses, with one end attached to the central core and the other end attached to the outer columns. That means the weight of each structure was supported by BOTH the outer shell AND the inner core.

Now how about arguing over something a little less morbid, huh?

I was thinking of getting a little GMRS/FRS radio. Is it true that there are GMRS repeaters out there that will enhance the signal?....just like a ham radio repeater?

If so, does anyone know if there are any in Erie, PA?

4111. The whole story...

Newsgroup: rec.radio.cb
Date: 2003-09-19 22:54:17 UTC
From: georgesparkyvoob@aol.com
Message-ID: <20030919185417.07744.00000917@mb-m17.aol.com>
Source record: 165645

The whole story, up to now….

(Knock at the door) Aaron opens door wearing his skimpiest thong underwear

Aaron: Hi Sparky! How are you!

Sparky: I'm good Aaron. Is dinner ready?

Aaron: Almost. In the meantime, you can snack on me, but we need to hurry before George gets here.

Sparky:(screaming) Aaron! Will you shut up with the advances! I already told you I've started to like women now! Now leave me alone!

Aaron: OK, OK! I just thought we could be like the old days again.

Sparky: No, I'm really going to stick it out this time.

Aaron: (sniffling) Ok Sparky, have it your way. I'll respect your wishes.

Sparky: Where's George? Do we have to wait for him to eat?

Aaron: Yes, he's bringing the salad.

Sparky: OK. Got any snacks?

Aaron: I think so, let me check.

(knock at the door)Aaron answers the door.

Aaron:(exclaiming) George! My God! What happened to you?

George:(crying) I was just out minding my own business, following this little girl, and all the sudden, wham! Her Dad must have seen me and punched me. I had just asked if she wanted some candy too. I think I could have had her. Then the Dad pulled out of the window of my Pacer, and beat me some more. I think he dislocated my shoulder too.

Sparky: Can we eat now?

Aaron: Sparky, can't you see George is hurt? Go get one of the steaks for George's black eyes. And while you're in the kitchen Sparky, get some ice for his broken nose and busted lip too.

Sparky: OK, but I ain't eating the steak that you use on George's eyes!

Aaron: OK, whatever!

(Sparky spends fully 5 minutes trying to figure out which steak is the smallest, so he can have the biggest…then finally he returns)

Aaron: God Sparky! Why did you take a bite out of it? It's raw, for Christ's sake!

Sparky:(unintelligible mumbling caused by mouthful of raw steak)

Aaron:(grabs steak from Sparky and applies it to George's eyes) There now George. Is that better? Aaron knows how to make you feel better, doesn't he?

George: Yes Aaron, it's much better now. Thanks, you know I bruise easily.

Aaron: Hey Sparky, light the grill.

Sparky: Hey, those steaks ain't half bad raw! Do we really need to cook them?

Aaron: My God Sparky! Sometimes you act like a Neanderthal! Light the damn grill!

(Sparky goes out back, turns on the gas, clicks the igniter repeatedly, nothing happens. Goes back inside for matches and returns)

Aaron:(just as Sparky lights the match) NO! STOP!

(loud explosion)

Sparky: (screaming) I'm on fire! Somebody help me!

(Sparky runs back through the house with his beard on fire, screaming for help. Aaron and George race behind him with teacups filled with water)

Finally, Aaron and George manage to catch Sparky and beat out the fire in Sparky's beard with the teacups.

Sparky: Thanks guys! That was close! I saw my life flash before my eyes.

Aaron: No prob Sparky. You know we love you.

George: Speak for yourself, Aaron! Faggot!

Sparky: Can we eat now?

George: Well, we could if you hadn't blown up the grill!

Aaron: It's OK Sparky. We'll just grill the steaks on the stove.

Sparky: I don't wanna wait! I'm getting dizzy. My cholesterol must have dropped below 300.

George: Here, drink this.

Sparky: What is it?

George: Bacon drippings. It will bring the cholesterol level back up in your blood.

Sparky:(drinks greedily) Burp! Thanks George.

George: No problem. Hey Aaron, you still have that "Little Girls Gone Wild" video?

Aaron: I think so…check over there in the gay porn by the VCR.

George: Faggot! (looks for the tape)

Sparky: I'm hungry! Let's eat.

Aaron: Just hang on a minute. Let me get these damn steaks cooked. (throws the steaks in the pan)

George: (tearing his eyes off the video) Sparky, get the salad and dressing ready, will ya? I'm busy now.

Sparky: OK, George. (Sparky sets the table)

Aaron: How do you guys like your steaks?

Sparky: Raw is fine with me.

George: (rubbing his crotch while watching the little girl video) I don't care. Yeah, raw is fine with me too.

Aaron: (mumbles) Damn weirdo's…

Aaron: (grease splatters on Aaron's hairless chest) Ouch!

George: Aaron, do you mind if I take this video home with me?

Aaron: Sure, take it. You know I don't like females.

George: (under his breath) Faggot!

Sparky: Can we eat now?

Aaron: Yep! Steaks are done. (Aaron places them on the table)

Sparky: I'm first George! That's my steak!

George: Whatever Sparky! Hell, I'm just gonna leave now. (grabs the video and heads for the door)

Aaron: Where you going, George?

George: Um…uh…I'm not really hungry now. I think I'll just watch this tape at home.

Sparky: Good! Gimme his steak.

Aaron: OK George, see ya later.

George: Bye

Scene: Much later in the evening after George has gone home to watch his kiddy porn, we return to find Aaron and Sparky enmeshed in each other's arms.

Aaron: Sparky, I knew you would come around.

Sparky: Well Aaron, I kind of feel guilty…almost as if I'm slipping back into my old self. I've really tried to kick this man habit, but I can't seem to stop having feelings for you.

Aaron: Well Sparky, I always knew we were meant for each other.

Sparky: I only ask one thing of you, Aaron.

Aaron: What might that be, Sparky?

Sparky: All I ask is that you don't breath a word of this encounter to George.

Aaron: Fair enough. I know he's a bit of a bigot.

Sparky: Yes he is, but he's still my only real friend. You know, I can't count the times that he's tried to save me when I've gotten in over my head on the newsgroup.

Aaron: I know Sparky, and he's done the same for me. I really love him, but I can't let him know that.

Sparky: So, we're sworn to secrecy, right Aaron?

Aaron: Absolutely! Remember, we did take the ACK pledge.

Sparky:(chuckles quietly)

Sparky: (tentatively) OK Aaron, I'm all yours.

Scene: Fade to black…

To be continued…

4112. Re: GMRS repeaters

Newsgroup: rec.radio.cb

Source record: 165646

Paul,
There are a few GMRS repeaters but most of them are
not 'open' repeaters, they're private. Usually require
the proper tones to access them. They aren't usually
for just anyone's use, so wouldn't count on them much.
As for repeaters in your area? I have no idea...
'Doc

Paul,

Those are private repeaters and users of those repeaters pay to use them.
The radio shop I worked for some years ago had a number of repeaters. The
charge (if I remember correctly) was $7.00 per month per radio per repeater.
That was in 1994. Oh yes, the repeaters were monitored continuously by the
owner. One big reason was to ensure that the repeater time was available
for the paying customers and not being used by anyone else as well as to
ensure that the repeater was working properly.

73 from Rochester, NY
Jim

Why go to the trouble? After you find there are no gay men there
willing to have sex with you'll just have to turn around and drive 2
hrs back home again.

You are about to be used as a dustmop in a porno store, sonny...hehehh

I enjoy taunting you, and I do wonder why your geocities link isn't
wornkg as well...heheh

Stevie, thank you for being another puppet on the AKC's strings. Now
get yourself to the new truckstop in Oldsmar, twithed needs your help.

Brainlessbluster, you know you want "international relations" with twithed, so why deny your lust?

As for lying, why should anyone care about lying to criminals like you and your fellow fruitboys? Like we need credibility with slimeballs like you guys? You think way too much of your pink muffin boy self if that even enters your mind.

I will send mopedholic to provide sisterly comfort to you as soon as he gets done in Oldsmar. It is his fault now if he doesn't hurry, dont blame your Masters, the AKC.

bye for now, Brainlessbluster. We will exert our effortless total control over you again tomorrow.

Dino tinypino:
I am not married...my brother and I are quite happy sharing your wife.
We get immediate penicillin shots after every session with her. Would
you please teach her about submission to superiors the way you have
been trained, though? I get tired of using my belt on her when she
gets fiesty.

You know the rules in D/s play...the old chiefs taught you when you
were a fireman three...show your wife for us and we won't beat you up
anymore.

See you later, your Masters will use you tomorrow.

>If so, does anyone know if there are any in Erie, PA?

Paul, check out http://www.g-m-r-s.org/repeaters4gmrs.htm

With GMRS repeaters, you are usually requested to contact the owner of the repeater before you use it. On this webpage, there is contact information for the repeaters. By looking at the page, I only see 8 GMRS repeaters in PA, so the chances that one is near you is slim. You can extend the range of GMRS if you use base or mobile stations (at a maximum of 50 watts), which isn't allowed with FRS.

Jim,
The are 'private' in that they are privately owned
and operated. Maybe for someone's busness. The owner
may not want other people using it when he needs too.
All kinds of reasons, but primarily, "if you didn't
help pay for the thing, why should you use it for free?",
sort of a deal.

Hey, it's great that yahoo finally decided to recognize federal law. And you know what makes it even better? The fact that now the FCC can concentrate their efforts on the few outlaw boards run by morons who can't seem to grasp the concept of respect -- respect for the law -- respect for the will of the majority -- respect for the US Constitution, and respect for every man and woman that died defending it.

Hey Keith, crawl back into your hole and don't come out until the AKC gives you permission!

OK, I've read it... so what?
You also post replies to his messages, far more than I do, giving him reason
to post more... maybe you support him.

Did you have to go 20 months back, and select something unrelated... or did
that particular one hit a nerve?

>>>> 2. prove that I have called you "WA3MOJ ".
>>>
>>>You refer to me as "george" who do you mean by that?
>>
>>Where do I call you George?
>>7. Show a post where I call you by the name "George".
>
>Do all people in birmingham behave like you do?

I see, more diversions... the accusation of "calling you WA3MOJ" was changed
to "calling you George and, now you cannot prove either, you just avoid it
and attempt to change the subjet.

Just provide the proof. Can you show the posts where I call you such names,
or did you imagine it?

> as example:
>

>as listed for George Busch. So you have a better chance of knowing
>"who is George" than I do... 1000s of miles away.
>
>**********

The question in that post was simply, who did people mean when they
referred to "George"... so I answered it. Try learning English, I do NOT
say that he is George, I just stated who people were referring to.

Ah, but wait a minute...
If this is meant as proof that I call YOU ("Keyclownz R Dopers") George, the
person in question is the same as now calls himself "Curious Dan".
So, by your own admission, you and "Dan" are one and the same person.

>Then who is the "george" you are referring to in 100% of your posts?

#10 show that I mention "George" in 100% of my posts.

Hell, you had to go back over 18 months just to find a post where I mention
the name. Even then, I am not calling someone by that name.
Once again, you place your numeracy and comprehension problems on display
for all to see.

>>>You awlways reply 5 to my 1
>
>I counted at least 10 of your replies so far

Not to ONE of your posts. Every time you are caught in your lies, you try
changing the claim.
Stop avoiding it... show proof, or just accept that your lies are useless.

>Daft excuses make you look all the more like a twit.

You are the one coming up with excuses, rather than proof.
Stop trying to deflect the attention, where is your proof?

>You are following "george" right now in this thread

Another admission that you and "curious Dan" are one and the same person.

>>>> 5. Prove that I am a "Brummy".
>>
>>You mean that you cannot... so you accept that it was BS.
>
>Anyone can tell from your "humour"

More diversionary tactics... still no proof, huh.

>>Another to the list...
>>8. Prove that I have done that... show the evidence.
>
>You have no "list" just a tacky van job in the midlands,

Still avoiding a direct reply, by changing the subject.
Come on, where's your proof... Mr Rent-a-dick?

>>You made claims which you cannot back up with any proof, so
>>you try to divert attention from your false claims.
>
>What claims?

Now you have problems with memory retention.
OK, I'll help you out this once... but you really should write them down if
your memory is that bad that you cannot remember what you said.

You claim that I made "anti-legal" posts to this group.
You claim that I have called you "WA3MOJ ".
You claim that I posted 5 replies to the one message where
you made that claim.
You claim that I "follow George around".
You claim that I am a "Brummy".
You claim that I "support" Twistedhed.
You claim that I call you by the name "George".
You claim that I "proved" that I am a Brummy.

>You refuse to see the proof presented to you or your too
>dumb to see it.

No, you fail to produce proof.
Changing the subject and claims, and posting unrelated messages is proof of
nothing except your lies.

>>>> Does "setting foot" in Birmingham make someone a Brummy?
>>>> Nobody asked if I had ever been to Birmingham in my life, so I
>>>> have neither denied or confirmed such a thing.
>
>Bull. Only a brummy would answer the way you did.

How do you know Brummies so well... unless you are one.
You have still failed to show proof...
Where do I say that I am a brummy?
Does setting foot within Birmingham make someone a Brummy?

If so, then setting foot within London makes someone a Cockney and setting
foot within Liverpool makes someone a Scouse.

>>> How would you know about brummies being
>>>dishonest if you are not one yourself?
>>
>>How do you and your pals know about some of the people on this group
>>being "Gay"... unless you are all Gays.
>
>I hate to say it but a majority of brummys are gay

Once again, you claim to know so much about Brummies. By your own words,
this shows you to be one.
Or will you accept the lesser charge of hypocrite?

> and you bringing up homosexual themes

I referred to your constant suggestions of that type... you are constantly suggesting that people are "gay", which you have provided the proof of, in your above response.

You are digging a big hole for yourself... it's only a matter of time before you fall in.

>>In a poll, 65% of children from such areas believe that crime pays.
>
>Maybe brummy children think that way.

Maybe they do, but the poll was a national one and showed that in such areas a higher number of children thought that way. This would include other crowded inner city places.

You have even worse areas in America... is there not gun crime on a daily basis?
You even have snipers, shooting people at random.

What was that Elvis song... Clean up your own backyard.

> You of all people would know about crime in birmingham.

Hey, you are the one who constantly claims to know all about Birmingham and Brummies.
You claim to know their sexual preference, their attitude, their humour, their favourite food, their typical job, their typical response... in fact, I would say that you seem to know them rather too well.
What was that Brummy song?

>>Do you not know where your crime hotspots are in America? Do you
>>never see or hear the news?
>
>The brummy translator link is available for you should you need it.

Will it translate English into a language you will understand?
Only, you seem to be displaying a poor standard of English comprehension.

So, tell us... do you know about crime hotspots in America, do you read or hear the news?

>No but YOU are proven to be a van driver and that is what counts.

#11. Where is there such proof.
I would ask you to post the proof, but I know that you will just change the claim to something else.
If you do feel like it, maybe you could also prove that all van drivers are from Birmingham and all Brummies are van drivers.
Let's just say that I will not be holding my breath while I wait for any of the above.

>>The only thing you prove is your own stupidity and ignorance, you
>cannot even tell when someone is taking the p*ss out of you and your
>buddies.

I suppose that must of hurt.
Yes, the post was extracting the urine... and you posted it again just so we could laugh at you some more.

>No you need to tell the truth about your brummyness that is all.

I have... your failure to accept the truth is your problem.
What you want is for me to lie, so you will feel better... just swallow your pride and accept it, you cocked up. Your "tracking" methods were flored.

>Does Marks & Spenser have a psychologst on staff?

You still need to answer the questions - provide proof of your claims.
Your tactics of changing subjects, using insults, and avoiding real replies is not working. It may work on your fellow "Antis", but some of us can see right through you.

>>Why are you replying for him?
>>Are YOU denying ever being in Allentown?
>
>Who do you refer to when you say "george"

Where do I call you George?
The questions were:
Why are you replying for him?
Are YOU denying ever being in Allentown?

> and why is allentown significant?

The name and significance of Allentown has already been made clear. You even re-posted the message where I answered that one a long time back. And the reason I knew was because other people had previously made it clear.

Why do you keep acting like you don't know?
What are you hiding, by pretending that you don't know something which you clearly do?

4143. "Keyclownz R Dopers" admits that he is also "Curious Dan"...

Newsgroup: rec.radio.cb

Respect for the US Constitution means FREEDOM OF SPEACH must be RESPECTED!
Therefore, the FCC is the bad guy in this case. So, take your commie beliefs
to China, I am sure the cops over there would love to have you on their
side.

Of course it was supported by the inner and outer shells. But the
inner one was designed to carry the verticle loads.

>
>Now how about arguing over something a little less morbid, huh?

Respect my rights and I'll respect your's.

>Therefore, the FCC is the bad guy in this case.

There is a limit to your freedom, and that is where it is used and abused for
the sole purpose of violating the law. In that respect, the FCC reg is no
different than any other law which prohibits the solicitation of contraband.

> So, take your commie beliefs
>to China, I am sure the cops over there would love to have you on their
>side.

I've heard that, in China, drunk driving carries a death sentence not only for
the driver, but for all members of his/her family. And here you are, whining
about how the US government impedes your ability to break the law, a law that
most of you keyclowns equate with driving 2 MPH over the speed limit. Keyclowns
sure throw a really big tantrum over such an insignificant little 'rule', which

makes them look particularly ignorant when comparing their cries of despair to examples of -real- violations of human rights. If I didn't know better, I would say that keyclowns are just a bunch of cry-babies....

You want respect? Go join the Rodney Dangerfield fan club.

Or we can just listen to him check into the
Liberty Net tonight from "near --------
Ohio and bellyache along with the rest of
the Saturday nite malcontents and misfits. :)

And now for a prediction:

I predict that W9FAM will eventually replace
W1WCR as the LN NCS. He has an excellent
ability to pontificate about his past broadcast
days and all the world leaders he's alleged to
have met. Hogs the microphone and yammers on and
on, which is good, as since he's an ex-mainstream
broadcaster which no doubt drives the Liberty
Net regulars nuts. (it's always good to have an
embedded ringer eh?) His effect on the net regulars
is almost as good as a skunk in a circus tent.
Seems most of the regulars only check in long after
FAM's gone to another freq. or shut down for
the night. You can almost *feel* the frustration
from the usual bunch of paranoid fools reaching
the boiling point....even better than when the
nutcase from Sarasota would check in and
blabber and play tapes for a 1/2 hour stretch!
We just f-n love it - teee hee hee hee hee heee!!

4169. Amateur Radio Newsline™ Report 1362– September 19 2003

Newsgroup: rec.radio.cb
Date: 2003-09-20 15:15:54 UTC
From: radionews@aol.com
Message-ID: <20030920111554.07421.00001066@mb-m27.aol.com>
Source record: 165653

Amateur Radio Newsline™ Report 1362– September 19 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE

As you are aware, Amateur Radio Newsline is, primarily, an audio news service and this weeks newscast is very audio intensive. While reading gives the basic facts, we advise you to download the audio file at http://www.arnewsline.org/quincy to get the most out of the newscast in relation to our coverage of Hurricane Isabel and the role Amateur Radio played and continues to play in storm communications efforts. This is a story told in “sound” from the scene that really cannot be reported in any other way.

**

Amateur Radio Newsline report number 1362 with a release date of Friday, September 19th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is there as a hurricane pounds the U-S east coast, the ARRL holds tight on Morse and more petitions are on their way to the FCC. Find out the details on Amateur Radio Newsline report number 1362 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM ADIO AND HURRICANE ISABEL

Her name is Isabel. She is a hurricane that slammed into the United States East coast with gale force winds. Emergency services including ham radio were ready and waiting as we hear in this report:

--

Roaring ashore with winds of more than 100 miles an hour, Isabel made landfall along North Carolina's Ocracoke Island, crossing the Outer Banks around midday September 18th. On the west end of Ocracoke Island, sustained winds were measured at 80 miles an hour. Storm surge of 12 feet was reported I

Bernard Nobles, WA4MOK, is a Section Emergency Coordinator in North Carolina. He says hams mobilized over a large part of the state:

4:07 IN In emergency operations centers
OUT in the eastern part of the state

The action wasn't just in North Carolina. Hams throughout the eastern seaboard were in position, ready to provide backup communications. Only a few hours after the storm had moved ashore, more than 800-thousand customers were without power in North Carolina and Virginia. Bill Moraine, N2COP, is a Public

Information Officer in southeastern North Carolina. He says hams were providing a variety of communications services:

--

IN they really run the range of
OUT in northeastern North Carolina.

--

Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome H-F problem. All along the storms projected path ham radio operators trained in emergency communications were in service or on stand-by alert. The Hurricane Watch Net was busy on 14-point-325 MHz. At the National Hurricane Center in Florida, amateur station WX4NHC helped with relaying storm reports. With hams throughout the mid-Atlantic region helping in the communications effort, Morraine said putting a number on those assisting would be tough:

--

IN We don't have a handle
OUT in this particular disaster One bit of good news.

--

Morraine says Isabel is no Hugo, referring to the devastating hurricane that slammed into North Carolina in 1989:

--

IN Thanksfully, Isabel
OUT about 105.

--

Hams were scheduled to staff the North Carolina Emergency Management Eastern Branch headquarters in Kinston. The amateur station at the state emergency operations center in Raleigh was also activating, with an umbrella of liaison stations being organized to monitor the 146.88 MHz repeater and the Tarheel Net.

The National Weather Service had hurricane warnings posted for parts of North Carolina and Virginia. Forecasters warned hurricane force winds were possible 150 miles inland, along with tornadoes.

As Isabel began moving north after landfall, flooding became a serious threat. At least one hotel in Kill Devil Hills collapsed into the ocean. Evacuations were being ordered along Chesapeake Bay.

In the hurricane's first day ashore, nearly 900 flights had to be cancelled, with some airports closing or limiting service. Up to a foot of rain was possible in West Virginia's hilly Eastern Panhandle, with between 6 and 9 inches of rain expected over parts of Pennsylvania. Amateur radio operators say

they will stay on the air helping--as long as needed.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham Alabama.

+++

As David said, it was North Carolina that was the first to feel Isabel’s fury. Gay Pearce, KN4AQ, is in Raleigh with that part of the story.

+++

Amateur Radio was in full swing in eastern North Carolina as Hurricane Isabel made landfall on Thursday. For hams and everyone else, the term "made landfall" was a confusing one. High winds, rain and power failures reached the Raleigh-Durham area, 150 miles inland, well before the hurricane eye crossed the coastline.

--

IN: WAKE EOC POWER FAIL AUDIO]

--

The Tarheel Emergency Net, North Carolina's ARES net, was in operation, splitting duty between 3923 and 7232 kHz, depending on propagation

--

IN: HF COUNTY CHECK-IN AUDIO],

--

The North Carolina ARES group has not yet begun to use 60 meters.

Most traffic between the coast and the states Eastern Branch headquarters in Kinston was being handled on linked repeater systems.

Several hams have remained on Hatteras Island on the Outer Banks, and for a time, hams across the world could listen to them via Echolink and IRLP connections. That ended as power and phone service failed near the coast.

The National Hurricane Center in Miami continued to use the Internet links to take reports from areas where connections remained in place.

--

[K4JVP AUDIO]

--

There was some confusion early as too many sources of input were mixed together on one combined Echoink/IRLP conference. The National Hurricane Center's liaison station commented:

--

[HNC CONFUSION AUDIO]

--

Control operators were able to clear up that confusion, but locally, repeater operators are finding that they can't mix local emergency and logistics traffic with a full-time Internet connection that's carrying similar traffic on other repeaters. That's a lesson for the next emergency.

Repeaters were used inland as well. The wide coverage 146.88 repeater in Raleigh linked the State EOC with surrounding counties and the Eastern Branch headquarters.

--

[VHF COUNTY CHECK-IN AUDIO]

--

Shelters began filling up as the storm moved inland, but with most shelters located in counties that would receive at least Tropical Storm force winds and a possible loss of power and telephone service, Amateurs were dispatched to provide communications.

--

[SHELTER VOLUNTEER AUDIO]

--

Reporting for Newsline from the fringe of Hurricane Isabel, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

More on Hurricane Isabel and the role of ham radio in future Amateur Radio Newsline reports. (Numerous sources)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater serving Eastern Kentucky.

(5 sec pause here)

**

RESTRUCTURING: THE ARRL POSITION - WAIT TO HEAR FROM OUR MEMBERS

Why hasn't the ARRL joined those who have already filed petitions to the FCC on the topics of Morse Code testing and changes to license priveleges? In a note to his constituancy the League’s Southwestern Division Director Art Goddard, W6XD, explains it this way:

“After determining that the FCC will be handling these matters in due course, your ARRL has set a timetable that includes ample opportunity to

collect member input before determining its direction at the January 2004 Board meeting.”

Goddard says to say tuned for further developments. He also tells ARRL members to contact their own ARRL Director and make known their views on these vital issues.

Goddard also suppled a brief overview of a meeting in St. Louis this past weekend, where ARRL Directors and Officers took what he calls the next step to define the ARRL's future role in Advancing and Advocating Amateur Radio. Although the details of ARRL's Long Range Plan aren't yet complete, W6XD says that hams can expect to see bold new actions in several key areas. These include advocacy in key regulatory and legislative issues, lifetime learning, certification and personal achievement and public recognition of Amateur Radio as a valuable service. Goddard adds that there will also be financial stability to implement all of these strategies. (ARRL SW Div. Report)

**

RESTRUCTURING: MORE CODE PETITIONS COMING

The ARRL may be taking the correct road on this one. This is because the latest ham radio restructuring show appears to be only in its opening act. In fact, it looks as if the six petitions favoring abolishing Morse testing and the one from FISTS favoring its retention may be only the beginning of a deluge of requests from both sides in the issue. We have heard that there are a number of other petitions already at the FCC or on their way but know little about them. Our Bruce Tennant, K6PZW has more:

As we go to air we believe there are as many as another half dozen petitions being filed on both sides of this contriversial restructuring issue. Amateur Radio Newsline will keep following this story and will have more fore you in upcoming reports. (Various sources)

**

RESTRUCTURING: FILE ON EACH PETITION

Still with this latest round of restructuring. If you are among those planning to file comments on one or more of the Morse petitions already before the FCC then listen up. If you want to make known your feelings on all of them, then you will have to file separate comments on each one.

As of this moment, a comment filed on any one particular petition will be considered for that specific rule making request alone and not on all. And having read the petitions, we can understand why. Each one asks for a specific approach in handling the Morse question and it would be impossible to provide a one comment that would fit all.

By the way, as we go to air the FISTS pro-code request has still not been assigned a rule making designation by the FCC. (ARNewsline(tm))

**

RADIO LAW: CONGRESS MAY INCREASE FCC AUTHORITY TO ISSUE FINES

The Federal Communications Commission would be given the authority to levy significantly higher fines. This, if a bill being considered by the Commerce Committee of the U.S. Senate becomes law. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The Wall Street Journal reports that fines for violating FCC rules could jump tenfold, and activities of lobbyists would be further restricted under a bill introduced in mid-June by Senator John McCain who chairs the Committee that authorizes the agency's funding. In addition to the increase in the Commission's authority to levy fines, the proposed legislation would also extend the statute of limitations on violations of the agency's rules from one year to two.

Other provisions include restrictions that would prevent top staffers from lobbying the agency for one year after leaving their positions, and a ban on the payment of travel expenses of FCC officials by companies and private interest groups. In other words, if the FCC were to send out a representative to any gathering the cost must be borne by the agency and not the events sponsor. Its far to early to know if such a prohibition would impact on the FCC ability to attend hamfests, conventions and other hobby radio gatherings.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

McCain's bill reportedly has the support of Senator Ernest Hollings increasing its chances of gaining broader support. Even so, it is still expected to face tough opposition as it makes its way through the regulatory aproval process. (Published news reports)

**

REMEMBERING : THE 2ND ANNUAL N2LEN 9/11 NET

The second annual N2LEN nine eleven net took place on Thursday, September 11tth. The gathering used voice over I P technology to link repeaters world wide over the Internet. This allowed radio amateurs and non-ham listeners to reflect on the terrorist attacks of two years ago and the role that radio amateurs played in the aftermath.

ARRL President Jim Haynie, W5JBP, was this years keynote speaker. He addressed the role of Amateur Radio in homeland security and urged each amateur to develop his or her emergency communication skills.

As with the 2002 net, this year's cyberspace and radio meting relied on EchoLink and eQSO Internet software connections as well as repeaters and simplex links around the world. (N2LEN Net News Release)

**

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTED FROM ITS HOME

The University of Central Florida Amateur Radio Club station K4UCF has been evicted. This, from the campus location that it had occupied for 30 years. Mert Garlick, N6AWE, reports:

--

According to a qrz.com website posting from Matt Collins, KG4JYD, the eviction took place last June but seems only now to have been made public. It reportedly resulted from faculty complaints about the radio club who concluded that damage to computer equipment was from a lightning strike that entered the building through the club's antenna system. University's plant personnel also complained that club members worked on the roof of the building without authorization.

But Matt Kassawara KG4FEQ , has a differing view. Kassawar who is with the club says that the ham station is the closest equipment to the antenna system. He says that neither that equipment nor the club repeaters were damaged by a lightning strike, indicating that the clubs antenna could not have been the source of the damage.

The club requested that University of Central Florida provide comparable space from which to operate. So far UCF administrators have refused.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE.

--

More information is on the web at qrz.com and http://pegasus.cc.ucf.edu/~wb4tcw/evictimeline.html (qrz.com)

**

ENFORCEMENT: NY COURT DISMISSES HAM SCANNER CASE

Some good news for a New York State ham as a court dismisses a misdemeanor charge against Richard C. Lalone, KC5GAX. This for allegedly for violating an anti-scanner provision that state's Vehicle and Traffic Law.

According to the ARRL Letter, in a 1300-word decision, Judge John J. Hallet said it was clear the legislature never intended the provisions of traffic law 397 from applying to licensed Amateur Radio operators. He then dismissed the charge against Lalone August 5th.

The law in question prohibits individuals in New York state -- other than law officers -- from equipping their vehicles with radios capable of receiving signals on the frequencies allocated for police use without first securing a permit. The section also contains an explicit exemption for any person who holds a valid amateur radio operator's license. (ARRL)

**

ENFORCEMENT: FCC ASKS POWER COMPANY TO TRY HARDER TO RESOLVE NOISE COMPLAINTS

The FCC has asked American Electric Power Company of Columbus, Ohio to take a closer look at several power line noise complaints and try harder to resolve them. This in relation to complaints filed by four Amateur Radio operators in

Ohio, Indiana and Oklahoma.

According to the ARRL Letter AEP responded February 10th to the FCC's initial correspondence regarding the four cases. But the agencys' Special Counsel Riley Hollingsworth says that follow-up reports from the complainants suggest discrepancies exist between what AEP told the FCC and what the complainants report.

Hollingsworth said evidence to date indicates that none of the cases has been satisfactorily resolved. In one case, AEP erroneously identified the amateur's own antenna as the source of the noise.

Now, Hollingsworth has asked AEP to revisit each of these issues and to update the FCC within 45 days of any progress in each case. He also referred the power company to ARRL RFI Specialist Mike Gruber, W1MG, for technical assistance. (ARRL, FCC)

**

ENFORCEMENT: PAGING FINE

The FCC has affirmed a $9,000 fine against Air Paging, Inc.. This for failure to operate its Wireless Radio Station in accordance with its station authorization, continuous radiation of an unmodulated carrier, and failure to provide station identification by the assigned call sign.

Air Paging did not file a response to the initial Notice of Liability, so the $9,000 figure was affirmed. In addition, the Commission does not know if Air Paging has corrected the various violations, so Air Paging has been given 30 days to outline what measures it has taken or will take to correct the violations and ensure that they do not recur. The entire mater is in cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2741A1.doc (CGC)

**

ENFORCEMENT: TWO MORE TOWER FINES ISSUED

The FCC has issued two more broadcasters hefty fines because of tower related violations. A monetary forfeiture in the amount of $10,000 was issued to Pinnacle Towers, Inc., owner of a tower in Des Moines, Iowa, for failing to clean and repaint its antenna structure to maintain good visibility. Dinged with a $3000 fine is Best Country Broadcasting, LLC, owner of the antenna structure located in Bogalusa, Louisiana. No reason for this fine was mentioned in the FCC digest for the Best Country fine. (CGC)

INTERNATIONAL - AUSTRALIA: BPL COMING TO VK-LAND

The problem of Broadband over Powerlines or BPL is about to hit dwn-under. This as Australia makes ready to give it a go. Q-News Graham Kemp, VK4BB, has the latest:

--

PLT, PLC, BPL. What ever way you say it it means noise. Now, the Wireless Institute of Australia - Victoria says there is now clear evidence of a PLT-C/PBL push in Australia. That no-one can continue to be in denial mode.

From the Q-NEWS perspective Barry VK2AAB will no longer be a "voice in the wilderness." Many of us will soon be asking "why didn't we act sooner".

You'll recall months ago we mentioned the little units being sold by DSE. Well these are small fry compared to the same basics being applied to our 240 volt mains supply, or worse, the High voltage distribution system.

--

It appears as id BPL is quickly becoming a world-wide problem for Amateur Radio. (Q-News)

**

RADIO LAW FOLLOW-UP: NEVADA TOLD TO SCRAP NEW RADIO SYSTEM

Here’s a follow up on a story we brought to you several months ago regarding a new state wide radio system in Nevada and an oversight by the regulators planning it. As previousy reported, the Nevada Highway Patrol had spent $14 million on a contract with Motorola to build a computerized radio system. It was activated back in 2000 but nobody from the state ever applied to the FCC for licenses for the frequencies. As a result, the FCC had told the Nevada Highway Patrol and other state agencies to stop using the 140 frequencies by last June.

To comply with the federal order, Nevada has had to scrap a costly radio system that's less than two yeas old. So on Tuesday, September 9th the Nevada state Board of Examiners voted to spend $16.1 million on new radio gear for the Nevada Highway Patrol. (Published news reports)

**

NAMES IN THE NEWS: W4FAL AND K2AD ELECTED NEW NFCC DIRECTORS

Some names in the news. They are Frank Lynch, W4FAL and Doug Sharp, K2AD who have been elected as Directors of the National Frequency Coordinators Council.

The NFCC made known the results on September 6th. This, after twenty-eigh of its member councils took part in the vote.

The National Frequency Coordinators Council is an umbrella group of recognized repeater coordinators. It was formed as the result of a meeting held in St. Charls Missouri in the late 1990's. (ARNewsline(tm))

**

HAMFESTS AND CONVENTIONS: QUEENSLAND AUSTRALIA ON SEPTEMBER 19-21

On the hamfest scene, the 30th annual North Queensland Amateur Radio Convention takes place September 19th to the 21st. The venue is down-under at James Cook University in the state of Queensland Australia. For details please e-mail vk4zz@wia.org.au (Q-News)

**

HAMFESTS AND CONVENTIONS: THE DX BASH IN TEXAS IN OCTOBER

Back on this side of the Pacific, the 13th Annual DX BASH will be held on Oct 10th to the 11 at Lake Buchanan near Austin, Texas. Icom has provided a IC-746 Pro and IC-756 Pro II that will be in use at the W5KFT contest station for attendees to try out in actual "on the air" conditions. Also planned are programs on operating, contesting, towers and antennas. More nformation is on-line at www.dxbash.com (W5KFT)

**

SWL-FESTS: SCADS IN HUNTINGTON BEACH IN SEPTEMBER

And short-wave hobbyists, this one is for you. Word that the Annual Southern California Area D-X'ers Picnic will be held on September 20th from 8am to 4pm. This, at the Huntington Beach Central Park in Huntington Beach California.

Huntington Beach is a suburb of Los Angeles. Further information available from Stewart MacKenzie, WDX6AA, at 714-846-1685 from about 9 a.m. to 8 p.m. - Pacific coast time. (SCADS)

**

DX

In D-X, if you are waiting for a Q-S-L card for last June's WB8XX operation on Antigua, you will have to be patient a bit longer. According to Kevin, cards ordered 2 months ago from PY2TNT never did show up and now it appears that the company maybe out of business. Kevin says that the website is suspended and E-mails bounce. WB8XX adds that he will be ordering more cards from a stateside supplier, and will have all of the cards out as soon as the 2nd order arrives. (VHF Reflector)

**

THAT FINAL ITEM: TEACHING HAM RADIO IN ALBANIA

And finaly this week, how would one of you like to teach ham radio in Albania? Yes, we said Albania. Well you can if you know the British Radio Amateur Examination course and like to travel. Here R-S-G-B Newsreader Jeramy Boot,

G4NJH, with the rest of the story:

--

A radio amateur lecturer is required to help give a radio amateur course in the Technical University of Tirana, Albania, this coming November. The course will integrate amateur radio communications theory and practice into the University's normal study programme.

The course is organised in coordination with the Ministry of Telecommunications in Albania, in conjunction with the IARU, and using RSGB documentation. Several agencies and companies are providing financial support. The applicant should have experience of
teaching electronics and telecommunications at the amateur radio level in a UK setting. The course material is based on the UK RAE at the Full licence level and will lead to a CEPT-recognised qualification for the successful students. The successful amateur will help to coordinate the other visiting lecturers, and the assignment will take three weeks out of a six-week program.

This is a unique opportunity to join a multi-national amateur radio team helping to create a new group of telecommunication engineers to benefit the Albanian economy. It will provide a rich experience, not to mention the opportunity to operate ZA1A from the hotel in any spare moments.

--

In addition to the followup ahead of mine, the so called GMRS/FRS combo
radios typically are NOT repeater-capable. Nothing Wal-Mart and such
carries will operate on repeaters. Repeaters require a separate input and
output frequency, which requires a radio that can switch between these.

Man, you got that gay stuff down doncha? I know how it is when your wrong. You have to stoop real low and call everyone names. Typical liberal PU$$Y! Go ahead and let the government do what the hell they want. Take your money, take your rights. Go ahead and assume the fetal position as usual and take your beating as usual. Uncle Sam will stop once he takes all you got and move on to the rest of your family for more.

Oh and yes, I know my rights but I won't stoop to the gutter to call you an "A$$clown" because you did it yourself.

Now, take a hike over to rec.china.liberal.pu$$ies where you belong.

Message-ID: <b19589b2.0309201122.1d074b62@posting.google.com>
Source record: 165663

A new CD with various comedy skits that totally ridicule keyclowns!

Anti-Boys Productions will introduce this awesome CD by December, just in time for Christmas!

KEYCLOWNS LISTEN UP! don't give your light loafered he/she fellow keyclown something boring like a tube of anal ease or thong underwear AGAIN this Christmas! KEYCLOWN MADNESS will be the hit of any keyclown holiday gathering!

Proposed titles of skits:

1>Trainedpuppet discusses winning a gold dildo from Twithed.

2>Brian Griffey and Ozark333 talk about their childhood experiences with dogs.

3>JP tells all about his midnight lot lizard experiences

4>Secret recordings of twithed's childhood. Actual recordings of him beating puppies, using kittens for fish bait, and playing hide the salami with male relatives.

5>Landshark's childhood: The lunch money muggings, the beatings by his older sister, his fascination with telling on other kids, the truth behind that peephole he bored in the boys' locker room.

6>Dweebo's incarceration: The mass sodomizing he came to love, his drug useage,
his inability to become aroused by anything but Playgirl magazines.

7> Dave or Debby: His continual switching between Dave and Debby, his obsession with gay porn web sites, his secret membership in the Gay Communist League.

8>Randy Chapwoman tells all about his crack using pansy self.

9>PeePeeHolic confesses: Limpwristed Stevie tells about his days in the men's rooms of the old Cleveland Stadium. Hear about how he cried when they wouldn't take him to Baltimore because they had already lined up GayScottiekins as the team pump boy.

It is all in the planning stage now, but your owners the Anti-boys do have great audio recording facilities, and do seriously intend to release a record about you all this year. By the way...All voice tracks will be recorded with a 1968 vintage UG8-D104! You can get this record for FREE! SERIOUSLY!! ALL YOU HAVE TO PAY IS A LOW S&H CHARGE!! We will also include some really cool classic keyclown music!

TWITHED WENT UP TO JERSEY, TWITHED PUPPET, and 1 or 2 NEW RELEASES!

Your owners want you to have a happy holiday season...FREE from
Anti-Boys records!!!

Song: Allentown (Special Edition)
Artist: Billy Joel

Well we're laughing here in Allentown
Cuz we're closing keyclown auctions down
At the truckstops it is gaysex time
Waiting for Tra1n
Standing in line

Well our fathers fought the keyclown wars
Busted Prozac on the Jersey Shore
Peepeeholic is a man no more
Landfag does prance
They are our ho's

And we're laughing here in Allentown
As the keyclown auctions all shut down
And it's getting very hard to be
A keyclown here in Allentown
You can't keep AntiKeyclowns down
With the promises that Riley gave
to issue NAL's
so you will behave

So Twithed's jockstrap hangs on the wall
Waiting for the saucer men to call
But he's out of touch with what is real
Chapwoman does coke
Trainedpuppet steals

And we're laughing here in Allentown
Cuz we're busting all the amps around
And the sissy keyclowns crawled away
And Twithed has a pretty good shot
To get butt pumped like Landfag got
But something happened on the way to that place
The saucer men called him back to space

Laugh my ass off here in Allentown
And it's hard to keep the AKC down
So I won't be going anywhere
And we're laughing here in Allentown

>Yeeaaahh, Riiiight. I beleive that. I'll even bet you have the law book
>sittin' right next to you so you can reference every breath you take so as
>not to break the law.

I respect the system under which the laws are made. I think that very few people, if any, can live their life and not break a few laws. But the difference is that most of us don't do so intentionally (except maybe for speeding, but I'm one of those slow-pokes that speeders hate to get stuck behind). And even -then- there is a difference, since speeding is not a federal law, nor does it carry a typical fine of several thousand dollars and a maximum of $17K (I'm not sure but I think it recently went up to $25K).

>Get real, get a life, get an ole lady, cause you need a piece of A$$ to take
>away some of your tension in life so your not so worried about piddly a$$
>$hit like this!

If it's so "piddly", why are you making such a big fuss, Cryboy?

>move on to the rest of your family for more.

If you are a US citizen (which I doubt), it is YOUR responsibility to make sure that you are being represented in YOUR government. Don't you like the benefits you get from paying your taxes? If you are like most of us, you just don't like how those dollars are being spent. I don't either. But in case you failed grade school, the job of the government is to PROTECT your rights. That's what the US Constitution and the Bill of Rights is all about! Do you really think the bad parts of the Patriot Act will stand up in court when challenged? I don't, because I believe the system works. Regardless, the Patriot Act isn't permanent, neither are the authors, and neither are the elected representatives that passed it into law. And for that matter, neither is the FCC. That's the great thing about this country -- direct accountability of the lawmakers by the public. But if you get so frustrated because the country isn't run the way -you- want, then take the time to realize that you are nothing but a peon until you take an active role in YOUR government.

>Oh and yes, I know my rights but I won't stoop to the gutter to call you an
>"A$$clown" because you did it yourself.

One has absolutely nothing to do with the other.

>Now, take a hike over to rec.china.liberal.pu$$ies where you belong.

You REALLY need to learn the difference between liberal and conservative.

4187. YAESU FT-980 for sale on ebay

Newsgroup: rec.radio.cb
Date: 2003-09-21 01:02:26 UTC
From: marklinbuyer@yahoo.com
Message-ID: <9075af62.0309201702.114909d5@posting.google.com>
Source record: 165671

I have listed my Yaesu FT-980 Transceiver with General coverage
receiver for sale on ebay.

Click on ,this link to see the pictures:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3043162931&category=40069

This is an outstanding piece of equipment for the serious shortwave
listner or someone who is working on their ham license.

This auctions ends tomorrow, Sunday September 21th.

Thanks,

Bill

4188. KENWOOD R-2000 Shortwave receiver for sale on eBay

Newsgroup: rec.radio.cb

Frank,

Congress is just changing a couple of things. FYI, it appears that the
fines the FCC can levy are going up *ten* times. Yep, hello six figures.
(not that they are likely to collect it or anything, but it will be going up
a *ton*)

73 from Rochester, NY

Just a question here. We seem to have an argument about "liberal" vs. "conservative".

I read that the United States of America has the worst survival rate for infants amongst all of the industrialized nations. I do know that our education system is amongst the worst. I'd appreciate it if someone could clue me in if this was the result of "liberals" or "conservatives". Perhaps we haven't sent enough jobs to China yet?

Thanks in advance & 73 from Rochester, NY

>clue me in if this was the result of "liberals" or "conservatives". Perhaps
>we haven't sent enough jobs to China yet?

I can only offer my opinion, which is that people should quit trying to place blame on some political party or philosophical idealism -- the blame rests with ourselves. The current state of the US is a reflection of our values and ethics. We whine about jobs going overseas, but we send those jobs there ourselves by buying foreign products, hence the huge trade deficits (read up on NAFTA). We complain about the lack of affordable health care, but at the same time demand a 'free market' for our doctors because the cost of their education and insurance is so high. We want smarter kids coming out of our schools, but the majority of our support to higher education is to the jocks through the sports programs. I could go on and on, but I think you get the point.

This is a capitalist society, so it's not suprising that we have some of the worst social programs on the planet. Most other countries have seen this and socialized both health and education. Two reasons the US can't keep up is because of all the paranoids screaming "COMMIE" whenever anyone suggests any form of socialism, and because of all the disorganization, inefficiency and pocket-picking in the system.

And just to keep this rant somewhat on topic, there are those that want more and more of the radio spectrum to be 'free' for use without a license. That's typical of the American attitude of "I want mine, I want it now, and I don't want to pay for it!" Like I said before, this is a capitalist society, and as such you don't get something for nothing. If someone wants free handouts, it is THEY that should immigrate to their communist country of choice. But even there, I don't think the government is going to give up much spectrum space for a few whining freeloaders.

JMO.

I encountered the same problem and your fix above
worked for my 2510 too. I took it a bit further also.
I applied solder (tinned) all the grounding feed-thru's and
then cleaned them of all rosin residue with alcohol
and a lint free cloth. Then re-assy'd the radio.
It's worked fine ever since.

4211. AKC MAKES NEWSGROUP A LIVING HELL FOR KEYCLOWNS

Newsgroup: rec.radio.cb
Date: 2003-09-21 16:23:06 UTC
From: n8_isgod@yahoo.com
Message-ID: <5cd8b670.0309210823.3f40442f@posting.google.com>
Source record: 165695

(NEWSGROUP, SEP. 21) "No amps, no auctions, no nothing," said AE352, "I might as well not even go to the trouble of being a criminal". Keyclowns all over America held hankies to their dribbling noses this week and cried tears of defeat. "The eagle has a hernia" said 352, "I can't even post as Richard Cranium anymore".

Meanwhile, "The AKC have driven me out" bleated self styled "amp god" Bill Eitner. "I don't understand why people who USED to be dedicated to the fine art of splattering 40 channels with poor harmonic filtering don't at least put up a fight. I mean, we are criminals by choice not by chance" said Eitner from his Alcatraz cell. Eitner's unsavory liason with Tim Nebo also came to an abrupt end this week as Nebo left Galveston to join the famed homosexual performance troupe, Cirque De Sol-Gay.

But the biggest news of all is that offbeat anarchist and government-hater Twistedhed will post no more in rec.radio.cb. "No, it's not becasue of the saucer men" he chuckled, "It is because of Leland, Sparky, George, Dave, Jerry, Doug, and the rest of Team Voob. They have finally worn me out" said the broad-beamed Gulf Coast amateur sailor and jockstrap collector. "You have no idea what it's like to be the subject of such a vast, pro-legal conspiracy dedicated to my undoing. I even tried bootlegging their ham callsigns on the freeband, but they pay no attention to my shenanigans. So that's it, I'm through. I'll be a pig farmer in some shithole like Des Moine before I go back to freebanding".

I've had about 3000 of them in the last 3 days. I have a lot of different e-mail accounts for different web businesses I run or admin on so the numbers get rather high when this crap starts coming in. If you can set the mail server to delete prior to your mail reader ever checking, it's a big help. Try Mail Washer or similar to help prevent this. Tight mail controls on your mail reader would also be a plus.

Jim,

It started about 3 or 4 days ago with me. My antivirus is updated constantly and does catch the infected attachments when they arrive, so it doesn't appear that I've been compromised. Also, the firewall just had an update about 2 days ago. A third party scan revealed nothing wrong with my system. The tough part is that my mailbox on my ISP will fill (10 MB) unless I either download or delete from the web two or three times a day. The first day it happened (I believe it was Thursday), I had 160 emails and my ISP had started rejecting more incoming emails since I had reached my limit. I went through this a while back (although not nearly as badly), but folks started cleaning up their machines and I had received only about 3 infected emails in 400 or so incoming. This time, however, it is much worse. :(

RF grounds and DC grounds are not necessarily the same. You can feed a grounded vertical part way up with good results. One could have an RF choke in a circuit which is essentially a short circuit to DC, but is an open circuit for RF.

Interesting point: if you take a 1/4 wave section of coax (taking into account velocity factor) and solder the inner conductor to the braid, you will measure zero ohms at the far end on an ohm meter. If you try and feed rf into it, it will appear as very close to an open circuit! Should you cut that short off the end, leaving it open, it will test open with a meter, but will be a short circuit to the rf.

Things ain't always what they appear to be :)

Pay no attention to the Troll behind the curtain. It's only
Georgie-Girl posting from a Proxy AoL account that he will deny
having.

"Team Voob"? Not even close. It's just Georgie-Girl Busch WA3MOJ,
Doggie Adairierre N8WWM (a pedophile who has been busted for jamming
repeaters in his home town of Toledo, Ohio, and Frankie-Fag (who
claims to be a commercial broadcast engineer but can't even get a ham
license - must be retarded) lying about things that they cannot
control.

The real AKC = A pack of Losers. Doggie might qualify for membership
in the AKC, but the rest of you haven't a clue.

It's a crying shame that you don't make use of your precious hambands
instead of Trolling a CB newsgroup, but I'm sure no Real ham would
talk to any of you!

A short at DC isn't necessarily a short at AC.. charging a capacitor
or energizing an inductor causes an impedance at AC. When the fields
are being built up and collapsing (electrostatic in the case of
capacitors and electromagnetic in the case of inductors) an impedance
is created. Impedance is to AC as resistance is to DC.

Message-ID: <pan.2003.09.22.04.51.55.666922@hotmail.com>
Source record: 165770

well,
there are several types of each. took me about 2 hours with my kmail
client to filter them all to the trash bin.

On the way to doing this, I found that the "undelivered return e-mail"
type has a hidden self-executing code (file) embedded within it
(fortunately, I run linux, so the only affect was to fill my e-mail box
with several hundred e-mails of attached 104 Kbyte files. easy enough to
get rid of by expiring these messages into a trash folder every 2 hours
using filter sets.

still, judging by the amount of e-mails I have gotten within the last 5
days, calculating the probable number of other machines infected and what
the worm embedded actually does, it looks like 2 things are going to
happen:
1. someone is setting up a p2p filesharing network designed to pass worms
with greater efficiency,
2. the same p2p "servers" that are setup also contain irc bots designed
to listen for and execute specific commands (such as attacking whole
networks, etc).

The www.hbedv.com site rates this latest worm (Gibe.C.1) as a medium
threat and they do give information regarding what it does, in german.

still, given all this, it is not a bad idea to have installed and
currently updated A/V software at your disposal.

just some info I came across.

>work...

I have seen the security patch e-mails listed in my "deleted spam" lists on my mail filter.
I never download any such messages, and would certainly not follow links or download anything from them. It is a common trick to get a virus onto systems, to tell people it is a security patch or Windows update.

The spammers and virus writers try all kinds of tactics to get you to read the crap. The latest seems to be a suggestion that your credit card has been charged for something. If you do shop on-line, it could easily fool you.
Another one claims that someone has sent you money. To collect "your money" you must follow a link to a site. On that site, you are asked to give your credit card details... I bet it fools some people.

I just let "SMB" delete all unexpected e-mails on the server, all I see is a list of deleted mail (subject, sender and size).

Regards,

Peter.

Hi Frank.

Once again... where am I "defending" him.
I am being accused of things, so I am defending myself.

>Aren't you supporting him by defending him in his absence?

Where am I defending him?
If you look, you will see that someone said that there would be no trouble
if there was no "Twisty".
I am pointing out that they lied, the crap is continuing... they have just
chosen different targets.
In fact, they are even posting messages in an attempt to get "Twisty" to
reply, just in case he is ignoring them.

>>Not one straight answer to any of the requests for proof of your claims.
>>You cannot back up one word of your false allegations and suggestions.
>>You are the weakest link... Goodbye.
>
>And you watch too much TV.

Actually, I watch very little. That is a very famous phrase, but I never
get to see the program.
I watch the soccer with my Son (I would not be bothered with it
otherwise), but I don't have much time for TV.
I'll admit to listening to the radio most of the time... you can work and
listen, but TV demands your attention.

So, why are you wading in, and helping Mr Dopers? I get the feeling that
there is something that you are hiding. I don't see a reason for us to
argue over the false claims that someone else has made... unless you care to
let us know why you need to get involved.

Brainbuster.

Can you prove that I am a "criminal"?
Didn't think so... you cannot prove any other allegations you and your buddies make.

I see that you post more childish insults, in an attempt to deflect attention from your failings. Hey, put the 'phone down... Uncle Sparkles must be getting fed up with being called to bail your asses out every time you start burrying yourself in your own excrement.

You really are such sore losers.

Thanks go out to Excrement Cranus...puppet number 3, Mopedsissie, puppet number 2, and tra1npuppet the tra1ned puppet, the number 1 puppet of the Lords and Masters of this NG, the AKC.

Our commands to jump and speak are so well obeyed by these 3 keyclowns that it makes us snicker with glee! Keep up the great work.

You 3 get a special prize...you may sniff the bathroom floor of the 1st porno store you see. Shouldn't take you long!

Remember now, you guys are specifically ordered by the AKC to post no auctions for illegal amplifiers here. Obey us well, show you lust to be like us.

4254. Slap an auction down today!

>>Liars? Nope. Why? Because Twisty will be back.
>
>They cannot be sure of that. Even if they could, they could go into
>standby, and wait for further posts.

Which is what I was doing until you volunteered to be Twisty's defense attorney.
You have, in effect, continued in his footsteps.

>Not only do they continue, but they try to provoke him into responding.

The key word is "they". First off, who are "they"; and second, why do "they"
matter so much to you?

>Heck, they even admit that they WANT him to post some more.

That's why "they" keep demanding for him to leave, right? That makes perfect
sense to me..... not.

>Maybe he is ignoring them, maybe he is too busy, maybe his system is down.

Who cares why he is gone? As far as I know or care, he could be one of those
people still without power in NC or VA. Yeah, so he said he lives in FL, but
everything else from him has been a lie. Personally, I think he's too paranoid
to publically disclose anything about himself, even his state of residence.
Either way, why do you feel the need to make excuses for him?

>> He always comes back.
>
>
>So their "Twisty must go" CAMPaign is pointless, if they know he will not
>go.

I couldn't care less. If he stays, the newsgroup will still have their
punchclown. If he goes, he will eventually become nothing more than a distant
memory. So really it's a win-win situation. Except for Twisty. He has to make
his own choice between addressing his mental health issues or a future of
treating his high blood pressure while trolling for hammies on the newsgroups.

>>Those are the facts,
>
>

>More like an opinion.

Wrong. Twisty's perverse behavior in the newsgroup is fact, and is well
documented by none other than himself.

>> and that's why this will never end until Twisty
>>leaves.
>
>
>But, you have said that he will not... he will always be back.
>Why does someone waste years of their life chasing a goal that they know
>will never be achieved?

High hopes? I don't know. Why don't you ask Twisty for yourself, since he's been
wasting all these years trying to prove that everyone is a liar except for him,
but ends up proving the exact opposite. Why don't you play his self-appointed
representative once again and explain THAT one, Brain?

>>
>>Depends on their motivation. Why are -you- defending Twisty, Brain?
>
>
>Hi Frank.
>
>Once again... where am I "defending" him.

Well, gee Brain, I have no idea.... maybe because of your defensive posture in your replies to posts against Twisty.... or maybe because of all the excuses you are making for his absence.... or maybe by your shift from criminal defense lawyer to pleading ignorance with "where am I 'defending' him?" Actually, to me it sounded like you were attacking "George", using Twisty as a vehicle for the attack. So if your motivation was to attack and not defend, why even bring up the topic of defense lawyers?

>I am being accused of things, so I am defending myself.

Go for it.

>>Aren't you supporting him by defending him in his absence?
>
>
>Where am I defending him?
>If you look, you will see that someone said that there would be no trouble
>if there was no "Twisty".
>I am pointing out that they lied, the crap is continuing... they have just
>chosen different targets.
>In fact, they are even posting messages in an attempt to get "Twisty" to
>reply, just in case he is ignoring them.

Just a few questions: Do you believe Twisty is gone for good? Do you think anyone else believes he's gone for good? And even if someone posts absolute proof that he will never come back, how long do you think it will take for the water to stop swirling after Twisty quits stirring the pot? When was the last time you saw the name Mark Fuller posted in this newsgroup? Or Professor? Or QRM2000? Or... etc, etc, etc.

BTW, those are just rhetorical questions -- I'm sure you are already aware of human nature, and were just looking for a reason to attack "George".

>>>Not one straight answer to any of the requests for proof of your claims.
>>>You cannot back up one word of your false allegations and suggestions.
>>>You are the weakest link... Goodbye.
>>
>>And you watch too much TV.
>
>
>Actually, I watch very little. That is a very famous phrase, but I never
>get to see the program.

Count your blessings.

>I watch the soccer with my Son (I would not be bothered with it
>otherwise), but I don't have much time for TV.
>I'll admit to listening to the radio most of the time... you can work and
>listen, but TV demands your attention.

Twisty demands my attention, just like you demand the attention of "George".

>So, why are you wading in, and helping Mr Dopers?

If I'm helping him, it's not deliberate. When you attacked him you defended Twisty. Twisty does not need a defense lawyer, especially since this is not a court of law.

> I get the feeling that
>there is something that you are hiding.

My butt-crack. I've been hiding it ever since I lost my ass to patty-melts and onion rings.

> I don't see a reason for us to
>argue over the false claims that someone else has made... unless you care to
>let us know why you need to get involved.

Perhaps for the same reason that you needed to get involved. Care to share that reason with us?

Look you dorks:

1. We don't care if you call us liars about the twithed situation. You care about that, not us. We don't have to be honest with you. It shows how much you are under our control that you whine about it in your feminine, mewling posts. We chuckle at your attempts to defame us. Whoopie-doo, a group of federal criminals call US dishonest. It is so obvious that you are too dumb to see the truth. You moan like this: "Waaaaaahhhh Daddy you PWOMISED us if sissy twithed left you would stop spanking us and give us ice cream! You PWOMISED, Daddy!!"

2. Other evidence of our complete control of you keykweenz is the fact that your amplifier auctions have taken a fast 10-7 from the NG. AKC owns this NG and what you dummies don't get is that you do exactly what we tell you to do.

3. These facts and others that will become increasingly as unquestionably true, will soon be so evident that a retard could see them at once, so it follows that after the retards see them you guys will figure it out in a week or so.

There's a new law in this town, you hayseeds.

Will you please stop this? You have made this group a living hell for
everyone. Legal, Legitimate Cb'rs that come to this group to ask a
question about "how to fix my radio" or "Why is my antenna shorted" have to
wade through post after post of personal attacks to try and find the
answers to their questions.
If you see a post that promotes illegal equipment, then point it out.
If you find an illegal amp listed on Yahoo or Ebay, do what you can or need
to, to get it removed.
If you are here to stop illegal operation and equipment, please do so
without ruining for the rest of us.

Chris

4268. Geogre insanity/Gillinad howls for prayer....repeatedly

Newsgroup: rec.radio.cb
Date: 2003-09-22 14:37:03 UTC
From: twistedhed@webtv.net
Message-ID: <17318-3F6F090F-130@storefull-2316.public.lawson.webtv.net>

"Brainbuster" <brainbuster@spamtrap.lineone.net> wrote in message
news:<bjrpad$7a6$1@news8.svr.pol.co.uk>... George Is Innocent wrote in
message
<932afc6.0309101857.1d946d72@posting.google.com>... When Twisty doesn't
post...there is peace in the NG. Obvious solution: get rid of
twistedhed.

_
(Then you would turn your attention to someone else, and try demanding
that they leave.)

__
>not true at all and you know it.

What is known is what you have done, not what you claim. Your actions
illustrate the lying ld you are. Your whining ilustrates your impotence.
Your attacks illustrate your frustration. Your plethora of posts
offering your love to myself illustrates your mild retardation. And
Frank's continual crying and mention of my name each time I take a trip
illustrates his guilt and .

___
(have you READ any of TW's stuff lately? It
makes no sense and it's inflammatory.)

LOL..your frustration level is at an all time high and Frankie's
involuntary need for public prayer to myself on the group shows how his
ego has been deeply wounded........yet again, LOL.
He is quite the demonstrable character
of one who hates himself immensely and is confused of how to handle such
strong emotions. Self-hatred is a terrible thing.
The mere mention of MEMEMEMEMEMMEMEMEMEMMEMMEMMEMEMEM makes you act as
if you're five and cut yourself for the first time.
If you and Frank didn't suffer from such massive communication deficits,
just think,,,there would be none to howl at. That massive communication
deficit is getting worse by the week, illustrated by you and Frank's
mild retardations giving way to self-delusions that either of you matter
or make a difference in anything. You don't. You can't. You're both a
couple of impotent lids...LOL.

_
>Time for him to go

The arrogant power trap that bemoans your wounded ego via your glorious
impotency. I did go,,now I'm back to demonstrate your impotency is the
root of your insanity and the main reason behind Frank's immense hatred
of himself and all that do not hate those who he hates. This is better
illustrated by the fact that the only support Frank ever had is from

troublemakers like himself,,,,,,,,"Team Voob",,,LOL.

>for the betterment of the ng.

Illustrating your delusional belief and
long-failed, battle cry and failed feeble attempt at appointing yourself of one who knows what is best for others..LOL...that impotence thing has always galled you to no end..LOL.
Some day, your deficit in communications will allow you to comprehend usenet. Then again, perhaps not...you *are* quite the OM to be acting the punch-clown merely for being laughed at. Then again, you have the excuse of insanity. Frank simply hates himself and has problems with his egos...LOL. Both your egos are so heavily involved you have absolutely no choice but to take everything on usenet as personal, as neither of you were ever taught any better,,,,communication is an art form, something so foreign to the both of you, it has rendered the each of you incompetent and impotent. Period.

4269. LOL.who cleaned WA3MOJ's clock so bad?

I have never used that particular antenna, but a 1/4 whip for 6 meters
is 4.5 feet (54 inches). A cut down 1/4 CB whip should work very
well.

> I am NOT Twistedhed, Mr. Anonymous, and posting a For Sale ad from an
unrelated group is completely irrelevant, and just plain stupid. And the
ad
is over TWO years old and shows nothing to implicate me in any way with
Twistedhed or any other poster in this group. It in in no way supports your
feeble
attempts at discredit me or make me out to be someone I am not. And, btw, I
have never been afraid to use my own name in any post. I says what I means
and means what I sez.

If it bothers you so much that I oppose bootleggers on the ham bands, then
DEAL with it--it is your problem, not mine. You will look long and hard for
any
flames, insults or disrespect of anybody here because there aren't any.
Your post is similar to advertising a Chevrolet on the net and then
describing a Ford in
the body of the ad. Whatta a MA-ROON, to quote Bugs Bunny!! Now I am busy
repairing a JC Penney CB set and wiring up a mike for it, so.....

excuse me. (ho hum)

The REAL Jerry

I read that, too. I wonder if FCC will now embark upon
even more enforcement than before WRT to personal
radio services? Everyone wants "their" rights just as long as it doesn't
impede their OWN ability to step on others'.
Yeah, we MUST have the right to create interference, hinder commerce,
prevent lifesaving, run a ba-zillion watts, and run roughshod over all other
radio, right? After
all, it is only "harmless" fun, right?

Good Luck Chris! I seriously doubt he will listen to your plea.
And the beat goes on. He hasn't done anything in the real world of cb
radio. He may have offended a few on this newsgroup but that is all. I

hear amplifiers every single day in the real world and as I have said in the past, real world cber's dont even know this group exists. Funny no matter how long I stay away and come back it is always the same homosexual references and bickering. Now sometimes it is actually funny but I think this crap has gone on far too long! I guess he will get mad at me next and say something nice to me.

Allow me to provide all the proof anyone needs. Answer the following
questions HONESTLY:

1. What book did J. R. R. Tolkien write?
2. Have you ever eaten a Cadbury's Chocolate?
3. Who is Nigel Mansell?
4. Where is Spaghetti Junction?
5. What major road crosses the A38 Aston Expressway?
6. What is a Balti?
7. Where is Gracechurch Shopping Centre?
8. Who is the The St Michael trademark registered to?

> get.

There's no such thing as "illegal radio equipment", only illegal USE
of it.

> Citizens For A Keyclown Free Environment thank you.

Because you are completely impotent to do anything creative yourself.
Try using 2 meters someday, instead of jamming it, loser.

You should expend your excess energy to clean up America's highways of
speeders, tailgaters, and drunks. That would be of real benefit to
society. This is only of benefit to the selfish hams who have the
mistaken idea that somehow they own the airwaves.

You sure as shit said it was me "Who needs to suggest that Mr "Dopers" is
really the "curious" one from PA,
when he admits it himself..."" I never admitted to anything and either doug,
leland or whoever has been pulling your chain
is doing just that. Having you accuse me, he is leading you guys around by
the nose as you sit there and accuse me. funny part is
he is so succesful, your gonna tell me i am lieing. oh btw , don't think I
will continue to respond to you. I only have because of your false
accusations.

4288. toroid combiner?

Newsgroup: rec.radio.cb
Date: 2003-09-22 21:15:06 UTC
From: belowthirtymegs@yahoo.com
Message-ID: <44745a2a.0309221315.7c618dfe@posting.google.com>
Source record: 165822

I have a palomar 5 pill with a cracked combiner toroid. The dimensions
are:
.82 OD x .55 ID x .25 thick
This page seems to have what I'm looking for except I'm lost where it
says:
"To order specify core and mix."
Also I don't know if I should get ferrite or iron powder? Please help.
http://www.palomar-engineers.com/index.html

PS I already know it would be against FCC rules to use this amp at 27
MHz, so I won't respond to any replies about that.

Your an idiot, in my time we took those amps and transceivers and converted
them to 10 meters. I recall my first project as a ham was taking a 23
channel Hygain V and converting it to amateur use. It's pettily sad that you
waste your time on this stuff.

All this discussion only makes me want to drag out my FT-101EE and Henry
2.5K for the hell of it. Reminding me of the fact that I've had this stuff
boxed for over twelve years.

Haven't checked their website lately, but you might want to check on R & L
Electronics (I need to go there myself)
and look at their used equipment list. You *might* get
lucky. I don't have the addy offhand, but you can find in
Google or any search engine. Hope that helps.

Of course this is George using his AOL
proxy account, the other at UUNet is Doug.

I'll make you a deal, Mope: If you agree, I won't mention Twisty at all. I won't refer to him directly or indirectly, or even imply that he even exists. If he can do the same, great. But if he can't control himself enough to do the same (and we all know he can't), my silence ends, and you never complain about any anti-Twisty posts ever again. Deal?

Shipping, shmipping. Tubes are better.

>How much is it gonna cost me?

Depends. I need the following info:

Power in (min, max)?
Power out?
Mode[s]?
Mobile or base?
If base, output balanced or unbalanced?

>>
>> >> Not to me. I -like- the fact that he is an anonymous troll!

Yeah fine, just remember there are lots of ham clubs in Ohio just
chock full of retired old hams with time on their hands, nothing to do
but monitor 6 meters, foxhunt bootleggers, make tapes, complain to
Riley, etc. NAL fines have recently been doubled too

Not necessarily, it just depends on how they are mounted inside the equipment.
But it's mighty good for the local tire dealerships!

No, I've found a place that
has a carpet kit with sound-
proofing insulation, they are on
back order though.

Maybe you think I'm joking, but I'm not. Due to recent requirements by the FCC,
several local stations have had to upgrade their transmitters, leaving quite a
pile of wonderful old BC equipment just ripe for amateur use. We're talking
tubes, coils, caps, traps, transformers, etc, etc, etc.

So how much output power do you want for this amp?

Well, as I've said it's portable, my alternator only has 170 amps,
and I need some left over to run the essentials.

Maybe 200 or 300 watts? (unless you think more)

If anyone would know about that kind of thing it would be a criminal
sissyass like you...I heard about you from the truckers...If ya want
head around exit 10, just call steviefag on one nine.

I think all of you keyfags should bootleg my call. By the way,
steviefag...tell your wife the next time she gives me head to either
learn not to scrape or take out her false teeth.

she can't take it.

she will come to Toledo and start something, whereupon her gay self will get a lamp post shoved so far up her ass she will be able to taste the lightbulb. Of course she WOULD like that, so maybe we ought to try something else.

mopedophile is a pussy.

she threatens to bootleg a callsign because she knows she can't do anything else. keyfag mopedophile...pooow widdle sissy.

LOL,,that's not what happened at all, Frankie. You cried and howled for
a week and a half in my absentia, invoking and praying and chanting my
name on daily basis. Perhaps you thought you were abandoned
again,,,(chuckle) and it was more than your fragile psyche and battered
ego could handle. This usually leads to you taking to delusions that
only you experience, yet you insist on ignorantly fostering such
hallucinations off on others.
I responded to your
initiated posts with a single post and your mild retardation has you
creating entertainment for all of us by claiming I was "screaming" your
name..LOL...that communication deficit is really rocking your
world,,,back to claiming things that simply do not take place,,LOL,,no
matter..you live in a fantasy world,,,,when I permit it.

Because you are completely impotent to do anything creative yourself.
Try using 2 meters someday, instead of jamming it, loser.
You should expend your excess energy to clean up America's highways of
speeders, tailgaters, and drunks. That would be of real benefit to
society. This is only of benefit to the selfish hams who have the
mistaken idea that somehow they own the airwaves.

_
He can't. That would be pro-active. These pups are nothing but RE-active
after years of impotent threats.

I'm afraid the only tape she would have is of you hiding in the corner
since you no longer have the power of the AKC to protect you.

You had your chance to educate someone about an illegal amplifier and you to resort to your childish gutter talk. One of the reasons you have been expelled from the AKC.

Maybe you should have them explain it to you. You have missed the point of forming the AKC. To explain and educate, not make the AKC look like fools. Which you are doing a very good job of doing.

You have no control over anyone including yourself. The new law in town is that hayseeds such as yourself are not invited to join the AKC.

LOL...I wouldn be surprised. By posting them once in the ng, most regs
know it will cause you to reply to them, taking a simple "for auction"
post and turning it into an attention getting thread. In fact, if you
had a clue, you would realize many have listed items for sale knowing
full well they would be pulled,..why pay Ebay when they have you to sell
the item for free? In fact, they will probably be sold by the end of the
day. It's the only thing you are good for,,,,LOL.

4462. FCC fines going up?

Newsgroup: rec.radio.cb

Much of this originates with Powell prostituting the airways. Tucked neatly away from mainstream media has been Powell's reasons for allowing such action. It's directly related to the massive media corporations gobbling up all the rest. In fact, it was recently disclosed companies that own major television stations, newspapers, and radio stations may broaden their media outlet holdings, no longer restricted to the certain number of holdings they were in the past.
The sources where we receive our news are rapidly shrinking.

4463. Assclown twithed lying again

Hey turds for brains...show us the violation, this jamming you dribble about so frequently. <between shifts eating dribble at the truckstop, that is>

I just want to see one thing that n8 did that got him in any trouble at all. Show us, assclown.

It is always nice to have something be this simple. Handling your limpwristed ass always is. What a joke.

You are going to have to deal with us, twithed. You cannot stop the might of your Lords and Masters the Antikeyclowns.

Your village called...they want you back...the new idiot didn't work out.

Hey Doggie Adairierre: DNS 67.217.54.40, Toledo, Ohio. Had to be you,
you're the only one in the entire newsgroup with such a fairy sexual
hangup. You can't post anything else. Why would paetec (or anyone else,
for that matter) pay any attention to you?

_
>Hey that's not dogie, twisty said it was me

>impersonating dogie,

No,,I didn't say THAT was you,,I said you have impersonated Dogie, and
you have.

>but then again what the fuck does he know

I know that you are a sick, twisted, perverted OM that has several of us
in his mail box and that you are as imcompetent with pc's almost as much
as you are with HF radio, communication. Otherwise,,you would have
figured out how to cleanse your worm/virus. I see you threatened
Landshark with "getting something in his mailbox".LOL,,perhaps you are
now sending the viruses intentionally.

LOL, Twisty back to making up things I never said anything about his
mailbox, i said wait till he see what he gets in the mail, no one breathed
a word of any email or virus. In fact your out to lunch, I have never ever
sent any emails to you, landshark or anyone in the is NG, intentional or un
intentional. But if you got an email from me that is a virus by all means
report it to my isp along with the correct headers etc. I implore you to
report it, and i will still be here with this same isp next week next month
and so on, because your a fool and I havent made 1/16 of the posts you
asshole say I did. But in due time i will reveal who has been doing what I
have saved a collection of emails from a certain individual that should shed
some light on things.

No lie, Geogre,,,merely you sending viruses and threatening Landshark to
send him something more. What on earth would upset you so bad to the
point of placing me in your email address book for malicious purposes
and threatening others via their email, Geogre? Insanity,,,,simply
insanity. You broke long ago due your inability to cope.

You better go to header reading class you sorry excuse for a human being,
trust me your not in my address book and never will be,
and read the fucking ip you keep posting you simple son of a bitch, it has
nothing to do with me. THAT'S HOW FUCKING STUPID YOU
ARE!!!!!!!!!!!!!!!!!!!!!!

Unfortunately, the mails are originating from other infected
computers, so there isn't much that you can do. Your ISP should be
able to filter them out before they are delivered to you.

I've set the Followup-To header.

Jon

LOL! ok but how can I help it if those dummies think I am you even after I told them I am not several times. Should I restrain from using words like assclown, dickface, skirtwearingfreak, jitlip, etc. I doubt it will do any good they have it in for you they think anyone who gives them shit is you and can't be convinced otherwise. They are now making up stuff about viruses and will blame it all on george george george how can you change someone who has george on the brain. Especially Landqueen (oops see now because I called him that they will dedicate their life to george LOL).

ballwash is a new one add that to the list. say it about 5 x and Landfag
will do a google search your right it is all george, how soon they forget
about nad, dwight, frank, douggie, aaron etc it is all george....heck if I
sent a virus as the twisted one said I surely should lose my isp ...so I
can't wait... please turn me in ... Pretty please.... send all headers fully
attached to comcast abuse and specify it was a virus that was sent from me ,
anyone need the email address?

Gee shit for brains. Both auctions are still going strong. Thanks for finding
them for us ,so we could send the sellers a question, so that we can establish
an email link with them, incase it gets cancelled! You are truly an inspiration
to retards around the world! Talk about a plan that backfires!
PS...that 8 pill outta have a fan kit!
The little amp might make a decent driver.

"Got RF?"

Pardon me, oh master of RF amps, but on the schematic here:
http://www.cbtricks.com/Amp/palomar/400/palomar_400_sch.pdf
the part is "L6, toroid combiner" and NOT T1, T2, T3, or T4 (impedence
transformers) or perhaps you already knew that?

You're right twist, just checked past
the bs part and saw it was from Comcast.
I've copied it and forwarded it to them
along with the threat post.

Hey Doggie Adairierre: DNS 67.217.54.40, Toledo, Ohio. Had to be you,
you're the only one in the entire newsgroup with such a fairy sexual
hangup. You can't post anything else. Why would paetec (or anyone else,
for that matter) pay any attention to you?

_
>Hey that's not dogie, twisty said it was me

>impersonating dogie,

No,,I didn't say THAT was you,,I said you have impersonated Dogie, and
you have.

>but then again what the fuck does he know

I know that you are a sick, twisted, perverted OM that has several of us
in his mail box and that you are as imcompetent with pc's almost as much
as you are with HF radio, communication. Otherwise,,you would have
figured out how to cleanse your worm/virus. I see you threatened
Landshark with "getting something in his mailbox".LOL,,perhaps you are
now sending the viruses intentionally.

Well I would think George has
more brains than that. But to look
at the rest of the drivel he posts,
I'm not sure.

Im sorry I cant sit here and watch fagshark and tipsyhead make up lies
about george. These two fruitloops dream up this virus crap and accuse
him of it. Look at those ip numbers they post dont even match georges
for all we know they could match tra1n or tim nebo or randy but who do
they blame? george its all his fault its all george LOL.

Subject: This "Saucer Business" Must Cease
Newsgroups: rec.radio.cb
Date: 2001-12-10 01:16:15

"Lelnads current forgeries notwithstanding, my expansion to NetOne has freed me from the obligation to take the kennel club out for their daily run and I can devote my energies to let us say more rewarding pastimes such as swamp music and crawdad filigree. Oh nad and his troupe howl and bay but my ears are deaf to their throaty caterwauling. Even dogie and his cries of "saucer boy" fail to stir even the remotest hint of antagonism in me. "Saucer men"? If he only knew how wrong he was he would turn himself in to the nearest psychologist and drop to his tar-stained knees in despair. Here is a reminder of the vast metaphysical knowledge that can be arrived at if one is present under the right circumstances. I do admit that one day while motoring the channel I hit my head on the gunwale and almost passed out if it weren't for one of the boys steadying me. Later that night as I was scanning 555 for activity I heard a strange signal from somewhere uncommon. I answered and called QRX only to hear static and heavy bleed from someone's fiberglass stick no doubt. A few moments prior I had had the odd sensation of being watched but had shrugged it off as one too many Colt 45s and a day in the Tampa sun. But then from my speaker came an exceedingly weird sound. It was language, and one that I'd never heard even above 28.085 for it sounded like musical tones mixed with a throbbing tempo. Then my name, clear as day "Twisted, twisted, twisted..." was spoken. I answered unafraid. For the next several minutes I spoke to a being who identified itself only as "Isgo" and told me I had a good signal in the pile. The rest I cannot reveal in this forum as it is too high a subject matter for such a low audience, but I assure you, this is the kind of thing that dogie and the akc kennel club has chosen to sieze on and misinterpret which is why they must roll in their own feces for amusement while I am elevated to greater hieghts of knowledge"

4525. Twithed Went up to Jersey

Newsgroup: rec.radio.cb
Date: 2003-09-24 04:55:29 UTC
From: n8_isgod@yahoo.com
Message-ID: <5cd8b670.0309232055.41b258c8@posting.google.com>
Source record: 166059

Twithed Went up to Jersey----to the tune of "The devil went down to Georgia"

Twithed fag went up to Jersey
She was lookin for a cock to suck
At every truckstop in the southland
She'd plum run outta luck

Then she came across this faggot slurpin on a pekker
And suckin' it hot
So twithed jumped up on another fags cock
And said "Queer let me tellya what..."

"You suck pretty good dick my boy, but give my gay ass it's due..."
"I'll bet a gold dildo against your asshole..."
"cuz I think I'm better that you!"

The fag said "My name is trainedpuppet, and I've sucked dick since age ten"
"I'll take your bet, it aint no sweat...cuz I'm the queerest ever been!"

CHORUS
Trainfag put on your lipstick and get your weiner hard
Cuz twithed's in from F-L-A, that fucking gay retard
And if you win you get a shiny dildo made of gold
But if you lose twithed pumps asshole!

MUSICAL BRIDGE-SOUNDS OF COCKS BEING SUCKED BY FAGGOT KEYCLOWNS

Twithed opened her overnite case and took out a pink nightgown
She said "I'll dress up just right, as a faggot assed keyclown."
Then she pulled her 1 inch pecker out and the keyclowns moaned with lust
Landcarp and moped joined right in and the faggot sounds were thus...

MUSICAL BRIDGE-SOUNDS OF COCKS BEING SUCKED BY FAGGOT KEYCLOWNS

When twithed fisnished trainedpuppet said "You're a pretty decent fag"
"But sit yer ass down right there, and I'll suck dick 'til I gag!"

MUSICAL BRIDGE-SOUNDS OF COCKS BEING SUCKED BY FAGGOT KEYCLOWNS

Twithed bowed his head, he knew he'd been outclassed
Then he stuck that golden dildo all the way up trainfag's ass

Trainfag moaned "Twithed just come on back if you ever wanna try again"
"It gets boring 'round here just having sex with dogs and the same old men"

MUSICAL BRIDGE-SOUNDS OF COCKS BEING SUCKED BY FAGGOT KEYCLOWNS

THE END

Unless you can block attachments over X amount at the server end, it's useless as it will fill up your box on their server in no time. You need to BITCH to your ISP and if they say there is nothing they can do, get another ISP. My ISP (bellsouth.net) has blocked all of this crap so far.

I guess you could set up a mail reader to download mail every few minutes and delete any mail with attachments over 125K. You might miss a little stuff but at least you won't have to deal with manually deleting everything. Again write some hate mail to MS as this is THEIR FAULT for making such an insecure by default OS.

I believe he's talking about legal requirements. In which case, he's
right on both counts.

As a ham operator, I can legally build and operate my own radio
equipment. It is *not* legal to build and operatge your own CB radio.

As a ham, I can repair and modify my ham equipment legally. But if
anyone other the holder of a commercial radio license repairs or
modifies a CB radio, it's illegal.

It's true that a lot of unqualified peoplemodify CBs. That doesn't mean
that it's legal.

Dan

You no longer need a FCC license to work on cb's. That went away with deregulation back in the 80's somewhere.
The only areas requiring FCC licensing now pertain to shipboard radio, microwave radio, radar and avionics. I beleive the avionics and aircraft radio require a cert from the FAA as well.

The license is no longer required for tv or am/fm broadcast radio either.

oh I see you are playing semantic games again. Shift the focus to the
statement. No there is nothing illegal about the statement. But that
is not what we were talking about was it. We wsere tlking about the
setup jizbrain. Yes, it's true, the above setup is legal for CBers on
Mars but not legal for CBers on earth. Now the only thing left to you
is to say it is used for listening only. A Henry used for listening
right.

YOU
> ARE!!!!!!!!!!!!!!!!!!!!!

Twirt is really that stupid. A few weeks ago our
company, along with many others, were getting hit
with that silly worm that 18 year old bozo got
arrested for unleashing. Its main characteristic
was forging return address in the E-mail messages
it sent out. On some days our network fire wall
and virus detection software would flag as many as
20 to 30 messages a DAY with that crappy worm in
it sent to just my account. Checking the return
address in the messages I found them coming from
people I don't even know and have NEVER even sent
a message to that I can remember. Twirt doesn't
have a clue how the Internet works and never will.

He's too stupid to figure it out, and too dumb to
learn.

Your auction was ratted....

This item is an illegal CB radio amplifier
Appropriate Federal regulations are quoted below.

FCC rule 2.815(b): After APR 27, 1978, no person shall manufacture,
sell or lease, offer for sale or lease (including advertising for sale
or lease), or import, ship, or distribute for the purpose of selling
or leasing or offering for sale or lease, any external radio frequency
amplifier or amplifier kit capable of operation on any frequency or
frequencies between 24 and 35 MHz.

Cross-posted to: misc.transport.trucking,rec.radio.cb

A commercial license has not been a requirement to service cb radios. The FCC only states something vague like "qualified", which can mean anything. The manufacturer certainly is qualified, but none of the folks (except for me) had any FCC license at the radio shop where I worked (commercial VHF/UHF/trunking). That did *not* mean that those folks were not qualified.

I only pointed out what was said on this group. If the truth hurts so much,
go run to your mummy.

> oh btw , don't think I will continue to respond to you.

Oh yes, that famous "killfile". Very effective, huh?
LMAO.

> I only have because of your false accusations.

I provided proof and showed the posts. Even Sparkles is now suggesting
that you are the same person with his responses. Don't blame me for the
crap that you and your buddies bury yourselves in.

You, your sockos, and your buddies cannot show any proof of your claims...
just
school playground type games and diversions from what they claimed. When
all else fails, just act like you have forgotten what you said. If that
doesn't work, go back to the killfile that never worked in the first place.

Why don't you just killfile all those you disagree with?

I only pointed out what was said on this group. If the truth hurts so much,
go run to your mummy.

> oh btw , don't think I will continue to respond to you.

Oh yes, that famous "killfile". Very effective, huh?
LMAO.

> I only have because of your false accusations.

I provided proof and showed the posts. Even Sparkles is now suggesting
that you are the same person with his responses. Don't blame me for the
crap that you and your buddies bury yourselves in.

You, your sockos, and your buddies cannot show any proof of your claims...
just
school playground type games and diversions from what they claimed. When
all else fails, just act like you have forgotten what you said. If that
doesn't work, go back to the killfile that never worked in the first place.

Why don't you just killfile all those you disagree with?

Hi Chris.

As you have now spoken out against their actions, you will soon be labelled
as
a "keyclown" and targetted for the same abuse. It happened to me when I
tried telling them about their methods.
They insist on polarising the newsgroup - you must be on their side, posting
rubbish like them, or you will become a target.

I am not sure if your news reader can filter messages but, if it can, set it
to filter out those trolls cuasing the truoble and any subjects you know
will be offensive.
If possible, do it before you become a target.

Many legitimate users of this group have been chased away, but some of us
refuse to let these trolls take the group from CBers. Please stick around,
the group needs more CB posts, and you will find plenty willing to help.

Regards,

Peter.

>
>WTF? are you talking about what is your obsession with Allentown.
>What is the point of your post who made a suggestion that the word
allentown
>was never saifd. WTF are you talking about

You really have lost the plot... you cannot even remember your own bullcrap.
Here you go, this is what you said:

<QUOTE>
>I never ever used the word Allentown , queershark
</QUOTE>

But, you had also written...

<QUOTE>
> Look me up? ever drive thru Pa, near Allentown?
</QUOTE>

The point is simple... either you are lying, or you cannot remember what you
have said.

>Who lied about what your reposting a comment I made asked if he ever drove
>thru allentown,

Could you please put that in English, so that someone may understand it?

>I havent replied to you under any
>name other than this

Are you now denying using different names on the newsgroup?
Are you denying that you are the person who was posting as "Cool Breeze"
just a short while back, and have changed you name regularly for the last
few years?

Your memory is failing you, OM.

> you can play like landfag and assume everything that is posted here
>is by me,

I haven't said that everything posted here is you. However, when the IP
matches, what do you think... huh?
You make a big point of using different names, but now you deny it... if
your memory is that bad, you really should make notes of what you say.

> if so your a bigger asshole that I 1st thougth.
>I havent changed nics in weeks,

So, you now admit that you do change your "nic"... but you still do not remember ever replying to me under any of your previous "nics", huh?

As for the "Dopers" posts... I didn't need to make the claim, it iwas made by the "Dopers" character.

>Do you always blame people without proof?

Hahahahaha.

I have posted the proof... that is what is hurting you.
Where is the proof of the "antis" claims about me?
Exactly, you are hypocrites.

When you resort to the childish insults, it just shows that you have noting else to offer this group... just foul language, insults and lies.

>Jim.....I've recieved 5-6 today. Try www.mailwasher.net Great program,
>allowing you to bounce them right back. After a few of those, it has about
>stopped for me.

Be careful with bouncing spam or viruses, the e-mail address is usually faked. At best, it will go to an unattended hotmail account, set up for spamming... or bounce back from a non-existant fake address.

In the case of viruses, they take one address from the infected system's address book, put that in the header, then send to the others.
You could be bouncing a virus to an innocent person, and your ISP may get a complaint from the person who you have effectively sent a virus to. I have heard of someone being flooded with spam complaints and Mailwasher bounces, because a spammer was faking his e-mail address.

It is much safer to just block it and have it deleted on the server, bouncing is risky.

Regards,

Peter.

But, the other "antis" were not.
Rather than leave it between them and the people they had chosen to start
trouble with, you have to leap to their aid. Maybe you could see how
they were showing themselves up. and felt the need to provide extra cover
with more deflection from the points raised.

>>Not only do they continue, but they try to provoke him into responding.
>
>The key word is "they". First off, who are "they";

You tell us... they are too sh*t scared to even give their christian name to
call them by.
And then they accuse others of "hiding". LMFAO.

> and second, why do "they" matter so much to you?

They don't, but they chose to make accusations against me.
They involved me, with their insults and accusations... you involved
yourself, I had not mentioned you.

The real questions are:
Why do I matter so much to them?
Why do they matter so much to you, that you need to wade in when attention
is called to their lies and forgeries in this group?

>>they even admit that they WANT him to post some more.
>
>That's why "they" keep demanding for him to leave, right? That makes
>perfect sense to me..... not.

Exactly, their claims make no sense. You said it.

>Either way, why do you feel the need to make excuses for him?

Does he need "excuses" to be off of this newsgroup for a while?
Who should he report to, huh?

it did? Funny, the FCC still lists the General Radio Telephone Lic. as
required and in possession before you are allowed to even tough the inside
of any class D device (such as a citizens band radio)

> The only areas requiring FCC licensing now pertain to shipboard radio,
> microwave radio, radar and avionics. I beleive the avionics and aircraft
> radio require a cert from the FAA as well.
Gen. Radio telephone with proper endorsements (such as avionics, radar,
etc)
>
> The license is no longer required for tv or am/fm broadcast radio either.
bullshit! I know of way too many television stations that won't hire an
engineer without it (and the FCC didn't do away with it. it is still in
their rules.

An Icom 781 used to be Icom's radio equivilent of Ferrari. The radio, at
one time cost, over $5000. It has a spectral display monitor as well as
a plethora of features, which would make the serious DX chasing ham
envious. How or why someone would spend the kind of bucks for a radio to
use on CB, is a question which I can't find a reasonable answer for.
It's like buying a ferrari to run on your driveway.

4595. Good SSB Radio?

Newsgroup: rec.radio.cb
Date: 2003-09-25 14:06:30 UTC
From: minimoebius@yahoo.com
Message-ID: <6d6defc4.0309250606.1c0c5649@posting.google.com>
Source record: 166128

Im looking to get my first CB in a long time. I have used them in my youth and presently but have no clue whats good and whats not. I know I want one that uses SSB. I see good things about the uniden PC68XL but it makes no mention as to whether its SSB or not. Is it safe to assume all CBs use SSB transmision or no? Any recommendations?

faggotboy: why would you need keith or leland? maybe to tell you how
to dress like a man for a change?

And nope, no deal...I don't care if you can whup me or I can whup you.
Why should I care? I have much better ways to deal with the situation,
and they are on my terms. You should remember this one thing, foolboy:
Never have a conflict with someone on terms they suggest. That is free
advice from your intellectual superior.

Threatening to put my call out illegally, and saying that if you whup me I never post again, and all your other faggot mewling do show me one thing: How totally effective I am at riling you up. That in turn shows what a sissy ass faggot you are.

I told you assclowns a long time ago...call me what you want, say what you want...it doesn't bother me in the least.

You just go on ahead with whatever you want to do, sissy. Go do what you gotta do. You come up in my face you will have a lot bigger problem than a simple ass whuppin. A cunt like you is too stupid to comprehend the reality of this situation.

The PC68XL is an excellent AM only radio!

Your options for Uniden radios (which I highly recommend) are few. I
would try to find a Uniden Grant XL or the Uniden PC-122.

Yes there are Galaxy and RCI radios....you get what you get with those.

Yes my killfile is very effective it is called self discipline,
I havent responded to you for over a year. Until you start making false
accusationss as usual.

What proof have you provided? I have no buddies on this Ng, again making
accusations without a stitch of proof.

>
> You, your sockos, and your buddies cannot show any proof of your claims...

Why dont you take your own advise, besides I do, you have been in my
killfile for over a year, I dont know what you mean by socko's. I use the
same account, IP ADDRESS EVERY SINGLE DAY
You and your ilk have not 1 clue, and I repeat you dont have 1 clue as to
who is posting what yet you blame george, it actualy is a running joke.

No one is mixed uup here except you, the person who is using words like me
etc has said many times he is not me, and I have said it is not me, yet you
lie
and continue to make fale accusations every dy look at how many times you
post to this ng today alone. Why not take your own advise and killfile those
you don't agree with? I know why you like the confrontation.

Thanks to the Fed's, we now have "qualified" techs in all corners of the country. Hell, they're in every truckstop out there or close enough to be in one. Now I ask you, with all that "qualified technical prowess" why do so many cb's sound like shit?

I dont wanna hear about operator error more than once.

Both you and your ultra-conservative hero Rush Limbaugh must be very proud. You
should stop by your local VFW post and tell them all about how you are doing
your country such a great service by blatantly thwarting the law. I'm sure you
will get a warm reception.....

LandShark wrote:
I think his point John, was that if you don't
like what you're reading, take a hike. If he is
invading on you're freq. band, then you have the
right to moan & groan about it. I personally don't
give a SHIT about you or most other Cb'ers. If I knew
you, or you had something to contribute other than
crying and whining about "Linear" "Outbandders" then
I might give a shit about you. But otherwise you
could die right know and I wouldn't loose a second
of sleep.
So quit you're whining about "Legalities" and contribute
something along the lines of " A superior antenna system would
serve you better than a linear" or " I don't approve of the use
of linears, but I can tell you how to get the most out of what
you have" Then a lot of others might not harp about you as
much.

You do sound just like a "HALL MONITOR BOY"

You missed the point, assbucket. Brainfag said that AKC has chased
away legit users of the NG. If Dave, Jerry or Alan S isn't a legit
user, then who is? Just goes to show another brainfart lie debunked.

> false accusations... probably under a different name, and account.

Here is brummybusters main problem: hypocrisy. He spends all his time complaining about georgegeorgegeorge and how mean N8 is to the poor keyclowns etc. but NOT A PEEP he uttered when Twithed was attacking Dave Hall or Leland Scott for nothing more than a difference of opinion. That's right, neither Dave or Leland deserved to be called names or accused of retardation, child molestation, incest, etc. but good old Twithed went nuts in the NG and NOT A SINGLE COMPLAINT from Brainbuster about it. But when N8 comes in here and gives some chains a few well-deserved yanks, oh, BRAINBUSTER RUNS TO THE RESCUE. "Waaa waaa waaa" all he can do is complain about N8 and georgegeorgegeorge. He deserves thre title of CRYCLOWN.

Believe it or not, I use an Astatic D-104 with the amplifier darn near
completely off.
Find a used one at a hamfest for 40-50 bucks. My brother, KK4TI, had one
wired with an 8 pin plug for his IC 725. He sold the 725 and I bought the
D-104. The price of the adapter cord aint so bad if you can buy a decent mike
at a good price.

I would also suggest a Shure 526-T. That mike has been my warhorse on about
12 different rigs, with excellent results.

4697. FREE CB CRYSTAL MIXING CHARTS

Newsgroup: rec.radio.cb
Date: 2003-09-26 04:34:06 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <rdg7nvse8kv7o9r8f4304l774lnh4sf1fo@4ax.com>
Source record: 166229

We've now added all our crystal charts for free download/printing (PDF) on our site. These 36 charts cover about 95% of all American mobile & base CB models, and show exactly which crystal(s) affects which mode or channel. Very useful for troubleshooting "dead channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB accessories. Please visit our Web site to see all those "goodies" you just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form from the home page. We've also got a new Email Order Form (for VISA/MC) if you're in a hurry.

That's really good info Shark, and news to me.

I doubt his brother -really- knows what a true asshole
dogie is.

I'm fairly sure dogie's brother would of dis-owned dogie by now. (?)

Clearly a troll post. OFF TOPIC and nothing to do with radio.

Any protests or complaints from Brainbuster about this?

(SILENCE)

Any protests or complaints from Hypocrite Landshark about this?

(SILENCE)

No. That's because they are h-y-p-o-c-r-i-t-e-s.

H is for the hairless balls that Landfag enjoys
Y is for the lies that Moped employs
P is for pussys they are so queer
O is for opinions they hate to hear
C is for CB they never discuss
R is for RichCranus, oh what a wuss
I is for ignorance, they have it in spades
T is for Twithed and his loony tirades
E is the emails they lied about from george
S is the rest of the crap that they forge

....put it all together and it spells HYPOCRITES, HYPOCRITES, HYPOCRITES!

Generally, if it doesn't say that the radio has SSB capability, it
most likely doesn't. Uniden makes some good radios in both styles; the
PC122 and PC244 were good and had sideband. Or go back a little
farther in time and get a good used Cobra 142 or 2000, or a Uniden
HR2510 all-mode.

More importantly, don't cheap-out on your antenna!

Actually, the only AKC charter member who doesn't have a hambo ticket
is Frankie-fag Gilliland, who claims to be a commercial broadcast
engineer. HAR! Georgie-girl Busch is WA3MOJ, an alleged Extra that no
ham would talk to; Doggie Adairierre is N8WWN, a no-code Tech and a
known repeater jammer and pederast. High-quality, licensed lids!

Source record: 166251

An Icom 781 used to be Icom's radio equivilent of Ferrari. The radio, at one time cost, over $5000. It has a spectral display monitor as well as a plethora of features, which would make the serious DX chasing ham envious. How or why someone would spend the kind of bucks for a radio to use on CB, is a question which I can't find a reasonable answer for.

_
Gee,,no suprise there,,,you put forward all kinds of things of which you can not present a reasonable answer for.

_

HAhaha,,,,the hammie that shark responded to was so far off base, no wonder he disappeared from this group..he must have been tired of being corrected. Why is it that some who are licensed for communication suffer the greatest deficit in same?
The band wasnt invaded by linears "first",,as Kaput-man claims,,,it was invaded by HAMMIES with their multi-band capabilities LONG before amps became plentiful on eleven meter. In fact, I am surprised a hammie would post such incorrect ignorance as fact AND place his call to such (shrug), but hey, look who took to swimming in the google fecal matter and decided to bring this voodoo bullshit to the group. Check that,,I'm not surprised in the least.

Good Luck Chris! I seriously doubt he will listen to your plea.
And the beat goes on. He hasn't done anything in the real world of cb
radio. He may have offended a few on this newsgroup but that is all. I

hear amplifiers every single day in the real world and as I have said in the past, real world cber's dont even know this group exists. Funny no matter how long I stay away and come back it is always the same homosexual references and bickering. Now sometimes it is actually funny but I think this crap has gone on far too long! I guess he will get mad at me next and say something nice to me.

I am upset! As therapy for being a$$ clowns, the AKC must have the auction
so they can get over their severe mental problems.

4740. Help!! Please help with this old Cobra Rig!!

Newsgroup: rec.radio.cb
Date: 2003-09-26 20:30:59 UTC
From: Mark <newsposts@myrealbox.com>
Message-ID: <7m1db.1208$IV1.11147285@news-text.cableinet.net>
Source record: 166274

Hi,
I have been given a Cobra 148GTL-DX. It is old but seems to be in working condition. It has the following knobs in addition to the normal volume/squelch etc.

1) BAND - Low mid and Hi.
2) Another knob labelled:- CW,FM,AM,USB,LSB.
3) a FINE AND COARSE CONTROL.

The cb has its own swr meter also.

Questions:-

a) Can I use this at all on any of the GB or EURO FM Bands?? (I seem to remember many years back certain AM channels crossed over to FM ones???)

b) If a) above is not possible is it fit only for the bin or are there further bands/channels that would be of use to explore.

c) Yes I do realise this is not a "Legal CB"

d) My main reason for using this is to give it to a mate as we will be driving to Italy shortly and I have a standard new Cobra 29 LTD (Great rig by the way) so even if I could only get a few channels to work between cars with normal 4 watt distance limitations that would be fantastic.

Thank you for any replies.

Regards
Mark (GB)

Greetings,
I've got me an RCA CB Co pilot 14T303 with a workman BS-1 dipole antenna pinnes up in an inverted v outside my window. I recieve just fine, but my transmit is horrible. I can't get a radio check from any of the truckers up on the interstate (1/8 mi. from my house). I get a barely audible signal monitoring from the other side of the house. When I transmit I'm getting only the tiniest nudge on my s/mod meter. Is my radio shot? of is it just the cheap antenna?

Any help with this dilemna would be greatly appreaciated.

That's OK...you are just getting deeper into the corner. Next there will be ringers buying amps from assclowns like you and taking the info to the FCC. Bray and crow then, keykween.

By the way, your name reminds me of that chimp, Cheeta...remember? The Tarzan movies were cool and Cheeta was always drunk, goofy, and stupid. I get this auditory image of Cheeta's cry when I see you post? Just a monkey makin' noise to assuage his fear.

Keykweenz, living proof that the indians did the buffalo.

Invaded?
I think not. the Federal Goverment gave 11 meters to the hams in the first place. however, due to problems with the technology of the times (30's, 40's and 50's, the band was an electronic dumping ground for everything from low poer remote control to medical diathermy machines. it didn't see a lot of use and in 1959, the FCC saw fit to reclassify the band for class D service (business use). at the time, the rules they dictated did not account for solar effects and the like.

it wasn't until the early 1970's that the cb craze took off 9and with it came the dirty amps and the potty mouths). in January of 1981, the FCC did away with licensing on the band (though they did not reliquish any of the other regulatory functions there-in).

so, the way it stands now, the 11 meter band is still a dumping ground, it just has a different sort of garbage in it now.

You might try actually reading the FCC Rules & Regs someday, faggotboy. Amps are not illegal; I could have an entire closetful of amps and not break any law. The section in the CB Rules about amps has TWO paragraphs. Possession is only one.

There ALSO has to be evidence of use. Read it and weep, repeater jammer!

And how about acting your feeble age for a change?

"Doc" isn't a target because he posts real information. Jerry Ox isn't
a jack@$$; he has a point to make, but he doesn't TROLL the newsgroup

like you do.

> > I am not sure if your news reader can filter messages but, if it can, set it

Why don't YOU? Because you're a mental midget. As well as a repeater
jammer. A 'Ham"? Nope, you're nuttin but a trouble-maker.

> > If possible, do it before you become a target.
> > Many legitimate users of this group have been chased away,
>
> really? is dave hall a legit user? how about jerry oxendine? or alan?

Nobody that isn't a CBer is a "legit user" of a CB newsgroup, fagboy.
Try spending your time cleaning up your precious ham bands. Oh that's
right, you're only a "no-code" Tech. You have nothing to say about CB
or anything else on HF.

Using Landwhales logic: richard cranium is twistySearched Groups for
impotence group:rec.radio.cb author:twistedhed. Results 1 - 10 of about
67.

Google search of the word "impotence"

From: Twistedhed (twistedhed@webtv.net)

What is known is what you have done, not what you claim. Your actions
illustrate the lying ld you are. Your whining ilustrates your impotence.
Your attacks illustrate your frustration. Your plethora of posts
offering your love to myself illustrates your mild retardation. And
Frank's continual crying and mention of my name each time I take a trip
illustrates his guilt and .

Subject: Re: Something wrong with Frank..
Date: 2003-07-02 12:19:42 PST

Now, now,,,that you get so angry over your self-embarrassments is no
reason to shout your impotence and ignorance in quest for censorship of
that of whcih you disagree or can not comprehend. Your attempts at
silencing views you oppose may make sense in Iraq or to some of those
who support the Taliban and terrorism, but I assure you, such tactics
that work in such Godless and freeodm-less countries won't fly here. I
suggest you find a venue that will cater to such anti-American views you
espouse, as opposed to the foot stomping and crying over your impotence
at controlling that of which you do not like.
And try not to allow your detriment of personal feelings to further
retard your ability to remain on topic. Ditto for your experiencing
feelings of inadaquecies and no self-worth.

He posts using Comcast, in both Allentown and Trenton (NJ). And as Valco he posted as Aanal Aaron H. Voobner by way of AOL. It appears that he has to keep changing his access to keep hiding his various NICs.

Frankly, I don't care, if only he'd post something worthwhile instead of complete bovine excrement all the time. But Georgie-girl can only troll and snipe like the coward he is. Too bad he gets all his courage from a bottle.

Killdagger,
Actually it could be either or both. There are a number
of things that could be wrong, but starting with the radio,
try another antenna to see what happens. If the output is
good then I'd take a look at the antenna. There's nothing
'wrong' with using a dipole, they're good antennas (no matter
what they cost). If the 'match' between radio/feed line and
antenna is bad it usually will reduce the signal you transmit
but will very seldom reduce it as much as you say is happening.
Another thing you might consider is the polarity of the
dipole. Hung as an inverted 'V' it will be horizontally
polarized, which will further reduce your signal (if the guy's
antenna on the other end is vertical). That only happens at
fairly short distances, on long distances the polarity changes
after the fist 'skip'. After the first 'skip' you really don't
have any idea of what the polarization is...

Found a really good schematic for a 6m linear on the bottom half of this page:

http://www.aimcomm.net/sparky/p987.gif

Notice the excellent bias regulation, the filament tied to the cathode, the filament supply choked and bypassed.... all good examples of proper RF engineering practices. Now if you take a look at Skippy's site... LOL!

And to keep this post somewhat on-topic, the top half of that page has a really cool tube LOWFER transmitter, in case anyone is interested. One watt, a range of 50+ miles with a good antenna, and no license required!

If this is such a killer antenna why doesn't every ham scramble and build one
now?

By the way...Arnie Coro is a better man than anyone needing to post stupid
comments about an antenna no one gives a damn about in a news group.

Bottom Line: No one really cares about your bullshit, Chip. Take it to the ARRL
and see if you get published in any real sense. Better yet...why dont you go to
one of the publishers that let you publish anything you want as long as you pay
all the costs? That way your great grandchildren can curse you as they haul all
ten thousand copies that never sold out of your attic when you croak.

I think you, your cohorts AND your critics all oughta get a life. Go play with
your radios, quit spreading your sewage, shut up, grow up, be amateur radio
operators.

The subject, the attitudes, the whole thing...utterly goddamn useless. Use some
of that intelligence that gave you the ability to earn a PhD and accept it
sometime soon...maybe after a long few minutes of looking in a mirror.

It doesn't bother me. I'll always have George as a troll, he just can't stand it when I don't care about his lies. Unlike him, when he post his BS, I don't jump up and down. But when I post the truth about his AOL account, notice the insults start to fly.

I guess it wouldbe too much of a stretch to think Doug is using the aol
account. you confirmed it with a repost of some of his posts
If I was trying to hide my identity posting thru aol I sure wouldnt use the
exact phrases I do when posting thru comcast, that actually is the funniest
part,
you think your so smart yet you are having the wool pulled over your eyes
right in front of you yet it is george george george, if you think it is me
posting from aol by all means complain, as usual to them and have the
account TOSed, you have my permission.

4775. Re: PEP vs RMS vs ERP

Newsgroup: rec.radio.cb
Date: 2003-09-27 06:08:23 UTC
From: Jim Hampton <aa2qa@frontiernet.net>
Message-ID: <rP9db.2074$BK4.1078@news02.roc.ny>
Source record: 166307

Eric,

As a former holder of the 1st class radiotelephone license, 2nd class radiotelegraph license, radar endorsement, etc, I have a fair knowledge of the regulations. The only regulation for broadcasting is that the chief engineer (yes, I used to be one of those too) has to hold a General Radiotelephone Operators' license. Yes, they as for "qualified" folks to work on cb and other radios (outside of amateur service), but don't really state what "qualified" means. Today, the standard appears to be an organization which I can't remember the name of off hand (although I was a member of it in 1971). They have tests similar to the ones the FCC used to have for the 1st class radiotelephone (although the example I saw was around 1990 and I suspect they have changed considerably now that digital TV is starting and analog TV is going away). That is the current "ticket", not the FCC license (although, as I mentioned, the GROL is required of the chief engineer - at least it was around 5 years ago). Ah - I just remembered: SMPTE, the Society of Motion Picture and Television Employees. I believe that is the major "in thing" now. The FCC simply makes the licensee (not the repairer) responsible for proper operation.

OK
No problem I just wanted you to know that in the real world you dont
exist. I might be even getting rid of some more next week. Easy to
sell no problem at all and hey if I hadn't have posted it on this
board you wouldn't even know how many pass through my hands. Hint:
about as many as you guys make homosexual innuendos.
Now that is alot! I key everyday now whatcha gonna do about that?
Have a great day!

There will be alot of skip today. Many amplifiers will be keyed down today on the superbowl and many other cb channels. 2 pills 4 pills 8 pills 16 pills and even a good many tube amplifiers and hey that is just the mobiles. Base stations will be keying down as well.
Just thought I would let you know so you boys could get together and maybe get frustrated and talk bout homosexual stuff and who knows maybe whack each other off.
Have a great day I know I will. Keying down and loving it!
If I dont have too much fun keying down I might be back if not you know I am having too much fun!

Leave those poor boys alone, they don't know what to do unless it is an
auction. You are confusing them. Give the AKC a day or two to absorb all
this information about the world not revolving around auctions. LMFAO!

4784. Looking for a HOMEBASE ANTENNA, NEED ADVICE.

Hello All
I am an English guy who has moved to California, I have a Galaxy SSB base station, but, I really would like a good antenna, I had a great SIGMA 4 made by Avanti many years ago in the UK, but dont see them anymore.
Hate dipoles, just want a big stick in the air rather than reflectors jutting out.
Whats the best on the market>?
Is there a 7/8 available?
please help.

LMAO!!! Yeah, just like George has never
posted under one account, then answered the
same post under another, yeah it's Doug LOL!!
George got busted, otherwise why make
such a fuss about it? I don't when he makes
posts BS about me.

OK look all I know is that Landshark is

-gay, proven to be by his posts in the TS groups which are confirmed
-hypicrite, he complains about georgegeorgegeorge but not about
cowboy,cranium,chimpbuba, etc
-dumb, he can't figure out the headers do not show any comcast ip on
them
-a liar, a total dickhead liar who makes shit up including who george
is or is not
-a criminal, who gives excuses about being free in order to break laws

do you agree or disagree

Bad example, Georgie-girl: You posted the above "queer" comment, not me or even Landshark. OK, so you are now admitting that you not only lie but also post sexual innuendo? So you're no better than Doggie Adairierre? Better crawl back into your bottle!

Oh, and how about posting the entire message instead of selectively editing to make it look different than the reality? Not only a liar but a coward, I see.

He's trying to divert attention away
from the fact that I busted him multiple times
using his AOL account. He and Doug are the ones that is almost always talk that trash, they
can't talk tech, that's the reason for trash

talk.

That you found posts made from my account,
that you found that my name was "Jason Halverson" which proved that a former
friend & co worker was doing it. It's to hard
of a pill for you to swallow, so you're bitter
about it and all you can do is throw insults,
vile language, false accusations.
I don't bother with the BS you post,
just because of that.................. It's BS.
But the more you jump up and down
about you're use of an AOL proxy link,
it proves me correct.
Now into the file for your new nic.

Yes, Jason Halverson, there is that funny name again, ROFLMAO, this mythical person. Friend or Foe, nothing was proven except your a friggin transexual plain and simple. Now that has been proven, I know it is a hard pill to swallow but knowing you you have swallowed some things I care not to mention in your day.

I am an Eagle scout from the Modoc Area Council in So Oregon and No, Calif.
I
have many council patches and OA flaps from around the country, and need to
sell them due to family emergency. The most unique patch I have is the

Makualla Lodge trader OA flap from 1984. The regular flap had a no-trade restriction and there were only 600 made of the trader flap. Also, if anyone has any price guides, I would be interested in seeing a recent copy to establish value. I've been overseas for the past 4 years and haven't had a chance to catch up yet.
Thanks in advance.

I just got a used Panasonic CTP-2780SF, and when I switch from the coax input to VIDEO 1 or 2 with the remote, the words VIDEO 1 (or 2) stay in the upper right corner after the time disappears. Anyone know how to make the VIDEO disappear too?

Is there any easy way to userID and password protect individual pages without access to the <root> on the server, which they won't give me. I've tried CGI, my server doesn't allow CGI scripts. I've tries .htaccess, won't work. I've tried everything I can find. Is there a html code that will look into a file in my directory on the server for a text field for the username and password?

Oh sharky you have been caught in so many lies and back peddles regarding Jason, first he used your terminal than got all your info, then started making posts, but why would he use his name with your email address? That was back in 1995 you trolled the alt.TS groups many years later, in fact while you were going on a trip you solicited a transexual for a date. You keep digging a deeper hole with every lie, btw jason doesn't have any idea who you are remember I called him looking for a former co worker mark beck....

"Landshark" <S3Buell@SBCGlobal.Net.> wrote in message news:WB_y8.2769$lo3.1767424141@newssvr21.news.prodigy.com...
> Nope, he doesn't Tim,
> If you haven't noticed he changed his screen
> nic some 4 times in the past few days since I did
> mention that about him. Now you can track his posts.
> So it's obvious that he is here only to harass and
> accuse everyone. Hey, if you remember Tim he
> said I was Jason Halverson, put the post up
> where Jason (Whom by the way I used to work with)
> Used my terminal, got all my info and started making posts.
> George proved it, then started back peddling right away
> when I show him that.

LOLLOLOLOLLLLOOOOOLLOOLL Woooo It just gets better and better But since I am killfiled Landshark will never see this post right? Why have we never heard that Jason was Fired when was he fired? You did say "we" figured out that he was doing it, LOL Yet you say he was caught and fired
Now why did he never mention this about Jason , Boy Landshark still making excuses arent you. If you didn't try so hard to convince people that you were not guilty perhaps there is a miniscule chance they would say hmm maybe this guy is well telling part of the truth. But Landwhale, too little to late, you should have made this story up in the beginning when we asked you about Jason Halverson it was never ever mentioned that he was fired and used other names etc. More Damage Control for Landshark the Fag. Since he will never read this i am killfiled it is all in vain I guess... Let,me know about the Buell dealership next time you go there bikers hate fags but then again san Fran loves fags...

BTW, I just got off the phone with Jason Halverson do you wanna know what he said.

Using the computer at work for posting to a newsgroup? Does your boss
know about this? Does your boss know about your secret identity?

> The Landshark

So let's see .... you are saying that you didn't write the following
in rec.radio.cb?

==========

From: s3sharkman@hotmail.com (s3sharkman@hotmail.com)
Subject: Re: difference in amplifier class
Newsgroups: rec.radio.cb
Date: 1998/09/27

Yeah, but unfortunately, the cost of living
has increased 4 fold in the past 15 years.
Yes that doesn't warrant that much of
an increase, but it does warrant an increase.
Now for Harley's, you pay for the name,
plain and simple.............

The Landshark
"The Mets are not having a Buell-tiful day"
"But the Niners are having a Buell-tiful day"

==========

98 S3 Thunderbolt powered? s3sharkman@hotmail.com? And that Jason Halverson -just happened- to be using the same email address? Both of them?

==========

From: Jason Halverson (lndshark@ix.netcom.com)
Subject: Swap File and MaxPhysPage(in system.ini) settings
Newsgroups: comp.os.ms-windows.setup
Date: 1995/05/28

I need to know the proper MaxPhysPage setting for the system.ini for WFWG 3.11. I have 20Mb of physical RAM (20352Kb). The format is: MaxPhysPage=<hex page number>, where <hex page number> is the maximum physical page of RAM. I read that windows only recognizes the first 16Mb of RAM. I have an 11Mb Perm Swap file, but when I start windows, I have only 23Mb free. Any help is greatly appreciated.

==========

Isn't that the same email address you used to post many messages in rec.radio.cb?

Subject: Patches for Sale.....
This is the only article in this thread
View: Original Format
Newsgroups: rec.scouting
Date: 1996/02/05

I am an Eagle scout from the Modoc Area Council in So Oregon and No, Calif.
I
have many council patches and OA flaps from around the country, and need to
sell them due to family emergency. The most unique patch I have is the
Makualla Lodge trader OA flap from 1984. The regular flap had a no-trade
restriction and there were only 600 made of the trader flap. Also, if anyone
has any price guides, I would be interested in seeing a recent copy to
establish value. I've been overseas for the past 4 years and haven't had a
chance to catch up yet.
Thanks in advance.

Here's a post to rec.radio.cb in July of 1999. Some of you may remember it. Landshark posted quite regularly to the group. Just do a search at Google and you will find lots. There's no doubt it is the same "Landshark" we all know and love. Here's just one example:

==========

From: s3sharkman (s3sharkman@HOTMAIL.COM)
Re: Where are all the big boxes?
Newsgroups: rec.radio.cb
Date: 1999/07/16

Well dana my man (or woman) I know the every mighty
F.C.C. won't mess with me. I've been running power
since the early 70's, and never had any problem.
Plus it's gonna be kinda hard to figure which house
it is, considering that my 3 immediate neighbors all
have antennas.
My original post really had nothing to do with
the general population, it was about guys like
Dennis, Sean, Toll-free, Painkiller, etc., etc.,
Hell even the Professor doesn't come out
anymore to throw in his one liners.
I just hope that all the wanna-be lawyers die
the death of brain cancer or some slow debilitating
disease.

View: Complete Thread (5 articles)
Original Format
Newsgroups: alt.sports.football.pro.dallas-cowboys
Date: 1996-09-06 19:41:41 PST

If anyone knows, what is the status of DT Chad Hennings #95. I know he gets in a bit, but is he starting or what? I missed the opening game because I was at work. Chad is the reason I became a Cowboys fan in '92, because I was stationed with him, we were in the Air Force in England. If anyone can tell me the outlook on his use for the season, I'd really appreciate it.

Thanks in advance.

There is also a limit on your freedom when you harrass people because
they disagree with you, which is all you twits can do. You are totally
impotent, Frankie-fag. Why don't you have a ham license? THEN you
might have some right to whine about things that you can't control.
Until then you have the right to control yourself, and nothing else.
Since you obviously cannot get a license, you're either a total moron
or a convicted felon. Which is it?

> >> > So, take your commie beliefs

> >> say that keyclowns are just a bunch of cry-babies....

Nope. YOU are the crybaby. You can't have it your way so you whine and
whine and whine and

> >So what you are saying is that you respect every aspect of the law?
> >Yeeaaahh, Riiiight. I beleive that. I'll even bet you have the law book
> >sittin' right next to you so you can reference every breath you take so as

> people, if any, can live their life and not break a few laws. But the difference
> is that most of us don't do so intentionally (except maybe for speeding, but I'm
> one of those slow-pokes that speeders hate to get stuck behind). And even -then-
> there is a difference, since speeding is not a federal law, nor does it carry a
> typical fine of several thousand dollars and a maximum of $17K (I'm not sure but
> I think it recently went up to $25K).

Posting nonsense again? What ever happened to knowing what you're
supposedly talking about? Oh that's right, you're an ackowledged liar;
you don't have to know what your talking about. You can just harrass
and spam and lie and

You don't gain a bit of respect that way, Frankie-fag.

> >Get real, get a life, get an ole lady, cause you need a piece of A$$ to take
> >away some of your tension in life so your not so worried about piddly a$$
> >$hit like this!
>
> If it's so "piddly", why are you making such a big fuss, Cryboy?

No, Frankie-fag: It's YOU that are making such a big thing about it,
crybaby.

They're just ignoring KeyBoardClowns like yourself.

P.S. In case you didn't realize it. KeyBoardClowns have no
effect on radio operation.

4830. [Technical question] Colt 480 needs repair

Newsgroup: rec.radio.cb
Date: 2003-09-28 07:27:39 UTC
From: ipsilone@softhome.net
Message-ID: <1f8cfe21.0309272327.1436c118@posting.google.com>
Source record: 166364

Hello,

I bought an old Colt 480 to use in my car (40 channels, AM/SSB,
Circuit Board PTBM048A0X, pll-02A, 2sc1969 final) but it doesn't work.
Here are the symptoms:

1. When I turn on the radio, it seems to change frequency during a
couple of second before it stabilize.

2. The red led light up on transmit but there is no power on the
built-in meter nor on my external meter. I can not hear myself in a
receiver when keying in a dummy load.

3. When I turn the channel selector, the channel numbers change, BUT
the radio stay always on the same frequency.

4. The clarifier doesn't work.

5. The only thing I tried is to change slightly the position of the
VCO core. I can receive other frequencies by turning the core.

6. The frequency seems to be unstable when receiving.

A visual inspection inside show no sign of abuse, repair, mod or
damage. All wires seems well connected.

Do you have an idea of what I do?

Eric Merlen
ipsilone@softhome.net

Funny isn't it Mopar, for a person
that doesn't even post on this group
why does this person jump up and
down each time his call is mentioned?
You would think he would call him,
send him e-mail, snail mail, something
like he has claimed to do with me and
others here. Oh I forgot..... self addressed
envelope, e mail keeps coming right
back to him, phones # the same as his.

ROTFLMAO!!! George Busch

The Fugitive wrote in message ...
>BrummyBuster went wild today look at how many replies he made

No more than you made on the 24th, under the name of "Curious Dan"... count them.

Unlike some people, I do not post every day and do not sit on the Internet all day... so I post them all at once.
As I had not posted on the 23rd or 24th, but posted them all on the 25th, how about if we count how many you posted in that period when I posted 14 messages...
23rd: 13 messages
24th: 14 messages
25th: 6 messages
TOTAL = 33 messages.
33 to my 14... who's going "wild", huh?

As for the multiple posts on one thread, I am not responsible for faults with my ISPs servers... even you should be able to understand that. The server refused to acknowledge receiving a message, so my software kept sending it again.

> then he has the balls to tell someone to killfile people...

I thought that you had "killfiled" me... you just cannot help yourself, you even have to start an extra thread about me. Look at my header and ask yourself if my news reader can block any messages from being downloaded, as IE6 could.
I can hide messages with certain subjects, such as "For Sale", "FS", etc... and I do.

> LOL watch he will come on hear and rant and rave and make
>more false accusations...

I posted proof while you and the other "antis" refused to provide proof of your claims. In the end, the best you can do is childish insults and foul language.
YOU are ranting and raving, and making false claims about someone you claim to have "killfiled"... you still haven't given any proof of any of your claims.

> probably under a different name, and account.

When I first came on the Internet, in 2001, I was known by the same name as now... Brainbuster. I have kept that name from the day I came on the Net, even when I changed ISPs (because the old one had such a bad server), I still kept that name so people would know who I was.

You, on the other hand, keep changing your name in an attempt to hide who you are. You have often used more than one name at the same time.
It is not me who hides behind many names and accounts... that would be you and the other "antis".

I think you are looking in the mirror, and describing yourself.

I only showed what someone else posted... care to take it up with
them?
Didn't think so.

>Yes my killfile is very effective it is called self discipline,
>I havent responded to you for over a year.

Are you denying posting as "Cool Breeze"?

>> I provided proof and showed the posts. Even Sparkles is now suggesting
>> that you are the same person with his responses. Don't blame me for the
>> crap that you and your buddies bury yourselves in.
>
>What proof have you provided?

Try looking... it is there to be seen.
Or, would you like it again?

How about if I post a monthly reminder of the "akc" lies and false
accusations, just so you don't forget?

> I have no buddies

That really does not surprise me.

> again making accusations without a stitch of proof.

Again?
Are you blind or stupid... it has to be one of the two. I have posted proof
of what I said... you want a coppy e-mailed to you? You could print it out
and pin a copy to your wall so you do not forget it next time.

>> Why don't you just killfile all those you disagree with?
>
>Why dont you take your own advise, besides I do,

So, how come you still argue with Landshark?

> you have been in my
>killfile for over a year

Are you denying being the "Cool Breeze" who responded to a post of mine by saying he would "killfile me"?
Or, are you losing track of time... that was just last month:

Cool Breeze wrote in message <4ZGdndbPb5-grdmiXTWJkg@comcast.com>...
> tell him he is killfiled

> yet you blame george,

Where do I blame "George"?
I showed a message where other people call you George, and where someone claimed to be you.
Why not take it up with "Dopers", he seems to believe he is you... go ahead and give him some "what for".

Such anger... you really should take something for that pain.
Maybe you recognise yourself as being one of those people I mention... which one describes you?
Here's a reminder of your policy on truth and proof...

So, take your own advice, hypocrite.
Until then, take a look back through the posts on this newsgroup... and figure it out.

>I feel sorry for anyone who has to live in birmingham

Nobody **has** to live in Birmingham. Although nobody choses to be born there, they must choose to stay.
I feel sorry for anyone living in a city.

From where I am, I have a great view overlooking fields and several counties.
With a CB, I can talk for miles with just the legal 4 Watts FM we are allowed. Never mind the 3 or 4 miles you city folk seem to get... I get mobiles 15 to 20 miles away in the green, near the end of the scale.
Some CBers on the East coast have QSL cards from people in this area... sweet.

AKC 4 LIFE wrote in message ...
>
>Clearly a troll post. OFF TOPIC and nothing to do with radio.
>
>Any protests or complaints from Brainbuster about this?

Can you not complain for yourself?

You must realise that I do not use this group all day and all night, as some of you (with no life) may do. So, when you posted your "no complaints" post, I had not even seen the message. You should understand that this is a newsgroup, not a chat room, so instant replies are only expected by those too stupid to know the difference.
But, any reason to call people names, huh?

Also, do you expect me to read every message and follow every link in this newsgroup?

As for links placed in newsgroups, I am surprised that you have not yet found out how important self control can be. I learned that lesson within my first month or two on-line, when I assumed that a link on this group would be a CB site... and had to push my eyes back in their sockets when they popped out.
Links placed on newsgroups could lead to porn, illegal sites, dialers, worms, viruses, or other offensive material. So, some of us exersise caution.

As I have not followed the link, so have no idea what it leads to, I will let people who do follow it judge for themselves if they consider it off topic. If, as suggested, it is a picture or info about of a fellow radio operator, especially if they use this group, some people may well consider it to be on topic.

Take all the covers off the radio and locate the screws
that hold the PCB to the metal chassis frame. Remove
the screws and carefully clean the PCB where the
printed circuit foil around the screwhead outline
forms the GROUND RETURN PATH for the radio.
There may be returns on both sides of the PCB.
Clean with a Q-tip dipped in alcohol. Dry for 10 minutes.
If necessary, re-tin with solder such contacts if so
equipped/treated. (this technique also works for
Astron DC power supplies which are "acting up")

The problem is corrosion forms between the PCB
foil traces and screw head, and sometimes also
between the PCB and the metal chassis frame.
Cleaning and re-tightening them fixes many a
problem, especially if the radio has been in a car
for awhile and subjected to road vibrations, heat,
cold, cigarette smoke etc....

I do have to laugh that people think 1:1 is the holy grail, that they won't be heard if they have 1.5:1. Resonance is more important then impedance.

Height _is_ the most important factor for antennas. Height is might!

Problems 1, 3, 5 and 6 indicate a PLL problem. Problem 4 could be a seperate
issue, but is likely related to the PLL fault. The cause could be any number of
possibilities, but it sounds like the radio was tweaked by someone that didn't
know what they were doing, and turned the VCO control voltage out of capture
range of the PLL.

Problem 2 could be anything.

>Do you have an idea of what I do?

Take it to a qualified tech.

I'm thinking that the final is shot, and what little RF being transmitted is coming from the driver. If you have a multimeter, put the meter inline with the power supply and measure the current being used by the radio in both transmit and receive (with the volume down). With a good radio, transmit should draw at least one amp more than receive. If it doesn't, the final is probably bad.

Not to be concerned about, Shark. Just roll with the
punch's. We all know what a few no-codes are attempting
to do here.

It's only entertainment value. (so far)

I know that, Landshark. It's just disappointing that an alleged Extra class ham can't ever discuss anything technical. I don't expect anything different from Doggie or Frankie-fag.

But then, they're all admitted liars, so why should we care?

So, what the hell are you talking about? You still haven't explained.
I know you're pretty simple, really, Georgie-girl. But you don't make
any logical or reasonable sense, as a rule.

Seems to use less cpu..and it's not as vulnerable as IE
is to auto 'upgrades' and the crap that goes along.

It doesn't use IE. (free too) I've been looking for alternative
browsers lately. Avant seems ok so far.

Source record: 166504

killdagger,
You might give it a try, it certainly can't hurt anything.
You also might try other configurations you have the space
for. As long as you don't double the legs of a dipole back
onto themselves, 'shape' isn't too critical.
As for the SWR, well, it sounds about normal to me. The
'low SWR readings from daylight to dark' type antennas are the
ones that sound 'unnatural', it just doesn't happen that way
unless there's a reason. That reason is usually lower
efficiency. You just don't get something for nothing, and if
it sounds too good to be true, it usually is.
'Doc

>
>ohhhhhhhh but not too long ago brainbluster denied he multiple posted.

Please show proof... where is the post?
Oh yes, proving your accusations is not your strong point.

>now he is blaming it on software failure.

No, try looking again... I said that it was the ISP SERVER.
That may not suit you, but it is a fact.

I made ONE copy of a message but, because my ISP's news server was acting
up, the server refused to acknowledge that it had received and posted a
message... so my systen (quite correctly) kept trying to send it.
That is NOT a problem with my system or software, it is doing what it
should... trying to send a message.
For software to assume that a message was received, without confirmation,
would risk loss of messages.

Look at the times and IP numbers
You will see that they are all copies of the same message... the creation
time is the same, to the second.
Also, you will see that, apart from the last copy, the message that got
repeated was sent on a different IP number than the rest. All the other
posts that day which (as you will see by their creation times) should have
been sent with the first copy of the repeated post, were also delayed until
the IP number changed.

That is because the problem with the ISP was cured by disconnecting,
reconnecting, and getting in through another part of their system. When
this was done, the ISP server acknowledged the post and my system was then
able to remove it from the "Outbox" and send the rest of the messages.

Is this all too much for a Google troll to understand?

I haven't run anywhere.
Some of us have a life off of the newsgroup... shame that you are not one of them.

I know it hurts you to know that I am here, after how you were all shown up for what you are.
I don't post for a day, which is quite common, and you claim I have "run".
That just goes to show how desperate you really are.
You could always "killfile" me, so you can continue your fantasy of me "running away".

Heya Brain,,,,,tyvm! Cooler weather bringing winter in the US and that
intercontinental stuff oughtta be rolling strong again....I love DX
season. Ranks right there with hunting season for this neck of red.
Peace.
===

Did you hear about our nice summer weather here a while back?
I took my children to the seaside, and got quite well burned after just a
short time, it was on the day when they said the temperature went above that
of the 1970s (I remember that hot summer). You could see where my watch had
been for over a week... LOL.
We are still getting some nice weather, although it seems to have cooled off
a bit on Friday.

Regards,

Peter.

Hey Doc, you sound like a politician with all that "I don't know what is wrong
but I'll try and sound like I do" bullshit. Do you have an answer that doesn't
sound like you are on the Democratic ticket? Post it!

Oh bloody hell, can't you and "George" shut the fuck up? You blame him, he blames you, but you BOTH are assholes for eating up so much newsgroup space with your insignificant little whinings -- BOTH OF YOU -- SHUT THE FUCK UP!!!

It takes a man to walk away from a fight -- so who is going to prove himself? Will it be you, Brain? Can you prove your namesake? Or will it be "george", a troll that you already know won't stop posting? Get a fucking clue!

Or are you going to whine about how who is "the man"? Tell ya what, Brain: I'm sick of you, I'm sick of Twisty (hey Mopar, I told you that he couldn't ignore me), I'm sick of "George", and I'm sick of all the hypocrites that whine incessantly about trolls but feed them nonetheless -- and feed them as if they were ready for the auction block!!!

Do you want to make a statement, Brain? Then STFU! Because you are doing NOTHING to help and doing EVERYTHING to keep this troll war going. Keep it up and you will have no more integrity than Hypocrite Homoshark. Do you want THAT?

We had a decent technical discussion a few weeks ago. Don't blow it.

Absolutely correct I'm guilty of
feeding Doug & George. I'm not blaming
just you Mopar, there are a couple
others that are feeding George too.
It's not going to matter, George is
a troll and will always want to have the
last word, right or wrong. Doug is a
cowardly troll and doesn't care what
anyone says, he gets his jollies by
posting lots of vile, vulgar, obscene
stuff thinking it's funny.

Well off to work, take care Mopar,

Landshark

>Invaded?

–

It was Kaputman's term, I merely placed it in proper context.

–

>I think not.

–

Well, what you "think" doesn't change history.

–

> the Federal Goverment gave 11

>meters to the hams in the first place.

–

No argument.

–
>however, due to problems with the technology

>of the

>times (30's, 40's and 50's, the band was an

>electronic dumping ground for everything from
>low poer remote control to medical diathermy

>machines.

–
What remote control devices operating on 27 MHZ were around in the
thirties?

–
>it didn't see a lot of use and in 1959, the FCC

>saw fit to reclassify the band for class D

>service (business use). at the time, the rules

>they dictated did not account for solar effects

>and the like.

–
Which I assume you are speaking of in order to illustrate the light
usage of the band at the time by HAMMIES.

–
>it wasn't until the early 1970's that the cb craze

>took off

_
And that's about all.
_

> and with it came the dirty amps and

>the potty mouths).

_
Way incorrect. Odd how you refuse to acknowledge the plethora of hammies
that continued to "visit" (since you take issue with the term "intrude")
27 MHZ before the cb craze "took off". Methinks you did it intentionally
or simply are uninformed and deluded about what took place. Many of us
were there and active in radio at the time. In fact, where do you think
the in-between capabilities and extra power first originated on 27 MHZ?
With cbers? LOL! Once again, you illustrate how little in the know, the
loudest of the self-professed actually are.

_
>in January of 1981, the FCC did away with

>licensing on the band (though they did not

>reliquish any of the other regulatory functions

>there-in).

_
No cigar. By 1981, the cb's heydey had come and gone. What you actually
do, is prove the opposite of what you're attempting to claim, as it was
in the eighties that the mass proliferation of amps began.

_
>so, the way it stands now, the 11 meter band

>is still a dumping ground, it just has a different

>sort of garbage in it now.

>DE N7ZZT

>Phoenix, Arizona

_
Yet,,,,,,,herre we find you, a hammie, in a cb forum, bitching about how
lousy cb is. That would classify you as a troll's troll, no?
Egad, but some of you hammies are an odd bunch. Why on earth would you
spend time in an electronic forum dedicated to something you feel is
garbage? Never mind,,,,,a reply may make you realize just what it is you
appear unable to comprehend. We have enough wounded egos here without
adding another to the mix. The gist of your offering remains inorrect.
Hammies began breaking the law (with illegal power) and invading 27 MHZ
LONG before the lowly cb'er was offered RF amplifiers. Surely you don't
claim all that wonderful technology of spectrum splicing capability with
peaked power was accidentally happened upon by a cb'er funnin' around,
do you? Then again, perhaps you aren't certain WHAT to think.

_
On Fri, 26 Sep 2003 10:05:00 -0400, Twistedhed wrote: HAhaha,,,,the hammie that shark responded to was so far off base, no wonder he disappeared from this group..he must have been tired of being corrected. Why is it that some who are licensed for communication suffer the greatest deficit in same?
The band wasnt invaded by linears "first",,as Kaput-man claims,,,it was invaded by HAMMIES with their multi-band capabilities LONG before amps became plentiful on eleven meter. In fact, I am surprised a hammie would post such incorrect ignorance as fact AND place his call to such (shrug), but hey, look who took to swimming in the google fecal matter and decided to bring this voodoo bullshit to the group. Check that,,I'm not surprised in the least.

Did you hear about our nice summer weather here a while back? I took my children to the seaside, and got quite well burned after just a short time, it was on the day when they said the temperature went above that of the 1970s (I remember that hot summer). You could see where my watch had been for over a week... LOL.
We are still getting some nice weather, although it seems to have cooled off a bit on Friday.
Regards,
Peter.

--

Yea, I did hear about the weather,,,,,made the DX trip a few times to the "Jolly Rogers" I always talk to. Indian summer finaly coming to an end. Still isn't cool enough to open my windows at night, but I'm waiting. Enjoy that weather while ya' can!

not in the thirties for remote control, but those did start popping up in
the late 1950's and early sixties as the proliferation of the transistor allowed
for it.

oh really. and just how many hams are on 11 meters these days? do you have
the numbers? can you back up that assertion with any definable proof?

Just so you know, I got my start in radio on 11 meters. It was pretty
quiet on most chans in 1979 (save for the short e-skip from california).
people were civil (for the most part). there were some bad apples, but the
FCC kept them in check (the license issue). after 1981, it all went to
hell (litterally). there were people making threats, others jamming the
airwaves with their incessant noise making devices, and still others
running obscene amounts of power. I knew a fair number of hams at the time
and all of them pretty much swore off having anything to do with 11 meters
(and thats the general conensus of opinion I got from any ham I ever met)

I stayed on the band until I acquired my ham ticket in 1992. from that
point on, my presence on the band diminished until 1995 when I finally
sold off all 11 meter related gear and said "to hell with it!". by that
time, the 11 meter band had degenerated into one mass feud between 2
groups of people in the phoenix area, and they didn;t care who they hurt
or what the consequences were. Incidently, it was one of those incidents
that made up my mind to go ham radio (the death of a freidn of mine at the
hands of another over an arguement ON THE RADIO!). so, don't tell me I
know nothing about 11 meters and what went on. I was on the band for
longer than 12 years! I saw and heard more crap than most. I still have
old audio tapes of some of the garbage that transpired on there (a-la
Howard Kingston and group, etc).

> accidentally happened upon by a cb'er funnin' around, do you? Then again,
> perhaps you aren't certain WHAT to think. _
and what is wrong with me posting in a CB radio (note the word RADIO)
related group? I still have a few friends on 11 meters (and they won't
come up to ham because they have more fun down that way). all you prove by
this rant about my being a ham is: you are jealous of the fact that I can
probably do more and have better equipment and not get in near as much
trouble as you could (see some of the FCC daily digests over the last few
years and you'll see a fair number of CB operators in trouble and being
fined). sure, ham radio has its share of bad apples, but when it comes
right down to it, a lot of screwballs hang around on 11 meters.

Besides, I've read in this group where people deliberately post their
violations of regulations (such as part 95, etc) by transmitting out of
band and using non-approved gear to do it with. so whoes worse, the hams
that may actually use type accepted gear on 11, or the fools that use
"other" and violate the rules (the answer is fairly obvious and if you
vote hams, well, you are dumber than I thought you were).

meanwhile, back at the ranch....

DE N7ZZT
Phoenix, Arizona

You don't want any antenna over 5/8 (or .64) wave. The radiation pattern of an antenna after 5/8 wave becomes distorted and you loose valuable RF from the horion to just about every where else...including straight up!

The Sigma IV is actually a 1/2 wave antenna. I know...you've read on here where it says it is a 3/4 wave and is 27' long etc. While this is PHYSICALLY true, it is not ELECTRICALLY true. The Sigma IV is much like a J-Pole for 11 meters. The area ABOVE the loop radiates your signal out. The area INSIDE the loop/cone is part of the matching network.

The BEST antenna you can get is a 5/8 wave ground plane (for omni use).

If you don't want an antenna with ground radials, you have 2 good choices and one bad choice (although it does work). I'd look at these antennas in this order....

Shakespear NBS-2010 (5/8 wave fiberglass)
Solorcon I-MAX 2000 (.64 wave fiberglass)

(ug)
Antron 99 (1/2 wave fiberglass)

You can get anyone of these at Bill's 2 Way

If you want a decent ground plane antenna, get the Maco V58.

If you want the best, get the Interceptor 10K!!
http://www.a1antennas.com/

Tell me where in Southern CA you are and I can help you out! There is also a very good tech over in Ontario. I'll hook you up!!!

Way incorrect. Odd how you refuse to acknowledge the plethora of hammies that continued to "visit" (since you take issue with the term "intrude") 27 MHZ before the cb craze "took off". Methinks you did it intentionally or simply are uninformed and deluded about what took place. Many of us were there and active in radio at the time. In fact, where do you think the in-between capabilities and extra power first originated on 27 MHZ? With cbers? LOL! Once again, you illustrate how little in the know, the loudest of the self-professed actually are. _

>oh really. and just how many hams are on 11

>meters these days?

_
No clue. It has not a thing to do with your claim that cbers messed up the band by bringing amps and the like to it. The hammies did it.

_

> do you have the numbers? can you back up

>that assertion with any definable proof?

_
Hoo-boy! I made no such assertion. You asked me a question, and in your next breath and post, deliberately misattributed said off-topic question as a claim by myself. Now why would you feel the need to do such a thing? It's much simpler to acknowledge you were incorrect in blaming cbers for bringing amps and such to the band.

_
>Just so you know, I got my start in radio on 11

>meters. It was pretty quiet on most chans in

>1979 (save for the short e-skip from

>california). people were civil (for the most

>part). there were some bad apples, but the

>FCC kept them in check (the license issue).

_
Such elitism. I might have guessed. The length of time involved means nothing except to those who need feel a false sense of superiority by some imagined elevated status gained through such behavior. You're a young 'un, You missed the Convoy years and peak of the debacle.

_

>after 1981, it all went to hell (litterally). there

>were people making threats, others jamming

>the airwaves with their incessant noise making

>swore off having anything to do with 11 meters
>(and thats the general conensus of opinion I

>got from any ham I ever met)

_
LOL...and we all know what bastions of integrity ALL hammies are, right Eric?
Riddle me your own inquiry, Eric......how many hammies would admit to breaking the law in public but actually would do so in private away from their fellow hammies? As you asked,,"Proof"? You can not deny it, as the Rain report is chock full of them.
This effectively nullifies your hearsay and believed "consensus"..

_

>I stayed on the band until I acquired my ham

>ticket in 1992.

_
Some never left.

_
>from that point on, my presence

>on the band diminished until 1995 when I

>finally sold off all 11 meter related gear and

>said "to hell with it!". by that time, the 11 meter
>band had degenerated into one mass feud

>between 2 groups of people in the phoenix

>area, and they didn;t care who they hurt or

>what the consequences were.

__
Hahaha,,,you're preaching to the choir here. You;re talking about good 'ol B-O-B and his betabossanova antics. I was actually one of the ones that was often heard having a civil discussion with 'ol bob or Chris or whoever you want to lay blame with at the time. My approach was simple,,,,I didn't allow him to upset me. I too, noticed what happened to my gem frequency of triple five, even wrote an article about it for a

subscription only newsletter at the time. Lelnad C. Scott (KC8LDO) lost face in a debate in this forum with myself and searched the web until he found something, ANYTHING, with my name or email address attached to it that he believed he could use in a malicious manner. (Once again, a shining example of how your "general consensus" is unevenly keeled.) He brought this article to rec.radio cb and after realizing that Bob?Chris was in for the long haul, the choice was clear,,,,change the frequency or adapt...a technique yet to be learned by several ignorant, uneducated, communication-challenged hammies among us.

_

>Incidently, it was one of those incidents that

>made up my mind to go ham radio (the death

>of a freidn of mine at the hands of another

>over an arguement ON THE RADIO!). so,

>don't tell me I know nothing about 11 meters

>and what went on. I was on the band for

_

LOL...you are akin to the minor leaguer telling the incognito retired pitcher what's wrong with his swing.

--

> I still have old audio tapes of some of the

>garbage that transpired on there (a-la Howard

>Kingston and group, etc).

_

Yup,,,they can never compare to your own cb band on two meter....LOL.

_

>in January of 1981, the FCC did away with

>licensing on the band (though they did not

>reliquish any of the other regulatory functions

>there-in).

_

No cigar. By 1981, the cb's heydey had come and gone. What you actually do, is prove the opposite of what you're attempting to claim, as it was in the eighties that the mass proliferation of amps began. _

_

>trying to revise hostory, eh?

_

Which is exacytly what you attempted.

--
Yet,,,,,,,herre we find you, a hammie, in a cb forum, bitching about how lousy cb is. That would classify you as a troll's troll, no? Egad, but some of you hammies are an odd bunch. Why on earth would you spend time in an electronic forum dedicated to something you feel is garbage? Never mind,,,,,a reply may make you realize just what it is you appear unable to comprehend. We have enough wounded egos here without adding another to the mix. The gist of your offering remains inorrect. Hammies began breaking the law (with illegal power) and invading 27 MHZ LONG before the lowly cb'er was offered RF amplifiers. Surely you don't claim all that wonderful technology of spectrum splicing capability with peaked power was accidentally happened upon by a cb'er funnin' around, do you? Then again, perhaps you aren't certain WHAT to think. _

--
>and what is wrong with me posting in a CB

>radio (note the word RADIO) related group?

_
You tell us. You present only part of your equation,,,it's not "radio",,it's "rec.radio.cb", which you have posted several claims of personal disgust with, to the point of referring to it as "garbage"....I guess it would fall under one who enjoys inflicting misery upon one's self,

_
> I still have a few friends on 11 meters (and

>they won't come up to ham because they have
>more fun down that way).

_
LOL,,,,which directly contradicts your earlier claim of your hammie friends "swearing off cb forever".

--
>all you prove by this rant about my being a

>ham is:

_
In the first manner, I did no such thing. In the second, you claimed several things that did not take place,

_

> you are jealous of the fact that I can probably

>do more and have better equipment and not

>get in near as much trouble as you could (see

>some of the FCC daily digests over the last

>few years and you'll see a fair number of CB

>operators in trouble and being fined).

_
Yup. You got it. I'm green with envy over your capabilities and twelve years experience.
_

>sure, ham radio has its share of bad apples,

>but when it comes right down to it, a lot of

>screwballs hang around on 11 meters.

_
Replace "11" with "2" and the statement retains every bit of its integrity.
_
>Besides, I've read in this group where people

>deliberately post their violations of regulations

>(such as part 95, etc) by transmitting out of

>band and using non-approved gear to do it

>with.

_
No,,it's not about posting a deliberate violation. this is where you demonstrate the manner in which so many of you elitists fail to comprhend. This is a forum where many cbers/hammies congregate to talk about whatever we do. Talking skip is but one of those topics that send people not unlike yourself into convulsions. It's not intentional, it's a side benefit and added bonus.

--

>so whoes worse, the hams that may actually

>use type accepted gear on 11, or the fools that
>use "other" and violate the rules (the answer is
>fairly obvious and if you vote hams, well, you

>are dumber than I thought you were).

_
Dumb is as dumb does. If you were around for any length of time, you wouldn't have made the erroneous and misleading statement above you actually think some may buy. Many hammies use their hammie gear on 11, and I note you expertly worded your quote just so..nicely done. But the gist remains, they are illegal. Again, the rain Report archives pay testament to the numerous hammies busted for such tactics as freebanding.

_

>meanwhile, back at the ranch....

>DE N7ZZT

>Phoenix, Arizona

_
I can understand your total frustration and feelings of helplessness,
living in Phoenix and all, but your approach of tossing the baby with
the bathwater is selectively applied to cb only, when your own backyard
needs a healthy dose of Mr. Clean. Start with 2 meter.
And the gist of your entire argument is still incorrect. Hammies brought
the technology to cb, not only with in between freqs and sliding up and
down, but power as well.

--
>the difference between intelligence and

>stupidity is that intelligence has its limits.

_
And you appear to be testing your own glass ceiling.

Hey Frankie: I don't see an answer from YOU. Doc gave the best answer
he could give, without actually being there and seeing the
installation.

If you're so doggone smart (and I did say IF), why don't YOU provide a
good answer? Maybe because you can't?

OFFICIAL PROCLAMATION

WHEREASï¿½keyclowns generate illegal noise, interference, and inbred operating habits; andï¿½

WHEREAS rec.radio.cb residents are on track to clean up the newsgroup; andï¿½

WHEREASï¿½the AKC may be the largest pro-legal CB group on rec.radio.cb; andï¿½

WHEREASï¿½expelling keyclowns saves precious energy, conserves valuable natural resources, protects the environment, reduces enforcement needs and has a positive economic impact; andï¿½

WHEREASï¿½a keyclown-free environment is good for the rec.radio.cb community.ï¿½

Now, therefore, we do hereby proclaim this day of September 29, 2003;

Given under my hand and the Executive Seal of the AKC, this NOTICE:

OFFICIAL KEYCLOWN EXPULSION LIST

The following keyclowns must leave rec.radio.cb:

Twistedhed
REASON: Insanity, criminality, paranoia, incoherence
EXPULSION DATE: 10-1-03

Moparholic
REASON: Belligerence, threats
EXPULSION DATE: 10-1-03

Landshark
REASON: Gayness, hypocrisy
EXPULSION DATE: 10-1-03

Richard Cranium (AE 352)
REASON: Professional Troll
EXPULSION DATE: 10-1-03

Brainbuster
REASON: Troublemaker
EXPULSION DATE: 10-1-03

Tra1n
REASON: Criminality

EXPULSION DATE: 10-1-03

Cowboy
REASON: Mental incapacitance
EXPULSION DATE: 10-1-03

Ozark
REASON: Mental incapacitance
EXPULSION DATE: 10-1-03

Chimbuba (IceColdNYC)
REASON: Criminal Keyclowning
EXPULSION DATE: 10-1-03

Tnom
REASON: General keyclowning
EXPULSION DATE: 10-1-03

Tim Nebo
REASON: Drug dealing, porn
EXPULSION DATE: REMOVED

Bill Eitner
REASON: Self proclaimed amp god
EXPULSION DATE: REMOVED

Toll Free
REASON: Criminal Keyclowning
EXPULSION DATE: REMOVED

Scott Unit 69
REASON: General keyclowning
EXPULSION DATE: RESCINDED FOR GOOD BEHAVIOR

>My bad; your guess is at least as good as Doc's was!

Wrong, o brainless troll. Look again at the original question, and think real
hard about the line, "I recieve just fine, but my transmit is horrible." Now if
you knew -anything- about radio (and you don't) you would know that antennas are
'reciprocal', meaning that if his antenna sucks on transmit, it will also suck
on receive. IOW, his problem isn't with the antenna.

> So why couldn't
>you just post your guess without attacking Doc, who gives freely of
>real information without the personal attacks?

Because while -you- are a total imbicile when it comes to anything technical,
Doc is not, and should have known what I had to explain to you.

Now go crawl back under your rock.

> The little amp might make a decent driver.
>
> "Got RF?"

Heh-heh-heh. If they had any intelligence, they would realize that most users of CB and the nearby frequencies don't bother with amps anyhow: They use (guess what) amateur radios! Who needs an amp when an Icom, Kenwood, or Yaesu runs 100 watts to begin with? [Even the so-called "Sheriff Bob" runs a Yaesu (I believe he said FT920), and frankly I'm quite surprised that nobody has dropped by to bust him yet, or at least pin his coax.]

So much for the losers in the AKC.

BTW, why are they called "anti-key" clowns? Don't they like CW? Obviously Dog-Face Adairierre doesn't (he can't pass the test and is a no-code Tech), but the alleged Extra Georgie-girl should be a "pro-key" clown, yes? Somehow, the logic escapes me. ;)

Nad is an idiot; Frankie-fag is a egotistical moron who can't get a
ham license; Doggie is a repeater jammer and pederast; Aaron is
totally ficticious. That leaves you, Georgie-girl, who is nothing but
a TROLL and a drunk. And all of you are admitted liars who don't
deserve the time of day, let alone any respect.

I wouldn't be a bit surprised if you (or one of your butt buddies)
were sending viruses and/or worms to the people who don't agree with
you. Just like I wouldn't doubt for a minute that most of the
high-powered jamming on (and near) the legal 40 channels is done by
licensed hams like yourself.

Sure, why don't you post your email address? No cojones? Heh-heh-heh.
;)

Your ignorance is showing. You know nothing about
me, yet you make these ridiculous claims.

THEREFORE: You have confirmed once again that you
are so totally consumed with your imaginary obsession
of playing policeman that you can not see reality, nor do you
have the ability to see yourself as others do. With that you have
developed a anti-social disorder that hinders any chance that you
may have had of gaining some ones attention to your cause.

In other words you have a MENTAL disorder that needs attention.

Source record: 166559

I'm a ham, and I agree with everything Twistedhed
just wrote here. The original outbanders on and
around 11 meters were indeed amateur radio ops
who were either: 1) still ticked that 11 meters was
taken away, even though it was even less populated
at that time than, say, 29 MHz and environs is today;
or 2) just playing around because they had the
equipment to do so. The new users of the Class D
"Citizens Radio Service" (so why wasn't it CR and
CR'ers -- but I digress, lol) in 1957 to well into
the early 1960s were equipped with strictly legal stuff
like the Johnson Messenger (early ad:
http://www.retrocom.com/images6/johnson1.jpg)
and the Citi-fone (another amusing early ad:
http://www.retrocom.com/images5/citifonecd5_1.jpg)
and the like. Although there were "skip-shooters"
around in the early 60s, they didn't define CB ops
at all. In fact, most CBers in those days were
sticklers for rules, just as much as hams -- if not
more if only because the restrictions were tougher.
It was pretty much par for the course for early
Class D users to identify their stations by callsign
excessively and to chastise and challenge each
other regarding rules. "REACT" -- and I don't
remember what the acronym stands for now, but
most people know I'm referring to the emergency
response group which was active on CB -- got its
start in those early years, 1961 or 1962 I think.
At that time, the overwhelming source of the
troublemakers, including the invention of
"handles" by hams who obviously didn't want to
identify themselves, were amateurs. As a ham,
I'm not proud of that, nor am I trying to stir
trouble among either group -- it's just the fact,
and there are plenty of folks who remember that
and who I assume are brave enough to say so.
One sidelight -- in the early days of radio
broadcasting, guess which group was also a
terrific source of trouble? Again, it was the
hams, usually young teenage ones -- not unlike
the mischievous yet damaging stuff we see
certain technically-minded young people doing
today with computers. Well, that's it -- I
appreciated Twistedhed's very skillful response

to those who would argue against these facts.
In any event, I concur that they are, in fact, just
the facts. :-)

Oboy, here we go again.... are you about to say something really stupid, like balanced antennas receive the same regardless of how well they transmit? Or that a non-resonant dipole will receive just as well as a resonant dipole? Or that balanced antennas are -not- reciprocal (which would conflict with everything that has been learned in the field of radio for over a century)? Go right ahead, Sideband -- educate me as to how balanced antennas work!

I have known a lot of hammies over the years, and I can't recall ANY of them voicing any bitterness over the loss of the 11 meter band. Most of the original "outbanders" were indeed hams because most of the equipment needed to operate illegally was owned by hams. That's all.

<snip history lesson>
>At that time, the overwhelming source of the
>troublemakers, including the invention of
>"handles" by hams who obviously didn't want to
>identify themselves, were amateurs.

Perhaps you have forgotten this, but at that time, the overwhelming number of CBers were amateurs. And I have never heard anyone say that amateurs invented "handles", let alone for the purpose of hiding their identity. Maybe you have also forgotten that CB radio used to require a license and the use of callsigns. Handles began as nothing more than nicknames, and were a bit more individualized and recognizable than first names. Think of how many replies you would get by calling "Breaker for John...." or "Hey Bill, got your ears on?". And they were fun. That's why they were used, and why they became popular. Not because a few no-good hammies were trying to hide their identity like a Twistedhed.

>certain technically-minded young people doing
>today with computers.

Aw, come on, now you are digging. In the early days of broadcasting, the only major source of trouble was the cut-throat competition between mom-&-pop stations caused by the lack of government regulation. In fact, there were so many stations stepping on each other that amateurs couldn't break through the broadcast pileup if they wanted to. And when the FRC (FCC) was created, they revoked ALL the BC licenses and put a scare into anyone that even considered setting foot on the band illegally, including any possible renegade hammies. That worked for about 30 years, and that's when you begin to see the "outbanders" and radio pirates come on the scene in mass -- right around the late 60's and early 70's, a time when people were becoming very disappointed with the government, and a time when people (hammies and non-hammies alike) began to demonstrate their disrespect and contempt of the government through willful and deliberate violations of the law. IOW, it's not just CB radio that's a mess, and hammies cannot be singled out as the cause. The cause is the spoiled progeny of a previous generation. People today never had it so good, living with the luxuries of such common things as home computers, microwave ovens, central air conditioning, and even license-free two-way radio services. And because of the huge expansion of the news media, and the explosive development of electronic communication and the internet, there has never been a time in US history when the government has had to stand up to so much public scrutiny and accountability. But all this spoiled lot can do is whine, bitch, moan and complain, revising the excuses of the past generation to justify their irresponsible and disrespectful behavior (or just plain laziness).

And Twistedhed is just another troll in that disenchanted kingdom.

There will be alot of skip today. Many amplifiers will be keyed down today on the superbowl and many other cb channels. 2 pills 4 pills 8 pills 16 pills and even a good many tube amplifiers and hey that is just the mobiles. Base stations will be keying down as well.
Just thought I would let you know so you boys could get together and maybe get frustrated and talk bout homosexual stuff and who knows maybe whack each other off.
Have a great day I know I will. Keying down and loving it!
If I dont have too much fun keying down I might be back if not you know I am having too much fun!

> Oboy, here we go again.... are you about to say something really stupid, like
> balanced antennas receive the same regardless of how well they transmit?

No, you said that. I didn't have to. However, a non resonant antenna
showing a high SWR and a high RADIATION resistance will receive better
than it transmits, regardless of what phunkiephysics you're trying to
apply.

> Or that
> a non-resonant dipole will receive just as well as a resonant dipole?

Nope.. again.. you said that.. However, you should know that the
difference between an antenna receiving in resonance and one receiving
out of resonance (depending on how far out of resonance) is in the
nanovolt to miccrovolt range... so you might lose an s-unit or two on
receive. However a dipole showing a 2:1 SWR, as the op has presented,
isn't going to make that much of a difference in either transmit or
receive. Read some ARRL books, Frankie.

> Or that
> balanced antennas are -not- reciprocal (which would conflict with everything
> that has been learned in the field of radio for over a century)?

No antenna is 1:1 "reciprocal" (as you call it).. The ability of the
antenna to radiate RF is not proportional to its ability to receive.
The sooner you get THAT out of YOUR head, you might actually stop
spreading bullshit false information.

> Go right ahead,
> Sideband -- educate me as to how balanced antennas work!

I have a question for you Justin.

Assuming that what Twistyboy said is true. Where's his evidence? Why would a licensed ham operator risk his license to operate illegally when he can go 500kc up to operate legally on a band with the same characteristics? Answer is that unless he's a total fool (yes they are out there) he wouldn't.

Where does he get these "facts" about the first freebanders being mostly hams? Not that it really matters, they all need to be nailed, hams or not. I've helped bust hams doing stupid/illegal things before. (HELPED by providing evidence of their illegal activities, not busted by me personally Twisty so don't even go there again).

It doesnt matter who started it, it matters who is doing it now,
dickbreath. You cant use the past as an excuse to be a federal
criminal.

>same characteristics? Answer is that unless

>he's a total fool (yes they are out there) he

>wouldn't.

Well, you just answered your own question. It happens, and you know it
happens.

>Where does he get these "facts" about the first
>freebanders being mostly hams?

Why the need to place words in my mouth? Tsk tsk,,,really, Kevin. You
know I made no such claim. But if you would like to introduce the
topic,,,,then, yes, I agree a fair amount of freebanders are hammies. To
ignore this is ignorance. (shrug) What you choose to believe or not is
up to you, but to claim your mistaken belief as fact won't fly. If you
pay attention to what the FCC does, you would have seen at the beginning
of the summer several hammies were popped for freebanding, and they
weren't tracked down by salivating wannabe radio cops, no,,,,nothing so
proactive,,,,they were turned in by their fellow hammies who recognized
their voices. Simply because you are unable to comprehend why people
behave in certain manners and commit certain acts, doesn't negate it
taking place.

Frank, I certainly will read more of Twistedhed's stuff to
get a sense of the motivations you mentioned, but you're
just dead wrong on one point. Amateurs were the source
of tremendous problems for early broadcasters. Tech
journalist Simson Garfinkel (no, I didn't make up the name)
had this to say about the period:
"It was a time when teenage boys playing with new
communications technology created havoc for the businesses
and governments who were trying to put the technology to
practical uses. In short, Weightman portrays a time
remarkably similar to our own."
-- source:
http://www.csmonitor.com/2003/0925/p20s02-bogn.html
A very entertaining account of the time, replete with several
chapters devoted to the amateur pirates, almost completely
all of whom were young hams, can be read in Gavin Gavin
Weightman's book "SIGNOR MARCONI'S MAGIC BOX" (Da Capo
Press, 2003) available at Amazon and many local bookstores.
I suggest you read the book -- or any of the many others
that have been written (most of which aren't as entertaining
as Weightman's recent tome, though). There was one book,
though, that did not mention the huge problems created by
hams in those early days, though -- "200 METERS AND
DOWN" written by an ARRL General Secretary and last
offered by the ARRL in the 80s I think. Perhaps you've read
that one: In it, hams are lionized of course, especially those
who were ARRL members (and perhaps those sober adults
did deserve the kudos, I don't know), without even a word
about the incredible shenanigans that, incidentally, you can
also peruse if you search the early New York Times and other
big city papers (requiring a trip to the library microfiche --
buying Weightman's book would be easier) for terms
"wireless" and "interference". That's really all I've got to say
about the topic -- I've layed out the documentation for you,
and you're welcome to take it from there.

Way incorrect. Odd how you refuse to acknowledge the plethora of hammies
that continued to "visit" (since you take issue with the term "intrude")
27 MHZ before the cb craze "took off". Methinks you did it intentionally
or simply are uninformed and deluded about what took place. Many of us
were there and active in radio at the time. In fact, where do you think
the in-between capabilities and extra power first originated on 27 MHZ?
With cbers? LOL! Once again, you illustrate how little in the know, the
loudest of the self-professed actually are. _

>oh really. and just how many hams are on 11

>well, it seems you are in full blown denial

Eric, the denial was in your self-contradiction. First you claim your
friends swear off cb, then you claim they stay there 'cause it's more
fun.

>and

>are now arguing just for the sake of

>arguement.

(shrug) I didn't realize you were yet another incapable of discussion
without feeling the emotional need to even refer to such a discussion as
an argument. I never considered it such.

>since you won't admit to some facts of history,

History is that hammies were around 27 MHZ long before cbers, and
hammies also were the ones to bring the neat little tricks of the hammie
trade to cb, despite your mistaken belief that cbers are the antichrist.

>and you INSIST that yours is the "one true

>way",

And yet another that needs place wordds in one's mouth. I never made
that quote. You;re sinking, Eric, It;s time to tell you goodbye.

>I won't bother responding back to you

>anymore.

>Have fun.

>DE N7ZZT

Yes I read about several hams in Florida being busted for operating out of band. If I remember right all but two (of the seven) were Extra class operators who SHOULD have known better. But then ALL should have know better. There were no "wannabe radio cops" involved but the evidence was gathered through the ARRL Official Observer program. The FCC doesn't have the manpower for early-on investigation. In these matters the FCC will contact the ARRL. The ARRL will contact the local section manager and OOC. This happens quite often down here. I get email or phone calls several times a year requesting that I listen and/or record suspected violators' activities. Generally the FCC will then send an NAL to the individual and it's over. Occasionally the fool will continue and the FCC will "personally" get involved. Then it goes as far as in Florida where the guys get nailed to the wall.

Apparently you have a short memory. Some months ago you made a really big deal about the way I worded a sentense. You accused me of claiming that I personally busted some individuals when I made no such claim. I just didn't want you to try that again.

Speaking of wire dipoles.....

Have a look at this one. It's a distributed capacity coaxial wire dipole antenna. There are no formulas, but it looks interesting.
Should start another interesting thread.....
